I object to the additional 2 units being proposed! I think it is already unacceptable that the city has allowed 4 units on one property in a single family neighborhood! Adding 2 more for a total of 6 is a small apartment complex in a single family neighborhood. I don't understand how the City will continue to allow these additions. Please keep the residents and homeowners of this area in my mind and do not permit these two units. It is bad enough that we are now dealing with 4 units on one property

Subject: Fw: Nov 14, DRC Agenda item 3

I am writing to object to the addition of 2 affordable housing units at 1020 18th Terrace. The agenda item as written is misleading. There are an existing 2 housing units and 2 affordable housing units. This brings the total number of units on this property to 6. I object to taking what was a single family home and now has become an apartment building in a single family neighborhood.

Thank you,

Dan Sabino
