

**Historic Architectural Review Commission
Staff Report for Item 9**

To: Acting Chairman Richard McChesney and Historic Architectural Review Commission Members

From: Kelly Perkins, MHP
HARC Assistant Planner

Meeting Date: September 27, 2018

Applicant: William P. Horn

Application Number: H18-0004

Address: #201 William Street

Description of Work:

Plaza renovations at the Key West Bight, including hardscape.

Site Facts:

The proposed plans at the Key West Bight covers three plaza renovations – the plaza at the end of Greene Street, outside of Conch Republic Seafood Company, the circle area at the end of William Street and entrance to Lazy Way Lane, and the plaza at the end of Margaret Street between Half Shell Raw Bar and Turtle Kraals. The application also includes improvements to Lazy Way Lane.

Guidelines Cited on Review:

Guidelines for Parking Areas, Landscaping, & Open Space Environment (pages 43-44), specifically guidelines 1, 4, and 8.

Staff Analysis

The Certificate of Appropriateness in review is for the installation of brick pavers, landscaping, and wooden walkways in the Bight area. The plaza at the end of Greene Street will have new wooden walkways installed along the water's edge. New brick pavers will be installed, and more landscaping will be installed. The wooden walkway will continue to the shops along Lazy Way Lane to create a more inviting entryway for the stores.

The circle at the end of William Street will have new brick pavers installed at the entrance of Lazy Way Lane to create a more pedestrian feel. New landscaping will be installed as well.

The plaza area at the end of Margaret Street will have new brick pavers installed with new landscaping and trees along the street's end. An existing wooden booth will be removed.

Consistency with Guidelines

The guidelines cover that changing paving materials should not affect the relationship of the buildings to their environment and should be compatible with the neighborhood. The guidelines also state that past appearance of the property should guide decisions for new work on the site. Photographs found from history show that most of the area has undergone a lot of change over the years. Aerial photographs show that typically that area was always a combination of concrete or dirt, and that the area was industrial. In the past twenty years, street improvements were installed, such as the wooden walkways along the waterfront, and brick pavers to create a more plaza feel in certain area – specifically the plazas at the end of Greene Street and Margaret Street.

The proposed plans will continue the wooden walkway along the water's edge and create more pedestrian friendly spaces in the Bight. The area has changed over time, and there is little historic fabric left. Staff finds the proposed plans consistent with the guidelines.
