Subject: Two way traffic on North Roosevelt Blvd

To: csmith@keywestcity.com

Hi I would like this read at the city meeting tonight.

I am one of the residents that are suffering financially from the construction and used to think that the road should be made two way, however I now after thinking about the safety and logistics of driving on this road without a turn lane would be extremely dangerous and frustrating. For the most part we locals have learned to deal with the construction as best as we can, I do not think changing the road to two way traffic is going to help us financially, to the contrary, I think it just going to make it worse. The back up of cars entering the island onto a one lane inbound, with no turn lanes is going to be absolutely crazy, and when the rain floods the road we are going to have a very dangerous situation on our hands. People will avoid this road even more and that will not benefit any of the business, please leave it as two lanes inbound until a turning lane can be instituted which would be the safest and most practical way to introduce single opposing traffic lanes.

Thanking you.
