**Description of Work:**

Shade structure for cruise port security located on Pier B.

**Site Facts:**

Pier B is a private own cruise ship landing located in the west side of the island. Originally, the pier was part of the property declared as surplus from the Naval Station. Originally, the pier was a wooden dock, built around 1910. In the 1930s, a reinforced concrete pier replaced the old wooden one and during WWII, the main platform was strengthened and reinforced. The pier consists of two platforms with a main connector to land. The easternmost platform used to have the docks storage facilities with an observation tower, which was demolished in the 1990s. Currently the pier connector has a metal fence and a frame covered canopy as the entry/ exit post. Pier B is one of four main piers that had survived from the Navy era in the western basin, Mole Pier being the other one. In order to accommodate larger vessels, during the 1990s, the westernmost platform was increased in size by extending the north and west sides.

**Guidelines Cited on Review:**

- Guidelines for New Construction (pages 38a- 38q), specifically guidelines 1, 2, 12, and 23.
- Guidelines for Outbuildings (pages 40-41), specifically guidelines 1, 3, 9, 10, and 11.

### **Staff Analysis**

The Certificate of Appropriateness in review proposes a covered pavilion to provide shade and protection to visitors that uses the Pier B facilities. This will replace the current shade structure. The proposed design will extend 122'-11' over the dock, will be 18'-6" wide from column to column, and will have an overall height of 12'-5" extending up to 16'-7 1/2" on two cupola. Towards the westernmost portion of the design, the structure increases in width and height, up to 18'-6" from the floor to the upper portion of a third proposed cupola. The design includes a wooden fence towards the north and south sides of the structure and wooden louvered doors with lattice at top.

All structural components will be wood and the roof exterior finish will be metal v-crimp. The design proposes decorative outriggers and moldings under the eaves and between the columns. Wood fence will be white.

### **Consistency with Guidelines**

It is staff's opinion that the proposed design meets the cited guidelines. Although the majority of the existing pier is historic, the surrounding and adjacent context is not. The new structure will be smaller than adjacent non-historic buildings and will be made of materials and textures found within the neighboring structures. The structure will be visible from Mallory Square, the Truman Waterfront Park and from the hotel; nevertheless its scale and mass will not have an adverse impact in historic buildings.
