To whom it may concern,  
I have pushed for the removal of the Poliana tree at the corner of Schison St. and Thompson St. because the tree is completely infested with Subterranean Termites and I am very concerned that the termites will spread to the properties I own in the neighborhood and the many trees I have planted and nurtured on those properties. If someone could put up the money to get the termites out of the tree that would be great. Subterranean termites constitute the biggest non human threat we have to

Key West's tree population. They are also capable of doing tens of thousands of dollars worth of damage to any wood structure in a very short time.
