Photo taken looking South

Top Photo taken looking West.
Bottom taken from second story balcony.

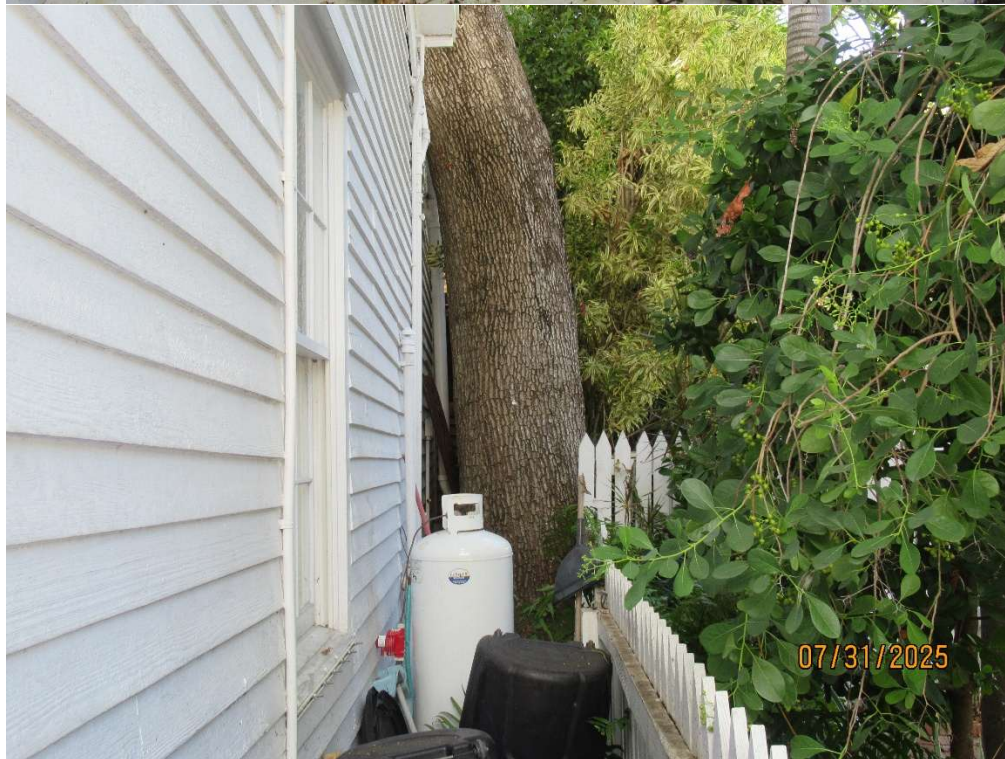

Both photos taken from second story balcony.

Despite the large canopy it is surprisingly hard to get a good look at it.

The tree is basically touching the edge of this roof.

Top photo shows where the tree was cut in a manner to accommodate the roof. This is not good for the tree although it appears to be fine.
The base of the tree grows tight between the building and the fence.

Diameter: 29"

Condition: 60% (the tree is in fair health; the canopy has some areas of die back)

Location: 40% (growing inches from building and most of tree hangs over the building)

Species: 100% (on City of KW protected tree list)

Tree Value: 66.6%

Required Mitigation: 19.3 caliper inches

RECOMMENDATION/NOTES: The tree has received multiple heavy pruning over the years.
