Subject: Fwd: Made an adjustment as nothing about loading zone in resolution

Cheri, can you confirm you received this please? thank you!

Resolution 15-263

Commissioners and City Manager, I apologize for not speaking in person but I have to work.

I am asking you to rescind resolution 15-263

I have key west first legal rum on 105 simonton st and now also 107 simonton st. Parking here has become a big problem with congestion and also no enforcement of yellow lines. It is hard for traffic to navigate and pedestrians to cross.. Also as I understand from the parking manager it will now be parking and a loading zone in front of my business(which I did not see a vote for loading zone in the resolution)

I just signed a new lease in March for 10 years with 5 year option on both units of building(yes even after a hurricane) Had I have been aware of a loading zone going in front of us I would have not done so. Tractor trailers will block us completely from 7 am till 2 pm daily. That is our prime hours. I understand that in 2015 when this vote was taken things were different, there was a parking lot there and now replaced by houses. A new parking place was leased from city though and paid parking on green was also added which makes up for the loss of lot. Please rescind this vote and look into better ways that will better benefit the businesses in the area. I know the other businesses feel the same way on the block. Please help us to grow in business and not be blocked off. Thank you for your time.
