Subject: 610 Griffen

Karen, I went out today to preform corrective pruning on the Cinammon Bark tree that was damaged with improper pruning. These are the before and after pictures. I noticed that the tree had a codominant lateral in the upper canopy where the previous work had been preformed. I addressed this issue as well as corrections to the pruning. I would recommend that a certified arborist follow up with some additional pruning to balance the damaged crown in about 6-8 months.

Respectfully

John Cole

STAFF REPORT

DATE: November 3, 2016

RE: Administrative Hearing, 610 Griffin Lane

On September 7, 2016, I received a complaint regarding the improper trimming of protected trees at 610 Griffin Lane. An immediate inspection of the property documented that two Wild Cinnamon trees had been improperly trimmed-topped. There was a couple of guys doing the work with Gregorz Slowiak as the leader. I told them to immediately stop doing any additional trimming work to any trees on the property and explained the improper trimming issue to Gregorz. He was very upset with himself and was very informative.

There were four trees that were topped on the property. Two were smaller, younger trees (2" diameter each tree trunk) and two were older wild cinnamon trees (2.5" and 5" diameter). The initial concern was for the larger cinnamon tree and the poor cut that was made to the tree. One of the two top trunks of the tree had been removed with a poor cut. I asked Gregorz to find an arborist to properly recut the tree. He contacted John Cole-Shade Tree Service who immediately recut the trunk.
