

# UPDATED STAFF REPORT

DATE: September 27, 2017

RE: **1120 Curry Lane (permit application # T17-8617)**

FROM: Karen DeMaria, City of Key West Urban Forestry Manager

A site inspection was done on September 26, 2017 to document the existing condition of the Sapodilla tree after Hurricane Irma.

09/27/2017

The tree is still standing after the storm. There is a lot of damage to the canopy. Values and condition remain the same as previously stated.

Additional information has not been submitted regarding termite issue to the remaining tree. No evidence of termites was found when digging around the base of the tree.

Diameter: 58.2"

Location: 80% (back yard tree)

Species: 100% (on protected tree list)

Condition: 40% (poor, recent maintenance trimming permit removed trunk section with termites, dead branch areas throughout canopy, poor lower structure)

Total Average Value = 73%

**Value x Diameter = 42.4 replacement caliper inches**
