Staff Report for Item 5**

To: Chairman Bryan Green and Historic Architectural Review
Commission Members

From: Enid Torregrosa, MSHP
Historic Preservation Planner

Meeting Date: October 25, 2016

Applicant: Guillermo Orozco- Designer

Application Number: H16-03-0054

Address: #713 Galveston Lane

Description of Work:

Demolition of side wall and rear addition.

Site Facts:

The building under review, build circa 1924, is a contributing resource to the historic district. The building is rectangular in footprint and consists of a main gable roof with an attached shed roof on its rear. The rear portion of the house is not original to the building but it is historic.

Ordinance Cited on Review:

- Section 102-217 (3), demolition for contributing and historic structures of the Land Development Regulations for demolition of rear addition and partial demolition of south wall.

Staff Analysis

This review is for the second reading for demolition. In September 27, the Commission approved the proposed design and first reading for demolition. The Certificate of Appropriateness proposes the demolition of a historic rear addition of the house. Although the addition with a bum-out towards the south side is similar in footprint as the one depicted

on the 1962 Sanborn map, siding and fenestrations have been changed through time. Portions of the south wall have been altered by the removal of a window and its replacement with siding in the 1990's. Approximately 19'-6" lineal feet of the existing south wall will become part of the interior of the house.

It is staff's opinion that the request for this demolition should be reviewed based by the demolition criteria of Chapter 102 Section 218 of the LDR's. The criteria state the following;

(a) The historic architectural review commission shall issue a certificate of appropriateness for an application for demolition:

- (1) If the subject of the application is a contributing or historic building or structure, then it should not be demolished unless its condition is irrevocably compromised by extreme deterioration or it does not meet any of the criteria of section 102-125(1) through (9).*

The proposed elements to be demolished are in good structural condition and are not irrevocable compromised by extreme deterioration.

The following is the criteria of section 102-125:

- 1 Embodies no distinctive characteristics of a type, period, or method of construction of aesthetic or historic significance in the city and is not a significant and distinguishable building entity whose components may lack individual distinction;*

Staff opines that the south portion of the wall has no distinctive characteristics of a type or method of construction; it was altered by the removal of a fenestration and its replacement with wood siding. The rear additions have been altered through times and their interior clearance is too low, particularly towards the end of the roof slope.

- 2 Is not specifically associated with events that have made a significant contribution to local, state, or national history;*

It is staff understanding that no significant events have ever happened in the site that has contributed to local, state, or national history.

- 3 Has no significant character, interest, or value as part of the development, heritage, or cultural characteristics of the city, state or nation, and is not associated with the life of a person significant in the past;*

The portion of the house in question has no significant value as part of a development, heritage, or cultural record of the city.

- 4 Is not the site of a historic event with a significant effect upon society;*

The site is not associated to any significant event.

- 5 *Does not exemplify the cultural, political, economic, social, or historic heritage of the city;*

The portions of the house in question is not an example of any social, cultural, or historic heritage of the city.

- 6 *Does not portray the environment in an era of history characterized by a distinctive architectural style;*

The portions of the house in question is not an example of a distinctive architectural style.

- 7 *If a part of or related to a square, park, or other distinctive area, nevertheless should not be developed or preserved according to a plan based on the area's historic, cultural, natural, or architectural motif;*

The portions of the house in question is not part of a park, square or distinctive area in the city.

- 8 *Does not have a unique location or singular physical characteristic which represents an established and familiar visual feature of its neighborhood or of the city, and does not exemplify the best remaining architectural type in a neighborhood; and*

The portions of the house in question does not exemplify a remaining architectural type in its neighborhood and does not possess any significant visual features.

- 9 *Has not yielded, and is not likely to yield, information important in history.*

The portions of the house in question does not yield important information in history. These additions were designed as storage and laundry spaces for the three houses located consecutive on that side of the lane.

In conclusion, it is staff's opinion that the Commission can consider the request for demolition as it complies with the criteria for demolition stated under the Land Development Regulations.
