Generally, there has been no attempt to divide the sections into work performed by the various building trades, work by separate subcontractors, or work required for separate facilities in the project.

B. DOCUMENT INTERPRETATION

The separate sections contained within these Contract Documents are intended to be mutually cooperative and to provide all details reasonably required for the execution of the proposed work.

Should there be any doubt as to the meaning or intent of said Contract Documents, the Bidder should request of the CITY, in writing (at least ten (10) calendar days prior to bid opening) an interpretation thereof. Any interpretation or change in said Contract Documents will be made only in writing in the form of Addenda to the documents which will be available to all registered holders of Contract Documents via Demand star. Bidders shall submit with their Bids, or indicate receipt of, all Addenda. The CITY will not be responsible for any other explanation or interpretations of said Documents.

It shall be the Bidder's obligation to verify for himself and to his complete satisfaction all information concerning site and subsurface conditions.

The CITY will make available to prospective Bidders upon request and at the office of the ENGINEER, prior to bid opening, any information that he may have as to subsurface conditions and surface topography at the worksite.

12. AWARD OF CONTRACT

Within 45 calendar days after the opening of Bids, the CITY will accept one of the Bids or will act in accordance with the following paragraphs. The acceptance of the Bid will be by written notice of award, mailed to the office designated in the Bid, or delivered to the Bidder's representative. The CITY reserves the right to accept or reject any or all Bids, and to waive any informalities and irregularities in said Bids.

13. BASIS OF AWARD

The award will be made by the Owner on the basis of the BID (Base Bid + Owner Selected Bid Alternates) from the lowest, responsive, responsible BIDDER which, in the Owner's sole and absolute judgment will best serve the interest of the Owner.

14. EXECUTION OF CONTRACT

The successful Bidder shall, within fourteen (14) calendar days after receiving Notice of Award, sign and deliver to the CITY an original Contract and two (2) copies in the form hereto attached, together with the insurance certificate examples of the bonds as required in the Contract Documents and evidence of holding required licenses and certificates. B. POWER-OF-ATTORNEY

The Attorney-in-Fact (Resident Agent) who executes this Performance and Payment Bond in behalf of the Surety must attach a notarized copy of his power-of-attorney as evidence of his authority to bind the Surety on the date of execution of the bond. All Contracts, Performance and Payment Bonds, and respective powers-of-attorney will have the same date.

16. FAILURE TO EXECUTE CONTRACT AND FURNISH BID BOND

The Bidder who has a Contract awarded to him and who fails to promptly and properly execute the Contract shall forfeit the bid security that accompanied his bid, and the bid security shall be retained as liquidated damages by the CITY, and it is agreed that this said sum is a fair estimate of the amount of damages the CITY will sustain in case the Bidder fails to enter into a Contract. Bid security deposited in the form of cash, a certified check, or cashier's check shall be subject to the same requirement as a Bid Bond.

THE CITY OF KEY WEST

Post Office Box 1409 Key West, FL 33041-1409 (305) 809-3883

ADDENDUM NO. 1

Mole Pier Boat Wash Facility ITB#21-012

This addendum is issued as supplemental information to the bid package for clarification of certain matters of both a general and a technical nature. The referenced Invitation to Bid (ITB) package is hereby amended as follows:

To date, there have been two questions regarding the pre-bid meeting for this project:

1. Is the pre-bid meeting mandatory?

Response: The pre-bid meeting is not mandatory

2. Will there be an escorted site visit after the meeting at the City Manager's Conference Room?

Response: As the pre-bid meeting is not mandatory, a site visit will not be conducted, as it would not provide all bidders with the same information. If pictures or details of a particular part of the site are needed, please send requests to Ian McDowell, E.I., at cimcdowell@cityofkeywest-fl.gov. Photos of the site are subject to Navy approval and are not guaranteed.

All Bidders shall acknowledge receipt and acceptance of this Addendum No. 4 with Attachment by submitting the addendum with their proposal. Proposals submitted without acknowledgement or without this Addendum may be considered non-responsive.

ADDENDUM NO. 2

Mole Pier Boat Wash Facility ITB#21-012

This addendum is issued as supplemental information to the bid package for clarification of certain matters of both a general and a technical nature. The referenced Invitation to Bid (ITB) package is hereby amended as follows:

RFI:

1. Question:

The electrical panel schedule indicates that there are 2 sump pumps. The sump pumps are not shown on any drawings. Please provide their location and how they are started and stopped.

Response:

Please see sheet A1 for location of sump pumps. Cut sheets for the pumps are contained in the bid documents package (pages 146-150). Pumps utilize float controls as shown.

2. Question:

In the water separator pit is a diverter valve which diverts the water to the city sewer line when the washdown units are being used. There is nothing shown as to how this gets connected to the washdown units and if the washdown units have a set of contacts integral to the units for this operation.

Response: Correct. A diagram is not provided. The contractor will provide an electrical submittal that demonstrates the pumps will be powered such that the diverter valve will drain to the sewer connection during operation, as noted in the bid documents.

3. Question:

There is a note in Drawing EP1 regarding the new electric meter for the washdown facility being connected to the existing fuel stand meter. There is no information on what is required for this connection. Also, it is assumed that the fuel stand meter is located on the existing rack adjacent to the location of the new meter. Is this correct?

Response: The existing meter is on the existing rack adjacent to the proposed rack. Further information about the meter connection requires coordination that may not be possible in the time available, as this question was asked after the deadline. If new information becomes available, it will be uploaded in another addendum.

4. Question:

The specs indicate that there is to be lighting at the corners of the washdown pad. The drawings indicate on one pole light. How many pole lights are required?

Response: The drawings are correct.

5. Question:

The cut sheets in the specs indicate a N3R panel. The drawings indicate N4X. Which is correct?

Response: N4X per the drawings is correct.

6. Question:

The drawings indicate that the electrical equipment is to be N4X. Is this stainless or something else? If stainless, is it 304, 316, or other?

Response: N4X is required but no sub-type of N4X (aluminum, 304, 316, etc.) is prescribed.

Prior to final award, the winning bidder shall acknowledge receipt and acceptance of all Addendums. Proposals submitted without acknowledgement may be considered non-responsive and the award will be provided to the next lowest responsive bidder that can acknowledge receipt of all Addendums.

Project Summary

The proposed project consists of providing all site work, materials, equipment, and labor necessary for the construction of a boat wash facility at the Navy Mole Pier. The facility consists of a double-bay 20'x 32' concrete pad with two #57 rock driveway areas on either side. The wash area will include a floor drain, underground electrical and plumbing, lighting, oil-water separator, two shower poles and two Hydro Blaster (or equal) pressure washers. The floor drain will first gravity flow through an oil water separator and then through nearby sanitary sewer during use or to an adjacent detention pond when not in use. A pump station will be installed for connection to the nearby force main.

There is one bid alternate that consists of providing a steel-framed canopy with a vinyl covering over the concrete pad.
