RE: Administrative Hearing, 813 Baptist Lane

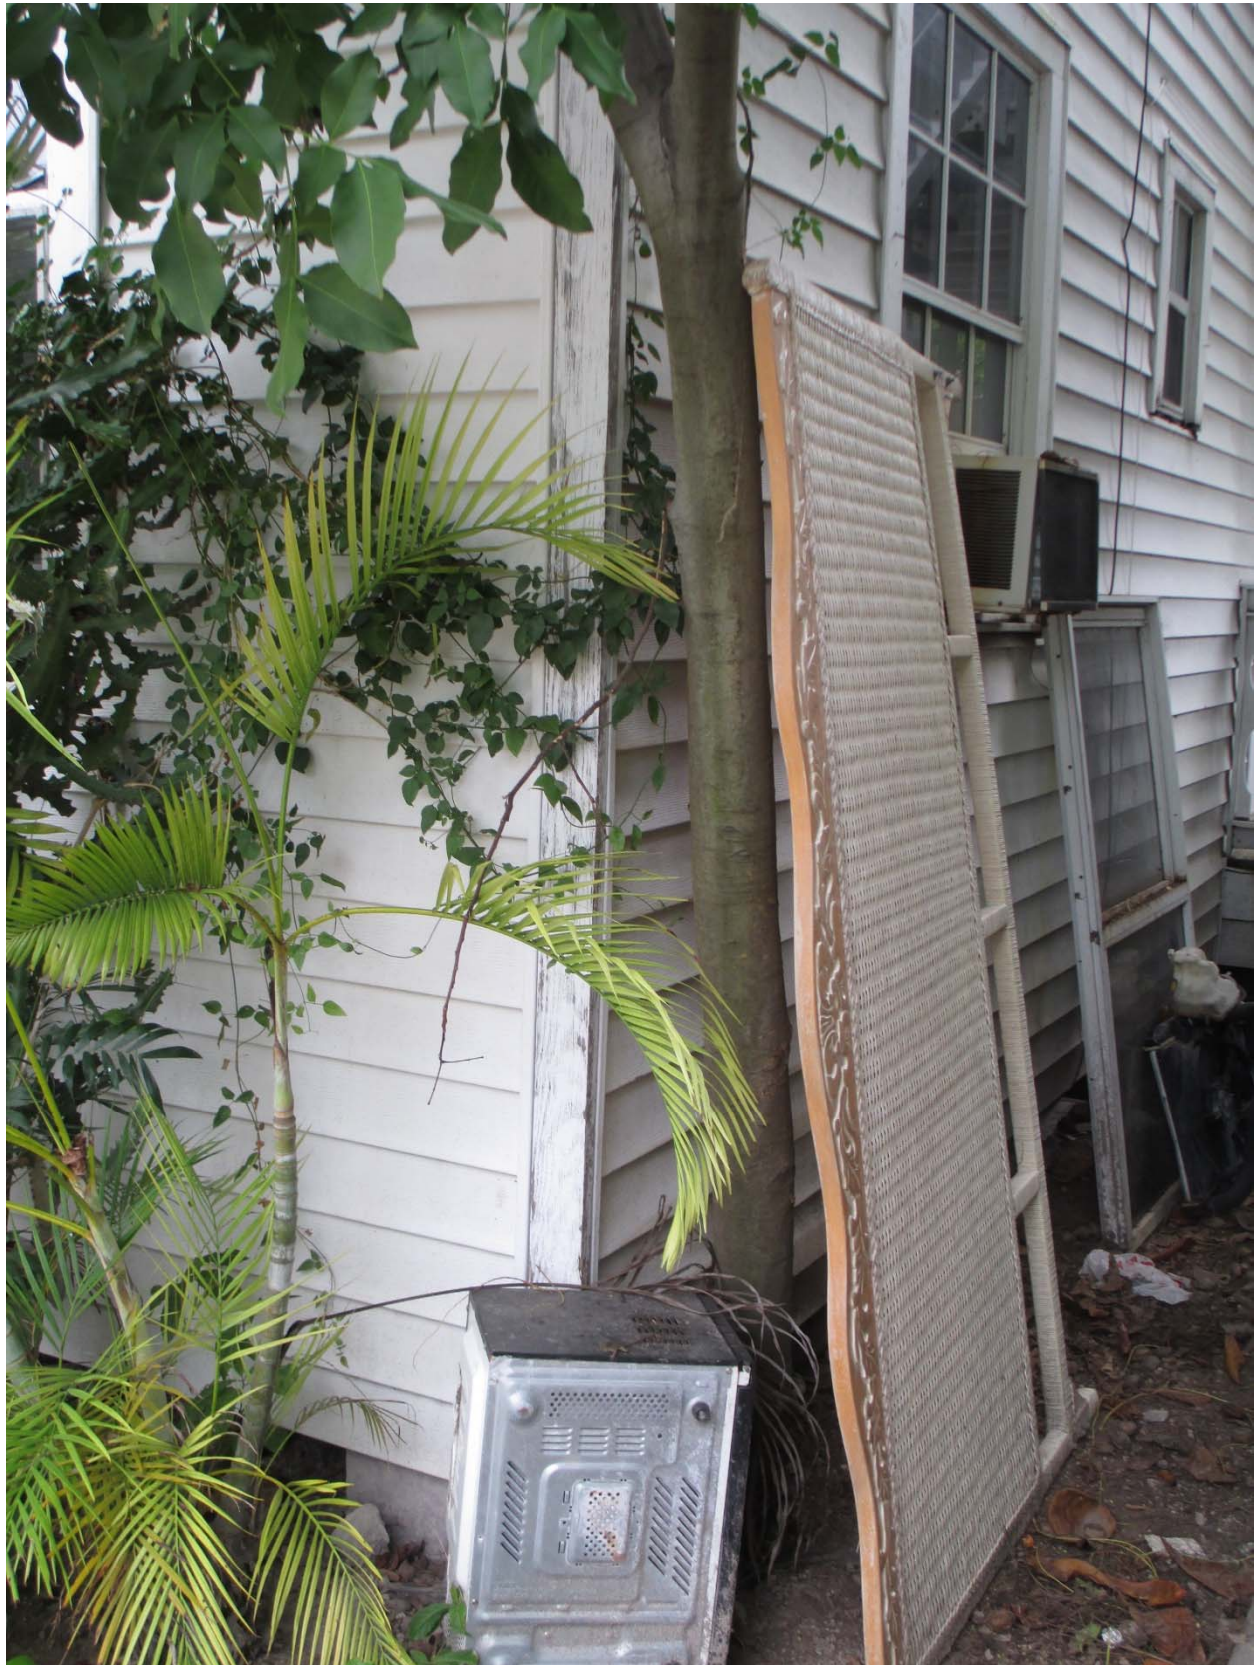

A complaint was received November 3, 2016 regarding trees being removed from the property. An inspection by code indicate that only shrubs and groundcover were being removed at that time. An inspection November 8, 2016, documented that a Spanish lime tree had recently been removed.

History: In 2014 the tree was first observed growing in the back of the house. A representative of the owner had discussed removing the tree. They were informed that an application needed to be submitted for processing in front of the Tree Commission. At the time the tree measured 7.9" diameter.
