### CRS "What-If" Table

FEMA's "What-If" table shows values associated with the different CRS class ratings. Currently Key West has a Class 10 rating, no discount, which is why that class isn't shown. The lower the class rating, the greater the annual discount.

"Total" column shows the overall value of each class by policy and overall community.

"SFHA" column shows the values for policy holders within all designated flood zones.

"X-STD..." column shows values for policy holders in the less likely to flood X-zones.

"PRP" column shows no discount as these are already discounted preferred policies.
