Solution Statement:

The Developer is proposing to redevelop the subject Property in a way which is permitted as of right and compatible with this corridor of North Roosevelt Boulevard. The site is non-conforming as to all aspects of pervious surface, drainage, building elevation with respect to flood height requirements and landscaping. The proposed plan will improve all of the existing non-conformities. Bulk recycling along with solid waste disposal containers shall be adequately buffered from site along with adequate grease interceptors to service the proposed operation. Landscaping along the rear of the Property will be dense to mitigate sound and light from leaving the site, along with the installation of a new solid fence to create a visual buffer. Dark sky lighting will be used along with measures to buffer light from the Property from intruding on the neighboring rear property owners. Adequate measures have been taken to accommodate life safety and access to and from the site for emergency vehicles.
