To whom it may concern,

I wish to express my opposition to this Resolution - especially the placement of it on the consent agenda. I would appreciate the opportunity to gather facts and understand how this change may directly affect my home and those of my immediate neighbors. To my knowledge, there was no outreach to our neighborhood for input prior to the presentment of this resolution.

I would like to suggest an impact study be presented to the neighborhood including a traffic, safety, noise & environmental studies prior to any decisions being made.

Regards,
Tom Fortin
