Staff Report Item 7

Meeting Date:	November 25, 2014
Applicant:	Carlos Rojas, Architect
Application Number:	H14-01-1750
Address:	#1016 James Street
Description of Work:	Construction of new scooter carport over parking area on Thompson Lane.
Building Facts:	The site in review contains a contributing resource, a frame vernacular house built c. 1899 and first appears on the 1912 Sanborn map. The house fronts James Street, but its rear faces on Thompson Lane.
Guidelines Cited in Review:	Outbuildings (pages 40-41), specifically first two paragraphs of page 40 and guidelines 1 through 9 of page 40.

Staff Analysis

The Certificate of Appropriateness in review proposes the construction of a frame structure to be used as a scooter carport. The structure will be placed over existing car parking and set back one foot from the property line. The new scooter carport structure will connect to an existing equipment shed. Inside the existing shed is A/C units, not a washer and dryer, as indicated on the plans. The proposed carport will be 9' high from grade and its roof will be covered with metal v-crimp.

To complete this project, the existing fence that shields the equipment shed will be moved to the property line with gates that open onto the lane.

Consistency with the Guidelines

1. Construction of excessive outbuildings detracts from the quality of a historic neighborhood and lessens its intended appearance and historical design.

2. Carports are not appropriate in the historic district when they are highly visible from the right-of-way.
3. Although the carport will have a harmonious scale, it will front right on Thompson Lane. There is another carport on the street, but it is set back eight feet from the street.

It is staff's opinion that the proposed scooter carport will be highly visible from the lane, which is a public right-of-way, and therefore is not appropriate. There are a few historic houses that face this lane, and the creation of more carports will detract from their intended appearance and historical design.
