

Staff Report for Item 5

To: Chairman Michael Miller and Historic Architectural Review Commission Members

From: Kelly Perkins, MHP
HARC Assistant Planner

Meeting Date: January 27, 2015

Applicant: Pike Architects, Architect

Application Number: H14-01-1886

Address: #500 Duval Street

Description of Work:

Renovation of a historic awning on a contributing building.

Site Facts:

The site of 500 Duval Street is home to the Kress Building, a significant commercial structure built in 1913. The awning, the focus of the application, is original to the building, but has been modified over the years as evidenced by historic photographs. Today, it is in poor condition and needs repair. In 2014, the City Commission approved an easement for the awning.

Guidelines Cited in Review:

Secretary of the Interior's Standards (page 16-7), specifically Standard 6.

Roofing (page 26), specifically guideline 6.

Staff Analysis

The Certificate of Appropriateness proposes renovations to a character defining feature of the Kress Building – its awning. Historic photographs and postcards show that the awning originally had a metal fascia, but the photographs show that it has been modified with different fascia profiles over the years. The awning was originally an off-white/grey color.

Currently, the fascia is made of plywood on the main Kress Building and metal at the Margaritaville section. Overall, the awning is in need of repair.

The application proposes refinishing and retaining all of the structural elements of the awning. The only materials that will be removed will be due to rot or failure, and they will be replaced with the same material to match existing. The design of the new profile was taken from historic photographs and inspired by the fascia profile on the cornice. The cornice appears to be mostly unchanged throughout the historic photographs.

The awning will then be painted greenish black to match the existing color of the cornice. Historically, the cornice was painted a grey/off-white color that was more similar to the original awning color.

Consistency with Guidelines

1. The Secretary of the Interior Standards state that deteriorated historic features shall be repaired rather than be replaced. When the severity of deterioration requires replacement, the new feature must match the old in design, color, and texture and other visual qualities, and when possible, materials. The applicant has tried to match the original in design, texture, and materials, but not in color. The use of greenish black on the awning will weigh the building down and look inappropriate. A silver or grey color would be more appropriate.
2. Photographic documentation shows that the current fascia is not historically accurate, and the proposed design is much closer to matching the original.

The design, as proposed, meets the guidelines and the Secretary of Interior's Standards for rehabilitation, with the exception of the proposed color.
