1. Please provide a location map for the proposed scooter rental location at 1105 Simonton Street including the surrounding road network. Please identify nearby licensed scooter rental locations on the map. Please also include the proposed trip distribution and assignment percentages on the map.

Oropeza, Stones, Cardenas 08/11/17 response: This letter is submitted as follow-up to The Traffic Review Comments from the City's consultant traffic engineer provided to me by your office this morning. I have attached the location map depicting the surrounding road network of Simonton Street, Duval Street, (North-South) and Catherine Street, Amelia Street, Virginia Street, Truman Avenue, and United Street (East- West). Nearby scooter rental locations are marked with an X. Trip distributions allocations are annotated on the map to reflect those calculations prepared by the applicants Traffic Consultant.

CGA response: Addressed.

2. Please provide details regarding the rental location of the scooters. This should include where the scooters to be rented (maximum cap of 235 vehicles proposed) will be located at 1105 Simonton Street. Please confirm if the scooters will be stationed on site or located within the public right of way. Please confirm the on-site parking that is available for potential scooter rental customers.

Oropeza, Stones, Cardenas 08/11/17 response: The proposed number of electric bikes, scooters or electric cars is to allow up to seventy-five (75) pieces of rental equipment. It is unknown at this time whether the rental location will offer electric bikes, scooters or electric car/golf carts or a combination of vehicles from those categories. All rental inventory will be stored within the Ratcliff property, with zero storage on the City right of way. No onsite parking is required for customers travelling to 1105 Simonton to pick up rental vehicles as the location is within the Parking Waiver Zone.

CGA response: Addressed.
