

**Historic Architectural Review Commission
Staff Report for Item 7**

To: Chairman Bryan Green and Historic Architectural Review
Commission Members

From: Kelly Perkins, MHP
HARC Assistant Planner

Meeting Date: November 28, 2017

Applicant: William Shepler

Application Number: H17-03-0028

Address: #922 Thomas Street

Description of Work:

New one story frame addition.

Site Facts:

The one-story house at 922 Thomas Street is listed as a contributing resource in the survey, and was constructed in 1938 according to the survey. The building does not appear on the 1962 Sanborn map, but in the c.1965 photograph, it is clear that the building is not a new structure, as there are dirt stains on the metal shingled roof and the eaves show some wear and tear. It is most likely that the building was relocated to that site. The building has a front porch that has been enclosed.

This project came in front of the HARC Commission in the August 2017 and was postponed for redesign.

Guidelines Cited in Review:

Secretary of the Interior's Standards for Rehabilitation (pages 16-17), specifically Standards 2, 3, 4, 5, 6, 9, and 10.

HARC Guidelines for Additions and Alterations (pages 37a-37k), specifically guidelines 5, 6, 11, 12, 13, 14, 19, 22, 23, 29, 30, and 31.

Preservation Brief 14: New Exterior Additions to Historic Buildings: Preservation Concerns

Staff Analysis

This Certificate of Appropriateness proposes some renovations to the contributing house, including repair/replacement of existing wood siding as required, new 2/2 wood windows on the sides of the structure.

A new addition will be connected onto the rear. The addition will have a height of 16 feet, 3 inches, approximately two feet shorter than the main house (18 feet, 1 inch). The new addition is connected through a smaller connector. The front of the new addition will have a gable front roof, which will differentiate it from the main structure. The new addition will have board and batten siding and aluminum impact windows and v-crimp roofing.

Consistency with Guidelines

1. The proposed addition will be shorter than the main house by approximately 2 feet, and will double the footprint of the existing building. The revised design has shifted the roofline of the side addition to a gable and reduced the massing of the addition so that it does not compete with the main structure. The side addition will be set back 52 feet from the front property line, so it will be less visible from the street.

It is staff's opinion that the revised design is consistent with the guidelines for additions and alterations.

BACKYARD OF SITE

A single-story white house with a weathered, grey metal roof. The house has dark green shutters on the windows and a light green door. A large, mature tree with thick branches is situated in front of the house, partially obscuring it. A chain-link fence runs along the front of the property. In front of the house, there is a small table and chairs, and a motorcycle is parked on the sidewalk.

A single-story yellow house with a white porch and blue shutters. The house has a silver metal roof with two satellite dishes. A white picket fence runs along the front of the property. A green trash bin and a bicycle are visible behind the fence. A dark-colored car is partially visible on the right side of the image.
