

Historic Architectural Review Commission

Staff Report for Item 4

To: Chairman Bryan Green and Historic Architectural Review Commission Members

From: Kathleen McDonald, MHP Historic Preservation Planner II

Meeting Date: January 29, 2019

November 20, 2019 Postponed

Applicant: Artibus Design

Application Number: H2019-0047

Address: #1226 South Street

Description of Work:

Construction of a two-story rear addition with covered rear porch housing two bedrooms, one bathroom, a kitchen, and a dining room. Construction of a front porch addition.

Site Facts:

The site under review is a lot containing a main residence and a rear accessory unit. The property is listed as historic, non-contributing to the Key West Historic District. Both existing buildings are listed on the property appraiser's website as two-story, frame vernacular structures that were built circa 1943.

Guidelines Cited on Review:

- Guidelines for Entrances, Porches, and Doors (pages 32-33), specifically guideline 8.
- Guidelines for Additions and Alterations on Contributing, Non-Contributing, and Non-Historic Buildings and Structures (pages 37a-37k), specifically guidelines 2, 5, 11, 13, 19, 22, 29.
- Guidelines for New Construction in the Historic District (pages 38a-38q), specifically guidelines 1, 11, 13 and 14.

Staff Analysis:

A Certificate of Appropriateness is under review for a two-story, 754 square foot rear addition to the main house at 1226 South Street. The addition will house two bedrooms, one bathroom, a kitchen, and a dining room, and it will have an attached covered porch. The addition is to be a wood frame structure with cement siding, aluminum impact windows and doors, and standing seam galvanized metal roofing. The new roof will be an over-framing over the existing roof, and it will require the removal of existing roof overhangs. The height of the addition will come in at approximately 22 feet 2 inches, which is 4 inches lower than the highest existing ridgeline of the historic house. The project will require demolitions of portions of the rear wall in order to accommodate the addition. The proposal also includes a covered front porch with new wood stairs, which will require the removal of a set of existing (likely non-historic) concrete steps at the front of the house.

Consistency with Cited Guidelines and SOIS:

It is staff's opinion that the proposed design is not consistent with many of the cited guidelines.

While the front porch addition meets the cited guideline for Entrances, Porches, and Doors, making the front façade more compatible with the streetscape, the two-story rear addition is inconsistent with several cited guidelines.

The addition calls for the removal of historic elements and material, and if the addition were to be removed in the future, the demolition of these historic elements will have compromised the integrity of the building form. While the addition is 4 inches lower than the original building height, the size and scale of the addition are out of proportion in relationship to the historic house and its surrounding context. As guideline 13 for Additions and Alterations reads, "New addition massing shall be similar or smaller than the massing found in the existing building and adjacent structures." All three immediately adjacent structures (two at the sides and one at the rear) are listed on the property appraiser's website as one-story residences. Although the use of a side gable roof form is an improvement on the previously proposed design, the proportions and massing of the new addition are still seen as inconsistent with those of the existing historic house.

This aerial photo shows the context of the houses surrounding 1226 South Street in terms of height.

The size, scale, and form of the proposed addition are not compatible with adjacent properties, and it is likely that the new addition will create a massing that overshadows the adjacent historic houses on each side of the property. All three immediately adjacent houses are one-story structures that were built in the 1930s/40s.

It is also staff's opinion that there are other opportunities for a more appropriately-scaled addition at the rear, making its currently proposed massing and scale unnecessary.

DATE AND PRINT NAME

DETAILED PROJECT DESCRIPTION OF DEMOLITION

Demo existing roof overhangs on first and second levels of the rear. Demo existing concrete porch. Demo parts of rear wall for new openings into addition.

CRITERIA FOR DEMOLITION OF CONTRIBUTING OR HISTORIC STRUCTURES:

Before any Certificate of Appropriateness may be issued for a demolition request, the Historic Architectural Review Commission must find that the following requirements are met (please review and comment on each criterion that applies);

(1) If the subject of the application is a contributing or historic building or structure, then it should not be demolished unless its condition is irrevocably compromised by extreme deterioration or it does not meet any of the following criteria:

(a) The existing condition of the building or structure is irrevocably compromised by extreme deterioration.

Not applicable

(2) Or explain how the building or structure meets the criteria below:

(a) Embodies no distinctive characteristics of a type, period, or method of construction of aesthetic or historic significance in the city and is not a significant and distinguishable building entity whose components may lack individual distinction.

No distinctive characteristics of the type, period, or method of construction is reprisented in roof overhangs of the rear nor in existing front concrete porch.

Page 1 of 3

Nothing in this application is intended to alter the authority of the Building Official to condemn for demolition dangerous buildings, as provided in Section 102-218 of the Land Development Regulations and Chapter 14 of the Code of Ordinances.

(b) Is not specifically associated with events that have made a significant contribution to local, state, or national history.

Not associated with events of local, state nor national history.

(c) Has no significant character, interest, or value as part fo the development, heritage, or cultural characteristics of the city, state or nation, and is not associated with the life of a person significant in the past.

No significatn character, interest, or value is affected by the proposed demolition.

(d) Is not the site of a historic event with significant effect upon society.

Property is not the site of a historic event.

(e) Does not exemplify the cultural, political, economic, social, or historic heritage of the city.

No cultural, political, economic, social, or historic heritage of the city is affected by the demolition.

(f) Does not portray the environment in an era of history characterized by a distinctive architectural style.

No distinctive architectural style is represented in rear roof overhangs nor in front porch.

(g) If a part of or related to a square, park, or other distinctive area, nevertheless should not be developed or preserved according to a plan based on the area's historic, cultural, natural, or architectural motif.

Not part of the above.

(h) Does not have a unique location or singular physical characteristic which represents an established and familiar visual feature of its neighborhood or of the city, and does not exemplify the best remaining architectural type in a neighborhood.

Page 2 of 3

Nothing in this application is intended to alter the authority of the Building Official to condemn for demolition dangerous buildings, as provided in Section 102-218 of the Land Development Regulations and Chapter 14 of the Code of Ordinances.

Not a unique location.

(i) Has not yielded, and is not likely to yield, information important in history.

No historic information is yielded.

CRITERIA FOR DEMOLITION OF NON-CONTRIBUTING OR NON-HISTORIC STRUCTURES:

The following criteria will also be reviewed by the Historic Architectural Review Commission for proposed demolitions. The Commission shall not issue a Certificate of Appropriateness that would result in the following conditions (please review and comment on each criterion that applies);

(1) Removing buildings or structures that are important in defining the overall historic character of a district or neighborhood so that the character is diminished.

Historic character of the district and neighborhood will not be affected by the proposed demolition.

(2) Removing historic buildings or structures and thus destroying the historic relationship between buildings or structures and open space.

The application does not request the demolition of the historic building - only front concrete porch and parts of rear roof overhangs and rear walls. Historic landscape will not be affected by the proposed demolition activities

(3) Removing an historic building or structure in a complex; or removing a building facade; or removing a significant later addition that is important in defining the historic character of a site or the surrounding district or neighborhood.

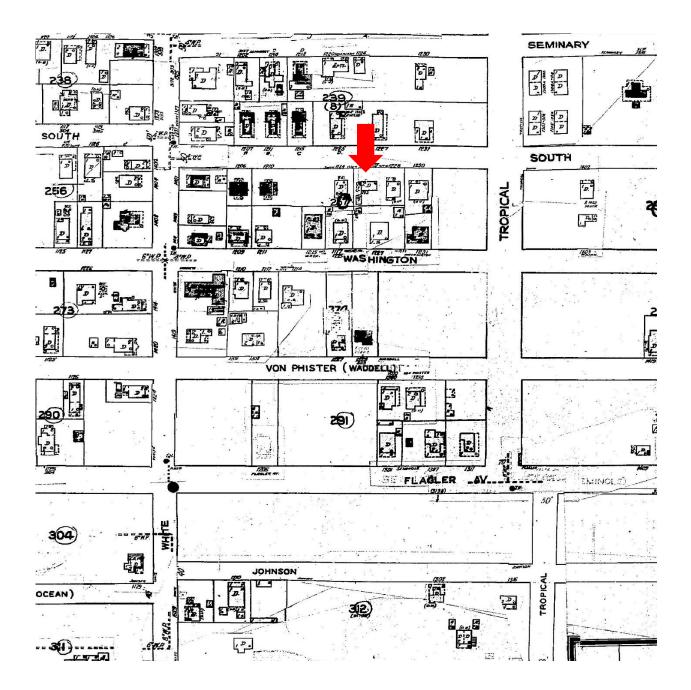

Not applicable

(4) Removing buildings or structures that would otherwise qualify as contributing.

Not applicable
