Clement Taylor Park Replacement of Existing Seawall
Letter of Referral - Live Flyer, Inc.

Dear Mr. Ward,

Live Flyer, Inc. displayed high-quality work and timely completion on a recent work project at the City's Clement Taylor Park, while performing the following work: structures demolition, aluminum bulkhead wall sheet pile driving, tiebacks, deadmen and beach sand fill for the seawall replacement. It is our pleasure to recommend Live Flyer, Inc. as a turnkey marine contracting and environmental firm.

Located along the Choctawhatchee Bay, Clement Taylor Park historically demonstrates the presence of artifacts of interest for preservation and analysis. As a known historical site for native Indian materials, high level coordination was established and maintained by the contractor with the onsite archeologist consultant, to evaluate proposed excavations.

During the sea wall replacement, Live Flyer routinely reported potential finds to the City's archeologist and suspended excavation as needed to assess artifacts of interest. Alternative locations of available production were identified, thereby mitigating artifact discovery delays. Live Flyer, Inc. achieved all the City's goals with excellence, and we look forward to future contracts.

To Whom It May Concern:

The Jewell Cove Mangrove Pod Project was a pilot project successfully constructed by Live Flyer, Inc. The company owner, John Ward placed a sectional barge along the existing seawall with a crane. He acquired the limestone rock and arranged the trucking and loading of the rock onto the barge. He then pushed the barge around the bridge with a rigid inflatable boat. Using a hydraulically controlled excavator with a thumb, he placed the limerock revetment in five discrete piles to provide additional oyster and mangrove habitat in the Lake Worth Lagoon. The five pods were planted with five mangroves in each pod.

The planting of large mangroves into rock was a novel concept and John and his crew were enthusiastic and helpful in coming up with a new approach to the creation of additional wetland habitat.

ERM would like to thank John for his timely performance in the construction of the living shoreline project.

Sincerely,

RE: Design / Build Holly Hill Pedestrian Bridge Replacement

Dear Mr. Ward,

It is with great pleasure that this referral letter is published on behalf of Live Flyer, Inc. for their high-level performance in; designing, permitting, procuring and constructing the Holly Hill Pedestrian Bridge. Having been selected as the low cost producer and enjoying the highest technical score in the City's Design / Build Request for Proposal solicitation, Live Flyer, Inc. was selected over several firms.

From the onset, your firm established and maintained excellent communications and coordination, so that the City was always aware of the current status of any given component of the work or potential risk factor. One-to-one scale mock-ups of the proposed work were fabricated for the City to ensure program objectives were consistently achieved and adjustments incorporated as needed to accommodate any concern raised by the City.

As the worst of the virus pandemic impacts occurred during the project permitting phase, the U.S. Army Corps of Engineer's compliance group was particularly affected, causing an extensive permit review delay. However, Live Flyer's persistence ensured that requisite permits were garnered and accelerated field work production, to mitigate the impact of the virus and successfully complete the work on time and within budget.

RE: Letter of Recommendation

To whom it may concern,

As John Ward has successfully demonstrated his knowledge, skill and desire to consistently achieve all project goals in the construction of several marine projects within Port Canaveral, it is my pleasure to recommend him for this classification of work.

His enthusiastic and optimistic attitude are contagious, which serve to motivate and energize project staff. Routinely, John has used resourcefulness and a "can do" attitude to overcome challenges and solve problems with creative planning and persistence.

I would not hesitate to have John on any of my marine projects. If you would like to further discuss his record and qualifications please contact me.

Thank you,

RE: Referral Letter (Proven Past Performance)

Regarding the Bulkhead Rehabilitation of the North Wharf in Castries, Saint Lucia BWI, John Ward successfully planned, procured and executed urgent soil anchor stabilization of the existing quay wall suffering significant deflection from plan location and thereby threatening, not just mooring of cruise vessels, but the retail tenants lining the wharf.

Having restrained the existing quay wall, constructed in the colonial era by the British, Mr. Ward furnished and installed hundreds of steel sheet piling, more than thirty meters in length, to establish a consistent and unyielding berthing line tied back to cast in place deadman and concrete encapsulation of the entire splash zone to enhance useful life.

The Saint Lucia Air and Sea Ports Authority (SLASPA) is pleased to report that all project goals were achieved; personnel safety, quality of the work performed, completion cost/schedule, while maintaining frequent vessel berthings within the active construction area. Therefore, we highly recommend Mr. Ward and please contact us as needed for any more clarification required.

Sincerely,

To Whom It May Concern:

Since 2004 I have had the pleasure of working with John Ward on marine construction projects at Port Canaveral. These projects included concrete and steel pile driving, bulkhead walls, monopile and multi-pile mooring dolphins, dredging, grouted tie-back anchors, and articulated grouted scour protection mats.

Throughout these projects, John demonstrated a thorough knowledge of marine construction, and I always found that the construction workers under John conducted their work in a professional manner. When unexpected challenges arose, John responded to each with timely solutions and a "can do" attitude.

It is without hesitation that I submit this letter of recommendation for John Ward. John's extensive experience, professionalism, and knowledge will allow him to build a highly competent marine construction company. I look forward to working with John again on future projects. If you require any further information, please do not hesitate to contact me.

Sincerely,

Dear Sir or Madame,

Having enjoyed working with Mr. John Ward in the design and construction of marine deep foundation systems throughout Florida and the Caribbean since 1999, I highly recommend Mr. Ward as having extensive knowledge and skill in heavy civil marine construction.

John's ability to consistently overcome difficult and varied field conditions, as well as unexpected soil strata has been routinely demonstrated. Additionally, his resilience to create alternative solutions in order to achieve all project goals has been consistent.

Therefore, please consider this document my professional support and recommendation for John Ward within the field of marine construction. We look forward to working together in the future and please contact me for more information as needed.
