A.2 Purpose

This Request for Proposals (RFP) is designed to provide firms with the information necessary for the preparation of competitive responses. The RFP process is for the City's benefit and is intended to provide the City with comparative information to assist in the selection process. This RFP is not intended to be a comprehensive list of all work and materials necessary to complete the project or supply goods and services. Each firm is responsible for determining all factors necessary for submission of a comprehensive response.

The Consultant who is chosen shall provide services that involve expertise in bicycle, pedestrian and multi-modal transportation planning and engineering. The consultant will be responsible for providing a Bicycle and Pedestrian Master Transportation Plan, ready for approval by the City Commission by the end of one year.

A.3 Project Description

The City of Key West Planning Department is seeking a consultant to prepare a Bicycle and Pedestrian Master Transportation Plan (BPMTP). This is a first for the City. The Consultant will work closely with designated planning staff. The BPMTP shall be consistent with and facilitate the development of other existing and in progress master plans such as the City of Key West Strategic Plan, 2011; Key West Climate Action Plan, 2009; Open Space and Recreation Master Plan; Key West Comprehensive Plan, 2013; Monroe County Comprehensive Plan, 2010; and Key West Transit Development Plan, 2014. The key tasks are to achieve the following:

Task 1. Project Administration – Refining the Scope, Creating a Timeline and Agreeing on a Work Plan

Task 2. Public Engagement and Needs Assessment Plan

Task 3. Inventory – Existing Conditions Report

Task 4. Complete Streets Design Guide

Task 5. Bicycle and Pedestrian Network Plan(s)

Task 6. Engineering (Infrastructure) Plan

Task 7. Education, Encouragement, Enforcement and Evaluation Plan

Task 8. Multi-Modal Connectivity Plan

Task 9. Funding, Maintenance and Implementation Plan

Task 10. Ad Hoc Tasks

Task 11. Final Bicycle and Pedestrian Master Transportation Plan

1. Project Area

The project area encompasses Key West, a 4-mile x 2-mile island beginning at Mile 0 and ending at Mile 4 and Stock Island, an approximately 2-mile x 1 mile island beginning at Mile 4 and ending at mile 6.

A.4 Requirements

On February 26, 2016 the City of Key West Commission approved a Local Agency Program (LAP) Agreement between the City of Key West and the Florida Department of Transportation (FDOT) in the amount of \$250,000 for a Bicycle and Pedestrian Master Plan (FM438687-1). FDOT's Transportation Alternatives Program (TAP) grant program provides the funds. TAP funds are Federal dollars. As a result of using these funds the following State and Federal requirements must be adhered to:

1. Pre-qualification

This project encompasses work on the State Highway System (SHS) and National Highway System (NHS). Professional Consultants are required to be prequalified by

the Florida Department of Transportation (FDOT) in the areas identified (Consultant shall be pre-qualified by FDOT in 13.3 Policy Planning, 13.4 Systems Planning, 13.5 Subarea/Corridor Planning, 13.6 Land Planning/Engineering) in the scope of work of the RFP. Submit a copy of the FDOT-issued pre-qualified letter in your proposal.

However, Professional Consultants who are not qualified at the time of RFP advertisement and are interested in getting qualified must file a completed *Request for Qualification Package for Professional Consultants Form 375-030-01* with FDOT on or before the deadline to submit proposals. Allow a minimum of 30 days for FDOT review keeping in mind that errors or omissions will add additional time to the qualification process. Please refer to Florida Administrative Code (F.A.C.) Chapter 14-75 for prequalification details.

2. Truth in Negotiation Certification

Pursuant to Section 287.055(5)(a), Florida Statutes, the Truth in Negotiations Certification, Form 375-030-30, is required for any lump-sum or cost-plus-a-fixed fee professional services contract over the threshold amount of \$195,000 (F.S. 287.017 Category Four).

Form is in Appendix #1.

3. Conflict of Interest Certification

This project encompasses work on the State Highway System (SHS) and National Highway System (NHS). Each Professional Consultant submitting a proposal on a solicitation for professional services must submit a Conflict of Interest Certification Form 375-030-50. In addition, each individual participating in the selection process for professional services contracts must also submit Form 375-030-50.

NOTE: The form is an interactive form and requires the use of the FDOT website to complete. Use the following link:

<http://www2.dot.state.fl.us/proceduraldocuments/forms/ByNumber.asp> A

SAMPLE of this form in in Appendix #2.

4. Certification Regarding Debarment, Suspension, Ineligibility and Voluntary Exclusion for Federal Aid Contracts

Federally funded projects require a Certification Regarding Debarment, Suspension, Ineligibility and Voluntary Exclusion Form 375-030-32. This form is in Appendix #3.

5. Certification for Disclosure of Lobbying Activities on Federal-Aid Contracts

Federally funded projects require a Certification for Disclosure of Lobbying Activities Form 375-030-33. This form is in Appendix #4.

Additionally, Form 375-030-34 Disclosure of Lobbying Activities (Standard Form LLL) must be submitted if there are lobbying activities to disclose. This form is in Appendix #5.

Any respondent claiming that its response contains information that is exempt from the public records law shall clearly segregate and mark that information and provide the specific statutory citation for such exemption.

Bid Opportunity Reporting. 49 CFR Part 26.11 requires the Florida Department of Transportation to develop and maintain a “bid opportunity list.” The list is intended to be a listing of all firms that are participating, or attempting to participate, on DOT-assisted contracts. The list must include all firms that bid on prime contracts, or bid or quote subcontracts and materials supplies on DOT assisted project, *including both DBEs and non-DBEs*. For consulting companies this list must

include all subconsultants contacting you and expressing an interest in teaming with you on a specific DOT assisted project.

All consultants submitting proposals must complete the Bid Opportunity List, Form 275-030-10 (found in Appendix 13) for all subconsultants who contacted you and expressed an interest in teaming with you on this DOT-assisted project and submit this form with your proposal.

Disadvantaged Business Enterprise (DBE) Reporting. In addition to the provisions found in Form 375-040-84 Local Agency Program Federal-Aid Terms, DBE participation is not required and will not be used as an evaluation factor. The same applies to other program participations, such as Minority Business Enterprise (MBE) or Business Development Initiative (BDI).

As stated earlier, DBE participation is not required but is the policy of the City of Key West that DBE's, as defined in 49 C.F.R. Part 26, as amended, shall have the opportunity to participate in the performance of work under this contract in a nondiscriminatory environment. The DBE requirements of applicable federal and state laws and regulations apply to this contract. The DBE reporting requirements apply to the awarded consultant with an executed contract with the City of Key West for any DBE participation that is utilized to perform work on this project.

The City and its consultants shall take all necessary and reasonable steps and agree to ensure that DBE's have the opportunity to participate in the performance of work under this contract in a nondiscriminatory environment.

FDOT currently has a race neutral DBE program with a 9.91% goal.

Link to DBE firms via the FDOT Equal Opportunity Office (EOO) website:
<http://www.dot.state.fl.us/equalopportunityoffice/moreresources.shtm>.

The following shall be included in all subsequent contracts between the consultant and any subconsultant or contractor:

The consultant, sub recipient or subcontractor shall not discriminate on the basis of race, color, national origin or sex in the performance of this contract. The contractor shall carry out applicable requirements of 49 CFR par 26 in the award and

administration of DOT-assisted contracts. Failure by the consultant to carry out these requirements is a material breach of this contract, which may result in the termination of this contract or other such remedy as the recipient deems appropriate.

Federal Requirements:

Terms for Federal Aid Contracts. Provide FDOT Form #375-040-84. This form includes Title VI Non-Discrimination Contract Provisions, Appendices A and E, DBE and EEO contract provisions. This form is in Appendix #6.

Termination. This agreement may be terminated at any time, with or without cause, by the City upon thirty (30) days written notice to the consultant. No further work will be performed by the consultant upon receipt of this notice unless specifically authorized by the City Manager of the City of Key West. On termination, the consultant will be paid for all authorized services performed up to the termination date plus, if terminated for the convenience of the City, reasonable expenses incurred during the close-out of the agreement. The City will not pay for anticipatory profits.

Evaluation. Chapter 14-75, Florida Administrative Code, requires a system to evaluate the performance of consultants on professional services contracts. The consultant's work performance for each advertised major work type must be evaluated by the project manager (PM). Contracts less than the Florida Statutes 287.017, Category Two threshold (\$35,000), are exempt. Consultants may also be evaluated on minor types of work, if considered significant.

Evaluations of the consultant's performance are conducted in the areas of Schedule, Management, Quality, and Constructability (only for contracts that produce construction plans). The Schedule grade is based on the consultant's compliance with the contract schedule. The Management grade is based on the consultant's ability to manage all necessary project resources, including subs. The Quality grade is based on the consultant's attention to the established quality control plan and delivery of a quality product. The PM should assign a Quality rating to any qualified consultant named in the agreement for any major type of work performed, regardless of whether the firm is a prime or sub. Subconsultants may only receive a Quality evaluation. Evaluation is required at least once every 12 months during the contract period from the Notice to Proceed. All consultant evaluations are based on

a 5 (high) to 1 (low) rating scale, 5 representing “Outstanding” performance and 1 representing “Poor/Unacceptable” performance.

Records Retention. Retain records pertinent to the project for five (5) years and give access to such records to those associated with the grant (FHWA, OIG, FDOT, City of Key West, etc.) at any reasonable time.

Administrative, Contractual or Legal Remedies for Contracts greater than \$150,000. Violation of any local, state, or federal law in the performance of this Contract shall constitute a material breach of this contract, which may result in the termination of this contract or other such remedy, as the City deems appropriate.

Florida Scrutinized Companies. Florida Scrutinized Companies are not allowed on federal-aid contracts. Pursuant to Section 287.135, Florida Statutes, a company that is on the Scrutinized Companies with Activities in Sudan List or the Scrutinized Companies with Activities in the Iran Petroleum Energy Sector List may not bid on, submit a proposal for, or enter into a contract with an agency or local government entity for goods or services of \$1 million or more.

B. SCOPE OF WORK/SERVICES

Task 1 Project Administration - Refining the scope, and ongoing project management

B.1.A. Consultant shall be pre-qualified by FDOT in 13.3 Policy Planning, 13.4 Systems Planning, 13.5 Subarea/Corridor Planning, 13.6 Land Planning/Engineering.

B.1.B. Finalize Scope and Timeline

The consultant will, in consultation with a designated City Project Manager (CPM), the City's Bicycle/Pedestrian Coordinator, finalize any minor and non-substantive revisions to the Scope of Work and timeline.

B.1.C. As part of the final product, consideration should be provided at the beginning to film before and after conditions as well as filming progress and community meetings as a way of bringing the plan alive. A series of "Street Films – like" videos could be done throughout the process and/or one documentary type video at the end. Some these could also be used in Task 2.

B. 1.D. Ongoing Project Management:

- The consultant will monitor work progress, budget, facilitate communication, assign staff, oversee technical work and implement quality control.
- Provide as-needed project coordination conference calls and/or meetings between the consultant's project manager and the CPM.
- Provide invoices and progress reports monthly, complying with all FDOT rules and procedures.
- Prepare all meeting agendas and materials, distributing these to the City Project Manager at least 48 hours in advance.
- Provide note-taking at meetings.
- Provide a project website.
- Provide documents in MS Office and PDF formats.
- Create and maintain a database of stakeholders and participants.

Deliverable: Updated Scope of Work and Timeline

Task 2 – Public Engagement and Needs Assessment Plan and Implementation

Develop a Public Engagement and Needs Assessment Plan consisting of the type of public engagement that will be used and the timeline for setting these up. The intent of the public

engagement is to gather input, assess what the community needs are and build consensus around two broad areas:

- Vision, Goals and Strategies (i.e. what do we want to achieve with this plan?)
- Specifics steps for implementation using the traditional Five E's – Engineering, Education, Encouragement, Enforcement and Evaluation (i.e. how are we going to achieve it?)

The plan should include, but not be limited to:

- Community workshops in neighborhoods to engage residents and part-time residents
- Workshops with the business community, major hotels and employers.
- Workshops with bike shops, bike rental companies and bike touring companies.
- Outreach to tourists.
- Outreach to people who work, but don't live in the City.
- Outreach at existing events.
- A project website for information exchange, project awareness, collection of public input and for contacting the consultant team.
- Efforts will be equitable and engage participation by under-presented populations, including those working multiple jobs who find it difficult to attend meetings.
- Consideration should be given to surveys, intercepts and focus groups.
- Interviews with key stakeholders as identified with the City Project Manager including groups such as the City's Sustainability Advisory Board and Planning Commission, the TDC (Tourist Development Council) and others.
- Innovative and non-traditional outreach and public involvement is desired.

The Public Engagement Plan should include touchpoints throughout the process. Initially to gather input and later on to present and gain feedback and consensus on iterations of the plan.

The consultant team will be responsible for all technical aspects of engagement (website, graphics, programming, etc.). The City Project Manager will be responsible for scheduling and promotion of events.

In order to save time, this task may be completed concurrently with Task 1.

Deliverables:

- A. Develop a Public Engagement Plan
- B. Implementation of the Plan

Task 3 Inventory – Existing Conditions Report

The BPMTP is a strategic planning document and shall include an appraisal of factors within and outside that affects the city's ability to improve bicycling and walking conditions that will increase the numbers of bikers and walkers of all ages and abilities. At a minimum the following should be done:

1. Review relevant plans including the City's Comprehensive Plan (2013), Strategic Plan (2011), Climate Action Plan (2009), Open Space and Recreation Master Plan, Transit Development Plan (2014), Monroe County Comprehensive Plan (2010), the City's un-adopted Bicycle Master Plan (2010) and the City's adopted Bicycle and Pedestrian Strategic Plan (1996).
2. Review similar communities with high quality bicycle and pedestrian networks/plans and conduct a best practices exercise.
3. Collect and analyze all relevant demographic data via U.S. Census tools and other relevant sources.
4. Collect and analyze all relevant bicycle safety reports detailing bicycle and pedestrian related crashes.
5. Analyze the effects of land use, state and local transportation plans, other governmental actions and policies, socioeconomic trends, organizational issues and technology on the future of bicycling and walking.
6. Assess the extent to which the land use, demographic trends, employment and journey to work trends, urban design patterns in the project area support or hinder the efforts to get more people bicycling and walking.
7. Assess the extent to which the large number of tourists and seasonal visitors affects the goals of more people bicycling and walking.
8. Collect and develop GIS inventories of existing conditions including sidewalks, shared use paths, greenways, shared use lanes, bike routes, line of sight issues, bike signage, bike trails, bike parking, street furniture, transit stops, curb cuts, other bike/ped amenities, ROW widths, and at least the last 5 years of bicycle/pedestrian crash statistics.
9. Conduct bicycle and pedestrian counts and collect auto and transit counts for travel corridors.
10. Assess Bicycle and Pedestrian Level of Service for existing major bicycle and pedestrian corridors and compare with other modes.
11. Review any relevant improvement projects that are active, budgeted and/or are identified over the next 10 years.

Note: Maps and data should be available using open source tools and open data, including Open Street Map and transit, bikeshare and bike GTFS formats. The public

should be encouraged to use the data gathered by this project.

Deliverable: Written summary of Task 3 and maps.

Task 4 – Complete Streets Design Guide

This will guide staff in proposing bicycle and pedestrian improvements for typical street section types around the city. It should include a full range of bicycle and pedestrian facilities, traffic calming measures and intersection treatments, including but not limited to:

- On-street bicycle lanes (conventional, buffered, advisory, etc.)
- Protected on-street bicycle lanes (cycle tracks)
- Neighborhood greenways (bike boulevards)
- Shared Use paths
- Shared Use Lane Markings
- Sidewalks
- Crosswalks
- Pedestrian refuge islands
- Curb extensions

The NACTO (National Association of City Transportation Officials) *Urban Street Design Guide*, the *Urban Bikeway Design Guide* and *Transit Street Design Guide* should be used. FDOT will be nearing release of their *Complete Streets Manual* at the end of calendar year 2016 and to the extent it is practical, also be used and cross referenced. While using these standards, the Guide should take into account Key West's unique characteristics.

Deliverable: Draft Complete Streets Design Guide

Task 5 – Bicycle and Pedestrian Network Plan(s)

The Bicycle and Pedestrian Network Plan(s) (Consultant and City PM should decide in Task 1 whether or not these will be a joint or separate bike and walk plans) will prescribe the full range of bicycle and pedestrian facility types and where they should go. It is particularly crucial that a network of bicycle facilities with a Bicycle Level of Service of A and B crisscross Key West and Stock Island, east and west, north and south so that persons can get around with little interference from cars. It will pay special attention to context-sensitive facilities to attract more vulnerable and risk-adverse populations so that active

transportation can continue to play a key role in advancing Key West as a bicycle and pedestrian friendly city. In determining which type should be applied to each route, the Consultant will use its expertise and client and public input to analyze factors, including but not limited to:

- Street width
- Pavement and sidewalk conditions (maintenance, widths, use)
- Traffic volume
- Traffic speed (limit and actual)
- Street type
- Crosswalk and intersection amenities
- Plazas, ferry terminals, transit stops, paths and other areas of high pedestrian activity
- Destinations served by each route
- Signing amenities (wayfinding/caution)
- Lighting (scale, location, needed maintenance)
- Land use
- Connections to transit
- Streetscape amenities (benches, shade, plantings and other street furniture)

Include discussion of implementation challenges (right of way limitations, flood-prone areas, visitors who are unfamiliar, environmental clearance, construction, retrofitting and ongoing operation, Historic Architectural Review Commission (HARC) guidelines, etc.) as well as opportunities (multi-benefits, economies of scale, existing networks, partners, current and planned redevelopment and improvements, etc.

The Bicycle and Pedestrian Network Plan should include phased priority based upon a combination of ease of implementation and cost.

This should include high-quality, visually attractive online and paper maps that show the existing and proposed street networks/improvements.

Note: Maps and data should be available using open source tools and open data, including Open Street Map and transit, bikeshare and bike GTFS formats. The public should be encouraged to use the data gathered by this project.

Deliverable: Draft Bicycle and Pedestrian Network Plan(s)

Task 6 – Engineering (Infrastructure) Plan

Utilizing national and international best practices, the NACTO Guides and FDOT Complete Streets guidance, the Engineering or Infrastructure Plan should upon the Bicycle and Pedestrian Network Plan(s) with at least the following elements:

1. Infrastructure Work Plan

Arranged in one, five, and 10 year increments, develop an infrastructure work plan.

Consider short-term (low hanging fruit) striping improvements for routine City and County maintenance resurfacing.

2. Wayfinding and Signage Design Guidelines

Specify best placement of signs, markings, maps, traffic signals and other elements to delineate safe passage between pedestrians, bicyclists and cars.

3. Bicycle Parking and End of Trip Facilities

While bikeways are the most visible element within a bicycle network, bicycling must also have safe and convenient places to store their bicycles for both short and long-term periods. This plan should include:

- Discussion of the different kinds of bicycle parking facilities, the pros and cons of each and recommendations of types for future implementation.
- Existing facilities and types.
- Performance standards recommendations for facilities.
- Where facilities are needed and what types are recommended.
- Bicycle parking at transit stations.
- Temporary (event) bicycle parking.
- Priority by phases.
- Design program to partner with the private sector.
- Design program to address abandoned bicycles and locks.
- Recommend any changes needed to City Codes/Parking Ordinances to accommodate Plan.

This section should also take a look at bicycle-friendly car parking and make recommendations for actions that can be taken that reduce conflicts between bikes and cars. This could include back-in angles parking, door-zone buffers added to bike lanes etc.

4. Preliminary Design on Selected Bicycle and Pedestrian Network Routes and Facilities

Provide “before” and “after” (proposed) typical Sections of each corridor. Provide before and after aerials of what intersections and corridors could look like (bulbouts, trees, bus stops, etc.).

The idea is to get a number of projects to a point in the design process so that they could be provided to FDOT for TAP (Transportation Alternatives Program) or other funding. This includes discussion of any special engineering, environmental and State Historic Preservation characteristics of the project, right-of-way and ownership issues, etc. that the TAP Application takes into account. Cost estimates should be provided too.

Deliverable: Draft Engineering (Infrastructure) Plan

Task 7 – Education, Encouragement, Enforcement and Evaluation Plan

While safe, attractive bicycle and pedestrian infrastructure – the hardware – is critical to increasing bicycle and walking, education, education, encouragement, enforcement and evaluation – the software – must also be implemented if Key West is to become more bike-walk-friendly. The plan should identify best practices and make recommendations for Key West to implement. The plan should address these elements for full and part-time residents, persons who work in the City, persons who visit the City and the business community.

“Education and Encouragement” should include emphasis on:

1. Mode shift/or moving the needle to more biking and walking, and
2. Safety or how people walking, bicycling and driving use our streets and facilities more safely.
 - Current programs should be analyzed and retooled and enhanced. This should include how the program is named and branded for the future.
 - Explore and recommend education and encouragement as it relates to FDOT’s Commuter Services and Best Workplaces for Commuters programs.

- Explore and recommend enhancements and/or wholesale changes to the Bike Walk Key West program's Be a PAL – Predictable, Alert and Lawful approach to safety programming vis-à-vis State programs such as *Stay Alert*, *Stay Alive* safety program and others.
- Explore and recommend enhancement, including online tools for the City's annual Green Commute Challenge.
- In addition to making recommendations on how to encourage people who live, work and visit here to bike, walk, use transit and share the ride more, explore and make recommendations on how to encourage tourists and seasonal residents to not bring cars to Key West.
- These explorations should include how the programs are managed and implemented (in-house, contractors, etc.).
- "Enforcement" should include actions that the Key West Police Department can take across all transport modes.
- "Evaluation" should include actions the City should take to benchmark and evaluate progress of the BPMTP's implementation.
- Explore and recommend ways the City could implement a bicycle and pedestrian counter programs along with traffic vehicle traffic.

Deliverable: Draft Education, Encouragement, Enforcement and Evaluation Plan

Task 8 – Multi-Modal Connectivity Plan

Getting a greater share of people to use bicycles and walking as a mode of transportation likely depends upon the City's ability to also invest in, build and promote all options to driving alone. This includes transit, car/vanpooling, carshare, bikeshare, taxis, TNCs (transportation network companies) like Uber and Lyft and Uber Pool and Lyft Line. Research shows that a rising tide of transportation options lifts all alternative modes to driving. Research also shows that parking policy and supply have great influence on whether people drive or use other options. Given this, the Consultant shall provide some thoughts on:

- Improving Key West Transit and the Lower Keys Shuttle local transit (paying particular attention to the Adopted Transit Development Plan (TDP) (2014)
- Looking at inter-city ground transit
- Looking at private sector transit
- Carshare
- Bikeshare (this is covered in Task 9 – Ad Hoc Tasks)
- Car/Vanpooling
- TNCs
- Parking policies and facilities
- Transportation Demand Management strategies (also largely covered in Task 7)

The idea is to bring the BPMPT into the greater context of multi-modalism and to make recommendations on what the City can do in the broader context for each of these. This is intended simply as a very broad brush.

Task 9 – Funding, Maintenance and Implementation Plan

The success of any plan recommendation depends on its ability to be funded. The Consultant will develop an implementation plan that includes cost estimates and helps identify potential funding sources.

After bicycle and pedestrian infrastructure has been constructed, it is imperative that it continues to be maintained. The Consultant will provide recommendations to keep the new infrastructure attractive and operating safely at a high level and to maximize the life of the projects. Recommendations should include construction materials and equipment, service and preventative maintenance programs.

The Consultant should review all current and long range capital improvement plans (CIP) and make recommendations on how best to incorporate bicycle and pedestrian elements and safety in them. Bicycle and pedestrian projects recommended herein should be meshed best as possible with the CIP to achieve maximum efficiency.

Consider short-term (low hanging fruit) striping improvements for routine City and County maintenance resurfacing.

In order to advance the BPMTP's recommendations, the Consultant will develop a matrix summarizing the prioritized improvements, a general timeframe for completion classified as immediate, short, or long-term, and associated costs, sources of funding, next steps and department/agency partners.

Consultant will provide a methodology to update the BPMTP and track achievements.

Deliverable: Draft Funding, Maintenance and Implementation Plan

Task 10 – Ad Hoc Tasks

This is a list of things the City wants to make sure are covered somewhere in the above sections:

1. Recommendations on using Bicycle and Pedestrian Level of Service (LOS) as outlined in the Transportation Element of the City’s Comprehensive Plan.
2. Analysis with recommendations to bring the “Triangle” high hazard zone (where U.S. 1, North Roosevelt Boulevard, South Roosevelt Boulevard) to at least Bicycle LOS B.
3. Analysis and recommendations for adopting “Stop-as-Yield” Idaho-style stop laws as passed in Aspen (2013), Dillon (2011) and Breckenridge (2011).

Instructions for Certification

Instructions for Certification - Lower Tier Participants:

(Applicable to all subcontracts, purchase orders and other lower tier transactions requiring prior FHWA approval or estimated to cost \$25,000 or more - 2 CFR Parts 180 and 1200)

- a. By signing and submitting this proposal, the prospective lower tier is providing the certification set out below.
- b. The certification in this clause is a material representation of fact upon which reliance was placed when this transaction was entered into. If it is later determined that the prospective lower tier participant knowingly rendered an erroneous certification, in addition to other remedies available to the Federal Government, the department, or agency with which this transaction originated may pursue available remedies, including suspension and/or debarment.
- c. The prospective lower tier participant shall provide immediate written notice to the person to which this proposal is submitted if at any time the prospective lower tier participant learns that its certification was erroneous by reason of changed circumstances.
- d. The terms "covered transaction," "debarred," "suspended," "ineligible," "participant," "person," "principal," and "voluntarily excluded," as used in this clause, are defined in 2 CFR Parts 180 and 1200. You may contact the person to which this proposal is submitted for assistance in obtaining a copy of those regulations. "First Tier Covered Transactions" refers to any covered transaction between a grantee or subgrantee of Federal funds and a participant (such as the prime or general contract). "Lower Tier Covered Transactions" refers to any covered transaction under a First Tier Covered Transaction (such as subcontracts). "First Tier Participant" refers to the participant who has entered into a covered transaction with a grantee or subgrantee of Federal funds (such as the prime or general contractor). "Lower Tier Participant" refers any participant who has entered into a covered transaction with a First Tier Participant or other Lower Tier Participants (such as subcontractors and suppliers).
- e. The prospective lower tier participant agrees by submitting this proposal that, should the proposed covered transaction be entered into, it shall not knowingly enter into any lower tier covered transaction with a person who is debarred, suspended, declared ineligible, or voluntarily excluded from participation in this covered transaction, unless authorized by the department or agency with which this transaction originated.
- f. The prospective lower tier participant further agrees by submitting this proposal that it will include this clause titled "Certification Regarding Debarment, Suspension, Ineligibility and Voluntary Exclusion-Lower Tier Covered

Appendix #3 continued (2 of 2)

Transaction," without modification, in all lower tier covered transactions and in all solicitations for lower tier covered transactions exceeding the \$25,000 threshold.

g. A participant in a covered transaction may rely upon a certification of a prospective participant in a lower tier covered transaction that is not debarred, suspended, ineligible, or voluntarily excluded from the covered transaction, unless it knows that the certification is erroneous. A participant is responsible for ensuring that its principals are not suspended, debarred, or otherwise ineligible to participate in covered transactions. To verify the eligibility of its principals, as well as the eligibility of any lower tier prospective participants, each participant may, but is not required to, check the Excluded Parties List System website (<https://www.epls.gov/>), which is compiled by the General Services Administration.

h. Nothing contained in the foregoing shall be construed to require establishment of a system of records in order to render in good faith the certification required by this clause. The knowledge and information of participant is not required to exceed that which is normally possessed by a prudent person in the ordinary course of business dealings.

i. Except for transactions authorized under paragraph e of these instructions, if a participant in a covered transaction knowingly enters into a lower tier covered transaction with a person who is suspended, debarred, ineligible, or voluntarily excluded from participation in this transaction, in addition to other remedies available to the Federal Government, the department or agency with which this transaction originated may pursue available remedies, including suspension and/or debarment.

The intent of the public engagement is to gather input, assess what the community needs are and build consensus around two broad areas:

- Vision, Goals and Strategies (i.e. what do we want to achieve with this plan?)
- Specifics steps for implementation using the traditional Five E's – Engineering, Education, Encouragement, Enforcement and Evaluation (i.e. how are we going to achieve it?)

- D. The CONSULTANT shall implement the Plan

Task 3 Inventory – Existing Conditions Report

The BPMTP is a strategic planning document and shall include an appraisal of factors within and outside that affects the city's ability to improve bicycling and walking conditions that will increase the numbers of bikers and walkers of all ages and abilities. At a minimum the CONSULTANT shall:

12. Review relevant plans including the City's Comprehensive Plan (2013), Strategic Plan (2011), Climate Action Plan (2009), Open Space and Recreation Master Plan, Transit Development Plan (2014), Monroe County Comprehensive Plan (2010), the City's un-adopted Bicycle Master Plan (2010) and the City's adopted Bicycle and Pedestrian Strategic Plan (1996).
13. Review similar communities with high quality bicycle and pedestrian networks/plans and conduct a best practices exercise.
14. Collect and analyze all relevant demographic data via U.S. Census tools and other relevant sources.
15. Collect and analyze all relevant bicycle safety reports detailing bicycle and pedestrian related crashes.
16. Analyze the effects of land use, state and local transportation plans, other governmental actions and policies, socioeconomic trends, organizational issues and technology on the future of bicycling and walking.
17. Assess the extent to which the land use, demographic trends, employment and journey to work trends, urban design patterns in the project area support or hinder the efforts to get more people bicycling and walking.
18. Assess the extent to which the large number of tourists and seasonal visitors affects the goals of more people bicycling and walking.
19. Collect and develop GIS inventories of existing conditions including sidewalks, shared use paths, greenways, shared use lanes, bike routes, line of sight issues, bike signage, bike trails, bike parking, street furniture, transit stops, curb cuts, other bike/ped amenities, ROW widths, and at least the last 5 years of bicycle/pedestrian crash statistics.

20. Conduct bicycle and pedestrian counts and collect auto and transit counts for travel corridors.
21. Assess Bicycle and Pedestrian Level of Service for existing major bicycle and pedestrian corridors and compare with other modes.
22. Review any relevant improvement projects that are active, budgeted and/or are identified over the next 10 years.

Note: Maps and data shall be available using open source tools and open data, including Open Street Map and transit, bikeshare and bike GTFS formats. The public shall be encouraged to use the data gathered by this project.

The CONSULTANT shall provide a written summary of Task 3 and maps.

Task 4 – Complete Streets Design Guide

This will guide staff in proposing bicycle and pedestrian improvements for typical street section types around the city. The CONSULTANT shall develop a Complete Streets Design Guide that includes a full range of bicycle and pedestrian facilities, traffic calming measures and intersection treatments, including but not limited to:

- On-street bicycle lanes (conventional, buffered, advisory, etc.)
- Protected on-street bicycle lanes (cycle tracks)
- Neighborhood greenways (bike boulevards)
- Shared Use paths
- Shared Use Lane Markings
- Sidewalks
- Crosswalks
- Pedestrian refuge islands
- Curb extensions

The NACTO (National Association of City Transportation Officials) *Urban Street Design Guide*, the *Urban Bikeway Design Guide* and *Transit Street Design Guide* should be used. FDOT will be nearing release of their *Complete Streets Manual* at the end of calendar year 2016 and to the extent it is practical, also be used and cross referenced. While using these standards, the Guide should take into account Key West's unique characteristics.

The CONSULTANT shall provide a draft Complete Streets Design Guide

Task 5 – Bicycle and Pedestrian Network Plan(s)

The CONSULTANT shall provide a Bicycle and Pedestrian Network Plan (CONSULTANT and City PM should decide in Task 1 whether or not these will be a joint or separate bike and walk plans) that prescribes the full range of bicycle and pedestrian facility types and where they should go. It is particularly crucial that a network of bicycle facilities with a Bicycle Level of

Service of A and B crisscross Key West and Stock Island, east and west, north and south so that persons can get around with little interference from cars. It will pay special attention to context-sensitive facilities to attract more vulnerable and risk-adverse populations so that active transportation can continue to play a key role in advancing Key West as a bicycle and pedestrian friendly city. In determining which type should be applied to each route, the CONSULTANT shall use its expertise and client and public input to analyze factors, including but not limited to:

- Street width
- Pavement and sidewalk conditions (maintenance, widths, use)
- Traffic volume
- Traffic speed (limit and actual)
- Street type
- Crosswalk and intersection amenities
- Plazas, ferry terminals, transit stops, paths and other areas of high pedestrian activity
- Destinations served by each route
- Signing amenities (wayfinding/caution)
- Lighting (scale, location, needed maintenance)
- Land use
- Connections to transit
- Streetscape amenities (benches, shade, plantings and other street furniture)

CONSULTANT shall include discussion of implementation challenges (right of way limitations, flood-prone areas, visitors who are unfamiliar, environmental clearance, construction, retrofitting and ongoing operation, Historic Architectural Review Commission (HARC) guidelines, etc.) as well as opportunities (multi-benefits, economies of scale, existing networks, partners, current and planned redevelopment and improvements, etc.

The Bicycle and Pedestrian Network Plan shall include phased priority based upon a combination of ease of implementation and cost.

This shall include high-quality, visually attractive online and paper maps that show the existing and proposed street networks/improvements.

Note: Maps and data shall be available using open source tools and open data, including Open Street Map and transit, bikeshare and bike GTFS formats. The public should be encouraged to use the data gathered by this project.

The CONSULTANT shall provide a draft Bicycle and Pedestrian Network Plan(s)

Task 6 – Engineering (Infrastructure) Plan

Utilizing national and international best practices, the NACTO Guides and FDOT Complete

Streets guidance, the CONSULTANT shall provide an Engineering or Infrastructure Plan with at least the following elements:

5. Infrastructure Work Plan

Arranged in one, five, and 10 year increments, develop an infrastructure work plan.

Consider short-term (low hanging fruit) striping improvements for routine City and County maintenance resurfacing.

6. Wayfinding and Signage Design Guidelines

Specify best placement of signs, markings, maps, traffic signals and other elements to delineate safe passage between pedestrians, bicyclists and cars.

7. Bicycle Parking and End of Trip Facilities

While bikeways are the most visible element within a bicycle network, bicycling must also have safe and convenient places to store their bicycles for both short and long-term periods. This plan shall include:

- Discussion of the different kinds of bicycle parking facilities, the pros and cons of each and recommendations of types for future implementation.
- Existing facilities and types.
- Performance standards recommendations for facilities.
- Where facilities are needed and what types are recommended.
- Bicycle parking at transit stations.
- Temporary (event) bicycle parking.
- Priority by phases.
- Design program to partner with the private sector.
- Design program to address abandoned bicycles and locks.
- Recommend any changes needed to City Codes/Parking Ordinances to accommodate Plan.

This section should also take a look at bicycle-friendly car parking and make recommendations for actions that can be taken that reduce conflicts between bikes and cars. This could include back-in angles parking, door-zone buffers added to bike lanes etc.

8. Preliminary Design on Selected Bicycle and Pedestrian Network Routes and Facilities

Provide “before” and “after” (proposed) typical Sections of each corridor. Provide before and after aerials of what intersections and corridors could look like (bulbouts, trees, bus stops, etc.).

The idea is to get a number of projects to a point in the design process so that they could be provided to FDOT for TAP (Transportation Alternatives Program) or other funding. This includes discussion of any special engineering, environmental and State Historic Preservation characteristics of the project, right-of-way and ownership

issues, etc. that the TAP Application takes into account. Cost estimates should be provided too.

The CONSULTANT shall provide a draft Engineering (Infrastructure) Plan

Task 7 – Education, Encouragement, Enforcement and Evaluation Plan

While safe, attractive bicycle and pedestrian infrastructure – the hardware – is critical to increasing bicycle and walking, education, education, encouragement, enforcement and evaluation – the software – must also be implemented if Key West is to become more bike-walk-friendly. The CONSULTANT shall develop a plan that identifies best practices and makes recommendations for Key West to implement. The plan shall address these elements for full and part-time residents, persons who work in the City, persons who visit the City and the business community.

“Education and Encouragement” shall include emphasis on:

1. Mode shift/or moving the needle to more biking and walking, and
2. Safety or how people walking, bicycling and driving use our streets and facilities more safely.
 - Current programs shall be analyzed and retooled and enhanced. This should include how the program is named and branded for the future.
 - Explore and recommend education and encouragement as it relates to FDOT’s Commuter Services and Best Workplaces for Commuters programs.
 - Explore and recommend enhancements and/or wholesale changes to the Bike Walk Key West program’s Be a PAL – Predictable, Alert and Lawful approach to safety programming vis-à-vis State programs such as *Stay Alert*, *Stay Alive* safety program and others.
 - Explore and recommend enhancement, including online tools for the City’s annual Green Commute Challenge.
 - In addition to making recommendations on how to encourage people who live, work and visit here to bike, walk, use transit and share the ride more, explore and make recommendations on how to encourage tourists and seasonal residents to not bring cars to Key West.
 - These explorations shall include how the programs are managed and implemented (in-house, contractors, etc.).

- “Enforcement” shall include actions that the Key West Police Department can take across all transport modes.
- “Evaluation” shall include actions the City should take to benchmark and evaluate progress of the BPMTP’s implementation.
- Explore and recommend ways the City could implement a bicycle and pedestrian counter programs along with traffic vehicle traffic.

CONSULTANT shall provide a draft Education, Encouragement, Enforcement and Evaluation Plan

Task 8 – Multi-Modal Connectivity Plan

Getting a greater share of people to use bicycles and walking as a mode of transportation likely depends upon the City’s ability to also invest in, build and promote all options to driving alone. This includes transit, car/vanpooling, carshare, bikeshare, taxis, TNCs (transportation network companies) like Uber and Lyft and Uber Pool and Lyft Line. Research shows that a rising tide of transportation options lifts all alternative modes to driving. Research also shows that parking policy and supply have great influence on whether people drive or use other options. Given this, the CONSULTANT shall provide written briefs touching on:

- Improving Key West Transit and the Lower Keys Shuttle local transit (paying particular attention to the Adopted Transit Development Plan (TDP) (2014)
- Looking at inter-city ground transit
- Looking at private sector transit
- Carshare
- Bikeshare (this is covered in Task 9 – Ad Hoc Tasks)
- Car/Vanpooling
- TNCs
- Parking policies and facilities
- Transportation Demand Management strategies (also largely covered in Task 7)

The idea is to bring the BPMPT into the greater context of multi-modalism and to make recommendations on what the City can do in the broader context for each of these. This is intended simply as a very broad brush.

Task 9 – Funding, Maintenance and Implementation Plan

The success of any plan recommendation depends on its ability to be funded. The CONSULTANT shall develop an implementation plan that includes cost estimates and helps identify potential funding sources.

After bicycle and pedestrian infrastructure has been constructed, it is imperative that it continues to be maintained. The CONSULTANT shall provide recommendations to keep the new infrastructure attractive and operating safely at a high level and to maximize the life of the projects. Recommendations should include construction materials and equipment, service and preventative maintenance programs.

The CONSULTANT shall review all current and long range capital improvement plans (CIP) and make recommendations on how best to incorporate bicycle and pedestrian elements and safety in them. Bicycle and pedestrian projects recommended herein should be meshed best as possible with the CIP to achieve maximum efficiency.

Consider short-term (low hanging fruit) striping improvements for routine City and County maintenance resurfacing.

In order to advance the BPMTP's recommendations, the CONSULTANT shall develop a matrix summarizing the prioritized improvements, a general timeframe for completion classified as immediate, short, or long-term, and associated costs, sources of funding, next steps and department/agency partners.

CONSULTANT shall provide a methodology to update the BPMTP and track achievements.
