

Staff Report for Item 2

To: Acting Chairman Richard McChesney and Historic Architectural Review Commission Members

From: Kelly Perkins
HARC Assistant Planner

Meeting Date: August 23, 2016

Applicant: Meridian Engineering

Application Number: H16-03-0042

Address: #1421 Catherine Street

Description of Work:

Replace existing carport.

Site Facts:

The one-story, wood frame structure is listed as a contributing resource in the survey, and it was constructed c.1920. The carport in question is not historic, as it does not appear in any Sanborn maps or in any historic photographs.

This project was first heard by the HARC Commission in June, and was postponed when the Commission requested that the carport be pushed back so that it lines up with the bump out on the building. A revised design was submitted last month that only pushed the carport back six feet, and again was postponed. This time, the applicant is proposing the first design that was submitted to the June HARC meeting.

Guidelines Cited in Review:

Additions and Alterations/New Construction (pages 36-38a), specifically guidelines for new construction.

Outbuildings (Pages 40-41), specifically guidelines 1 through 5.

Staff Analysis

This Certificate of Appropriateness proposes the construction of a new open carport, which will partially be located in the front yard of a contributing building. The carport will have a front gable roof with v-crimp roofing material and hardiboard lap siding. Rather than attached to the primary structure, the proposed carport will be its own freestanding building.

Consistency with Guidelines

This project proposes a carport that will be highly visible from the right-of-way and will be located in the front yard of a structure. The guidelines are clear that “no accessory structure may be built in the front yard of a structure in the historic district,” and that “the construction of new accessory buildings such as...carports which are highly visible from the public right-of-way are not appropriate in the historic district.” The existing carport is not historic, nor is it historically appropriate. There is actually more than enough space to relocate the carport so that it is setback from the principal structure. Therefore, staff finds that this project is inconsistent with the guidelines regarding outbuildings.
