Staff Report for Item 12b**

**To:** Chairman Bryan Green and Historic Architectural Review  
Commission Members

**From:** Enid Torregrosa, MSHP

**Meeting Date:** February 23, 2016

**Applicant:** Michael B. Ingram, Architect

**Application Number:** H15-01-1864

**Address:** #311 Elizabeth Street

---

**Description of Work:**

New exterior staircase and deck over rear addition.

**Building Facts:**

The building in question is a contributing resource to the historic district. The structure, built circa 1884 as a two story single family home. Today it houses two apartments. The first Sanborn maps depict the house as rectangular in footprint, with an attached rear addition towards the south. A cistern located on the north. The 1948 Sanborn map shows no rear addition and the 1962 Sanborn map depicts a rear addition built over the cistern, with a similar footprint of what exists today. An aerial photo from 1968 shows a one-story structure attached to the back of the building with a gable roof, very similar to how the structure looks today.

Although the rear addition may have non-historic exterior materials, for the purposes of this review staff considers the rear volume as historic; the footprint as well as the roof configuration still looks similar as what is depicted in the 1962 Sanborn map and 1968 aerial photograph.

**Ordinance Cited on Review:**

- Section 102-217 (3), demolition for contributing and historic structures of the Land Development Regulations.

## Staff Analysis

The Certificate of Appropriateness in review is for the partial demolition of a gable roof located on the back portion of the contributing house. The gable roof is over a one-story addition that, although non-original to the house, has been there for more than 50 years. The addition may have exterior non-historic materials and the fenestrations may have changed from its original design, still the roof and footprint configurations are the same as the ones depicted in the 1962 Sanborn map and 1968 aerial photograph.

For the proposed demolition of portions of the gable roof, staff opines that the structure meets three of the criteria:

**(1) The one-story rear portion of the house embodies distinctive characteristics, and is a significant entity. This portion of the house remains significant to the historic fabric and still reads as the intended volume as it was when built. (SOIS 1, 2, 3, 4 and 10-P. 16-23)**

(2) The rear portion of the house is not specifically associated with events that have made a significant contribution to local, state, or national history;

(3) The rear portion of the house has no significant character, interest, or value as part of the development, heritage, or cultural characteristics of the city, state or nation, and are not associated with the life of a person significant in the past;

(4) The rear portion of the house is not the site of a historic event with a significant effect upon society;

(5) The rear portion of the house does not exemplify the cultural, political, economic, social, or historic heritage of the city;

(6) The rear portion of the house does not portray the environment in an era of history characterized by a distinctive architectural style;

(7) The rear portion of the house is not related to a square, park, or other distinctive area.

**(8) The rear portion of the house does have a unique location and singular physical characteristic which represents an established and familiar visual feature of its neighborhood, the change of the gable roof to a roof-deck will alter the visual quality of the existing structure; and**

**(9) The rear portion of the house yields, and is likely to yield, information important in history, it is a historic part of the house and is a physical record of its time.**

### **Consistency with the Ordinance**

It is staff's opinion that the partial removal of the gable roof and its replacement with a roof deck will have an adverse effect in the site. Staff also opines that the rear gable roof is historic, is not extremely deteriorated, and it is a physical record of its time. Staff cannot recommend to the Commission the consideration of the request of partially removal of a gable roof.

If by the contrary the Commission finds that the request is appropriate this will be the first of two readings.
