Requested for the following element(s):

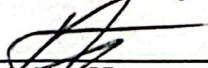

☐ Design Speed ☐ Lane Width ☐ Shoulder Width ☐ Cross Slope
☐ Design Loading Structural Capacity ☐ Vertical Clearance ☐ Maximum Grade ☐ Stopping Sight Distance
☐ Superelevation ☐ Horizontal Curve Radius ☒ Other CAF

PROJECT DESCRIPTION

As part of an ongoing project, the City of Key West is installing a newly designed Welcome sign on the north side (westbound) of SR A1A near MM 4. This solid engineered structure, inspired by the original sign, will sit behind the guardrail on a concrete slab for improved safety and durability. A matching Thank You sign will be placed on the opposite side, south side (eastbound) of SR A1A near MM 4, to acknowledge departing visitors. The existing sidewalk in this area will be restored, to accommodate the new sign. The City is also coordinating with the Navy to confirm setbacks and ensure proper placement.

Please refer to the attached drawing and memorandum for more details.
