FORD FLEET

North American Fleet, Lease & Remarketing Operations

Some features discussed may be optional. Vehicles shown may contain optional or modifier-installed equipment. Features shown may be offered only in combination with other options or subject to additional ordering requirements or limitations. Dimensions shown may vary due to optional features and/or production variability. Information in this brochure was developed from Order Guides as of March 2013. Following publication of this catalog, certain changes in standard equipment, options and the like, or product delays may have occurred which would not be included in these pages. For more information on AdvanceTrac® with or without RSC™ visit fleet.ford.com. Remember that even advanced technology cannot overcome the laws of physics. It's always possible to lose control of a vehicle due to inappropriate driver input for the conditions. • Always wear your safety belt, secure children in the rear seat and follow airbag warning label instructions. • SYNC: Driving while distracted can result in loss of vehicle control. Only use mobile phones and other devices, even with voice commands, when it is safe to do so. Not all features are compatible with all phones. • For more information, visit fleet.ford.com. • Ford Motor Company reserves the right to change product specifications at any time without incurring obligations. All comparisons based on 2013 competitive models.

Purpose-built wheels, tires and brakes.

GO HEAVY-DUTY IN THE LINE OF DUTY

Heavy-duty wheels are teamed with exclusive police-purposed tires. Hefty 18" steel wheels are designed to withstand the punishment of daily duty no matter where the trail leads. The 5-spoke design lets the brakes breathe freely and stay cool. Unique Ford Police Interceptor® tires are constructed to maximize grip, handling, roll, rigidity and tread wear. To keep things rolling, the spare is not only full size, it's equipped with a Tire Pressure Monitoring System (TPMS) sensor.

Heavy-duty anti-lock disc brakes contribute to extreme high performance. Police Interceptors don't just need to go fast, they must halt rapidly – under control. Developed in association with the Los Angeles County Sheriff's Department and Michigan State Police, this system strikes an ideal balance between stopping power and long wear life. Boasting an increased swept area versus the CVPI, the unique inverted hat-vented rotors are paired with unique calipers for high thermal capacity.

Heavy-duty EPAS and suspensions respond in the name of control, capability and comfort. Electric power-assisted steering adjusts to vehicle speed, as well as crowned roads and crosswinds. For smooth, predictable, high-speed handling at every turn, the front and multilink rear suspensions are fully independent – each one also incorporates a brawny stabilizer bar to combat body lean. Helical coil springs and stiffened, gas-pressurized hydraulic shocks are made for the rigors of police work. Premium hubs and bearings are extra large for extra-long durability. Standard on the Sedan and available for the Utility, the unique Ford designed underbody deflector plate helps deflect road debris and guard against scrapes – aspects crucial for the integrity of the oil pan. The plate is meticulously shaped to facilitate ease of oil-filter changes.

Heavy-duty cooling system regulates extreme heat. The high-volume radiator, engine oil cooler and transmission fluid cooler – working with the police-calibrated fan and mesh grille – optimize operation in times of pursuit or periods of idling.

Heavy-duty 220-amp alternator meets demands. Ample support for radar, lights, radios, cameras, computers and more.
