

Historic Architectural Review Commission Staff Report for Item 6

To: Chairman Bryan Green and Historic Architectural Review
Commission Members

From: Enid Torregrosa, MSHP
Historic Preservation Planner

Meeting Date: May 24, 2016

Applicant: Perez Engineering

Application Number: H16-03-0002

Address: #1310 Royal Street

Description of Work

Replace rear shed roof with gable roof. Replace exterior board and batten siding with lap siding. Change of window configurations. Replacement of sliding doors.

Site Facts

The building in review is not listed in the current survey. The historic house is a one-story frame vernacular structure that was built circa 1948. The back portion of the house has been altered by a one-story attached addition that extends towards the south as well as an addition at the front of the house. The addition has a shed roof and has board and batten siding.

Guidelines Cited on Review

- Windows (pages 7-8), specifically guideline 6.
- Additions, alterations and new construction (pages 36-38a), specifically guidelines 2, 3, 4, and 5 of page 37. Guidelines for new construction, specifically scale and massing.

Staff Analysis

The Certificate of Appropriateness in review is for the replacement of an existing non-historic shed roof gable roof. The roof replacement is for a non-historic portion rear

addition. The exterior walls of the non-historic addition need to be raised in order to accommodate the new roof. The proposed roof will be lower in height than the main house roof. All materials for the new roof will be wood. The new roof will have metal v-crimp panels. The plans also include the relocation of windows on the rear additions and new sliding doors to be located on the rear façade of the addition. The plans also include the replacement of board and batten siding on the addition with wood lap siding.

Consistency with Guidelines

The proposed changes to the rear of the historic house are consistent with the cited guidelines. The change of a shed roof to a side gable roof is an appropriate design to the house. The proposed changes are to a secondary elevation and the scale, massing, and proportions will not detract from the main house or from the neighboring structures. The proposed change to the existing addition will not overpower any structure adjacent to the site. The proposed changes on fenestrations and siding will be for non-historic portions of the building.
