

Staff Report for Item 3

To: Chairman Michael Miller and Historic Architectural
Review Commission Members

From: Kelly Perkins, MHP
HARC Assistant Planner

Meeting Date: March 24, 2015

Applicant: JDS of North America and Kipany Productions

Application Number: H15-01-0011

Address: #401 Duval Street

Description of Work:

Construction of a raised Trex deck in front yard to cover tree roots.

Site Facts:

St. Paul's Episcopal Church is a contributing resource, built in the Gothic Revival architectural style in 1912 according to the survey, but photographs from 1918 show it under construction. It first appears on the 1926 Sanborn map. The site is composed of not just the church, but also the rectory next door, which was built c. 1868, according to the survey, but it again first appears on the 1926 Sanborn map. It is possible that the rectory was relocated to the site. In the front of the property are two large Royal Poinciana trees. The deck in question will be constructed around the Royal Poinciana tree between the church and the rectory.

Guidelines Cited in Review:

Decks, Patios, Hot Tubs, & Pools (pages 39-40), specifically guidelines 1, 2, 3, and 4.

Staff Analysis

The Certificate of Appropriateness in review proposes the construction of a composite deck in the front yard of St. Paul's Episcopal Church to create a flat walking surface around a Royal Poinciana tree. The proposed deck will be 32 feet by 17 feet, 4 inches and 14 inches

tall. Instead of using traditional materials, such as wood, the applicant has proposed to use Trex, a composite of recycled wood, sawdust, and plastic. The deck will be situated five feet from the property line/city sidewalk.

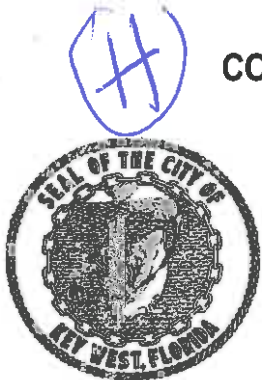

Staff has suggested the applicant use flexi-pave instead of building a raised deck, as flexi-pave will be less visually intrusive and is what the City uses to cover tree roots that interfere with sidewalks.

Consistency with the Guidelines

1. Wooden decks shall not be built *on the front* of any house.
2. The guidelines state that amenities such as decks should not be located on any publicly visible elevation. Wood decking with excessive square footage in proportion to the area of the lot damages historical integrity and appearance.
3. Efforts should be made to ensure that decks are not *visible* from the right-of-way by use of landscape or screening.

It is staff's opinion that this project is inconsistent with the guidelines in regards to the deck's location and size. The deck is proposed to be built in the front yard of a structure and only setback five feet from the property line. The deck will be quite large with a width of 17 feet, 4 inches and a length of 32 feet. The new deck will also be highly visible from the public right-of-way.
