

Commendation for

Nigel Hook

On the morning of August 17th, 2017 Throttle-man Nigel Hook and Driver Jay Johnson broke the endurance speed record from Key West to Cuba. In a 48 foot Silverhook powerboat sponsored by Lucas Oil and IBM Watson IoT, traveling 103 miles through the Florida Straights they completed the journey in 1 hour, 18 minutes and 3 seconds. They held an average speed of 79.23 mph and reached a top speed of 127 mph to set the new speed record. Despite a challenging open ocean course, facing 5 to 7 foot waves, the Silverhook Race Team was able to set new records for travel from Key West to Havana and Havana to Key West.

Nigel Hook, a Champion offshore power boat racer for over thirty years, convened a top notch race team and showcased hard work, determination and the latest in technology to accomplish setting the new World Record.

This world record journey was first attempted almost a 100 years ago. Certainly this new record will continue to see many challengers attempting to hold the title. We look forward to hosting these exciting attempts for years into the future

Key West and Cuba share a captivating history and we share a connection by way of the sea with our island nation that makes this record extra special to the residents of Key West. We thank you for continuing to add to our rich history, and congratulate you on this notable accomplishment.

In recognition of this honor, the City of Key West hereby presents this Commendation to:

Nigel Hook

WITNESS my hand and seal of the City of Key West, Florida, this 8th day of November, 2017.

Mayor Craig Cates

Commendation for
Jay Johnson
