

Historic Architectural Review Commission Staff Report for Item 5

To: Chairman Bryan Green and Historic Architectural Review

Commission Members

From: Enid Torregrosa, MSHP

Historic Preservation Planner

Meeting Date: December 19, 2018

Applicant: Juan Zapata, Architect

Application Number: H2018-0011

Address: #130 Duval Street

Description of Work:

Renovations to existing front façade including new siding, new second floor porch and new storefront windows and doors. New wall sign with copy "MedMen.

Site Facts:

The building under review is a two-story cbs commercial structure. The structure was built originally as a one-story commercial structure circa 1946 and in the fifties it used to house a Harley Davidson store. In 1988, the Board of Adjustments approved a variance for the construction of a second floor with a front porch. In 1989, building permits were issued for alterations and renovations to the entire structure. On December 4, the City Commission approved an easement for the second floor front porch and the use of the rear area of an alleyway for keeping all a/c units. The building is located on the Entertainment Historic District Signage Corridor.

Guidelines Cited on Review:

- Entrances, Porches and Doors (pages 32-33), specifically guideline 8.
- New Construction (pages 38a 38q), specifically guidelines 1, 2 and 3.
- Commercial Storefronts (page 46), specifically second paragraph, and guideline 5.

• Business Advertisement and Signage (pages 49-50w), specifically guidelines 4-a 5.1, 4-b.

Staff Analysis

This staff report is for the review for renovations to the main façade of the building, including new storefronts and entry doors, a replacement of the second floor porch, removal of existing brick veneer, new Bahama shutters at the second floor, new neon sign, and new color scheme. The plan proposes the restitution of fixed storefronts with kick plates, transom windows, and a small alcove at the main entrance. Due to the state of decay of many structural elements of the front porch, the design proposes the reconstruction of many of its components and wood cladding over existing posts. On the second floor, the design proposes the removal of existing large fixed glass and replacement with Bahama shutters. Siding will replace the existing brick veneer.

The design also proposes the removal of all existing signs and the installation of one wall sign. This sign will have a maximum height of 30 inches on its capital letters and a width of 100 inches, and made with aluminum channel letters with red neon tubes inside of the letters. The building's front linear footage is 35'multiplied by 1.25 equals 43.75 square feet of permitted signage; the proposed wall sign will be 20.75 square feet, which will be less footage of the maximum allowed. The Entertainment Historic District Signage Corridor allows the use of neon signs.

Consistency with Guidelines

It is staff's opinion that the proposed design meets the cited guidelines. The new proposed treatment of the first floor front façade is more in keeping with the character and vocabulary found in traditional commercial buildings through the corridor.
