General Description of Exhibit

OLD ISLAND RESTORATION FOUNDATION
Bahama Village Photo Documentation

The photographs in this exhibit depict many of the old and unrestored houses in Key West. Some are still lived in by decendants of the original settlers from the Bahamas in the 1800s.

The photo team purposefully avoided photographing new restorations or "gentrified" homes in order to give the viewer a feel for the historic structures and their continued place in the history of Key West.

The address and date of origin are approximate.
