

**Historic Architectural Review Commission
Staff Report for Item 4**

To: Chairman Bryan Green and Historic Architectural Review
Commission Members

From: Enid Torregrosa, MSHP
Historic Preservation Planner

Meeting Date: June 23, 2015

Applicant: Matthew Stratton, Architect

Application Number: H15-01-0130

Address: #415 Grinnell Street

Description of Work:

New two-story structure and site work on vacant lot.

Site Facts:

The main structure in the site is a contributing resource to the historic district. The historic house sits north to an empty parcel that is part of the property. The Planning Department rendered in 2012 a build back determination after the city condemned a dwelling unit that was latter demolished by the owners. The site in question has remained vacant. In May 2015, the Planning Board granted variances for detached habitable space for the back portion of the proposed house as well as a variance for open space.

Guidelines Cited in Review:

- Additions and alterations/ New construction (pages 36-38a); specifically guidelines for new construction.

Staff Analysis

The Certificate of Appropriateness in review proposes a new two-story frame structure that will be set on a vacant portion of the lot. The main façade design is a tripartite composition where the central volume serves as the main entrance, the left volume is a garage, and the

right volume reads as the main core of the house. Each of the three volumes is setback differently, which breaks the mass of the building at the pedestrian level. The new design is contemporary but incorporates forms and textures traditionally found in historic frame architecture.

Analyzing the main façade, the right side volume is a two-story structure with a gable roof where metal louvered panels are found on the front first floor facade. The pediment of this volume includes metal shingles as siding material. All windows will be metal impact resistant.

For the central two-story volume, the plan includes for the façade coral stone siding. The plan proposes aluminum nana doors and sidelights for the main entrance and second floor. A stainless steel cable railing system is also proposed at the second floor front porch.

The third and northernmost volume will have a small in depth gable roof attached to a parapet wall with stucco finish. Behind the parapet wall, the floor plans depict a roof deck.

Site improvements include the removal of an existing six-foot fence that at this time gives front privacy to the existing pool area. A four feet tall sliding gate to access the proposed garage is included in the plans.

All sides and back siding will be cement lap and metal v-crimp panels will cover the gable roofs. No additions or connections will be built between the new house and the existing historic structure.

Consistency with Cited Guidelines

The current proposal includes the construction of a new two-story house that is large in footprint. The proposed design accomplishes lowering the scale and mass at visible street elevations by creating setbacks at the front yard, by breaking the front façade into volumes, and by creating different roofs. The proposed house will not read as a faux vernacular structure and will be in keeping with the scale, textures, and forms found within the surrounding urban context.

It is staff's opinion that the proposed new two-story house and minor site improvements are consistent with the guidelines for new construction.

Parcel Sales History

NOTE: Sales do not generally show up in our computer system until about two to three months after the date of sale. If a recent sale does not show up in this list, please allow more time for the sale record to be processed. Thank you for your patience and understanding.

Sale Date	Official Records Book/Page	Price	Instrument	Qualification
11/29/2012	2603 / 2305	100	QC	11
4/2/2012	2563 / 332	630,000	WD	37
5/1/1998	1515 / 1213	292,000	WD	Q
5/1/1994	1309 / 0118	195,000	WD	Q
8/1/1993	1269 / 1640	180,000	WD	Q
6/1/1985	945 / 1003	85,000	WD	Q
