Hi Karen,

I feel it is very important that you consider the plight of the Strangler Fig tree at 923 Johnson St. The removal of this beautiful specimen would be a travesty.

When I think of progress within communities, I never think of sacrificing one of nature's wonders to satisfy an urbanized vision of living spaces.

Please give this plea your deepest thought and make the right decision. I know that the Strangler Fig on Johnson will be deeply grateful along with many of us who love the natural world!

My best regards,

Scott Barnes
