

## **Staff Report for Item 2**

**To:** Chairman Bryan Green and Historic Architectural Review

**Commission Members** 

From: Kelly Perkins

HARC Assistant Planner

Meeting Date: July 28, 2015

**Applicant:** One Call Construction

**Application Number:** H15-01-0750

Address: #421 Angela Street

## **Description of Work:**

Installation of tile over concrete floor on front porch of contributing structure.

## **Site Facts:**

#421 Angela is a contributing resource in the survey, constructed c.1906. The two-story, frame vernacular house first appears on the 1912 Sanborn map. The house is currently undergoing renovations. As evidenced by a c.1965 photograph, the house has had a concrete front porch for at least 50 years.

This application came to HARC last month. It was postponed by the Commission. The applicant has come back with more potential tile to install on the front porch. The possible tiles are all ceramic, except one is porcelain, and they range in size and color.

## **Guidelines Cited in Review:**

Secretary of the Interior's Standards for Rehabilitation, specifically Standards 2, 3, 4, 5, and 6.

Entrances, Porches, and Doors (pages 32-33), specifically guidelines 3, 4, 5, and 16.

## **Staff Analysis**

The Certificate of Appropriateness for review proposes adding tile to the top of a historic concrete porch in order to alter the pitch of the porch. Currently, the porch slopes towards the house, and adding the tile will help change the pitch so that water will run away from the house.

As tile is not historically appropriate for front porches in Key West, other alternatives have been suggested to the applicant, such as using a cap coat of concrete to change the pitch in the porch, creating a channel for the water to flow elsewhere and cover the porch with wood tongue-and-groove boards, or installing gutters to catch rainwater from hitting the porch. Water should not be infiltrating a porch, so a better response might be to understand why there is enough water on the porch to cause damage.

## **Consistency with the Guidelines**

- 1. The Secretary of the Interior's Standards state that, "Distinctive features, finishes, and construction techniques...that characterize a historic property shall be preserved." In addition, when a new feature is added, it should match the old in material.
- 2. The guidelines state that porches with deteriorated portions must be repaired with materials that replicate the original features as closely as possible using physical or historical evidence as a guide. There is no evidence to suggest this porch ever had tile.
- 3. The guidelines also state that deteriorated porch elements to be replaced with new that are *compatible in size*, *scale*, *design*, *and material* with the originals.

There are some porches in Key West that have tile, but only a few had tile historically. Most houses with historic porches that are now covered in tile were not done in accordance with the HARC guidelines. The guidelines are very clear in terms of material authenticity for historic porches. The current concrete porch is probably not the original porch to the house, but the house has had a concrete porch for at least 50 years, as evidenced by a c.1965 photograph. In addition, the proposed tile are too large and modern for a historic porch. Staff feels that the proposed project is inconsistent with the guidelines in regards to entrances, porches, and doors and inconsistent with the Secretary of the Interior's Standards for Rehabilitation.

## APPLICATION

## COMBINATION APPLICATION: FLOODPLAIN, CONSTRUCTION AND HARC \$50.00 APPLICATION FEE NON-REFUNDABLE
