# ALL-PURPOSE 13.3" RUGGED NOTEBOOK.

Our most popular model, the B300 ultra rugged notebook has been called "The Best Rugged Laptop on the Market".<sup>1</sup> With state-of-the-art processors, incredible battery life, 4G LTE wireless and one of the brightest displays in the industry, the 5th generation B300 is the go-to ruggedized notebook for users that work in some of the most extreme conditions on the planet.

### Powerful 4th Gen Intel Core Processors.

The new B300 features the latest 4th gen Intel Core i5 or Intel Core i7 processor. Designed for speed and efficiency, the new processors (known as the Haswell platform) clock in at up to 3.0 GHz with Turbo Boost speeds up to 3.7 GHz giving the B300 the power needed for the most demanding tasks from intricate mapping to live video processing and license plate recognition. And, Hyper-Threading technology, designed to enhance performance by allowing each processor core to handle multiple tasks simultaneously, is included in every B300.

## Amazing Graphics.

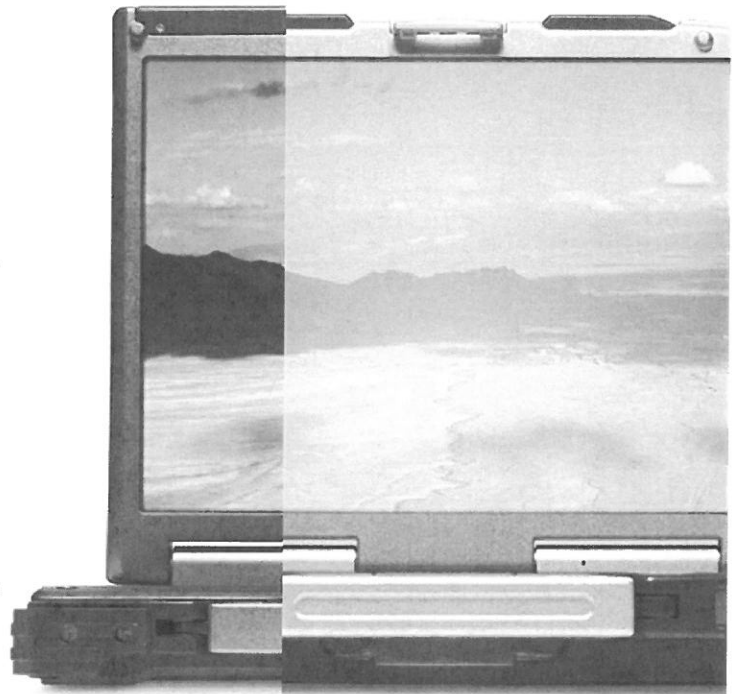

New Intel HD Graphics 4600 delivers amazing graphics performance - ideal for mapping, video applications and multiple monitors. Integrated on a single chip and incorporating advanced 3D processing, the advanced GPU increases the B300 graphic performance by 34% over the previous generation.<sup>2</sup>

## Sunlight Readable Display.

Every B300 features an advanced 1400 NITs QuadraClear® display. Our QuadraClear solution combines proprietary technologies for both screen brightness and anti-reflectivity to reduce the sunlight's reflectivity and provides an effective contrast rate seven times better than other displays, while still maintaining the battery life you need in the field.

The QuadraClear display is powered by LEDs that provide an energy efficient display that is mercury-free, durable and consistent in brightness over time. With an output rating up to 1400 NITs of brightness, it's no wonder Getac's QuadraClear display has been called a "Stunning Feature".<sup>3</sup>

CLICK AND DRAG.

**Stay Productive Longer.**

The Getac B300 has always featured the longest battery life in the industry. Designed to be even more power efficient, the latest B300 ultra rugged notebook offers a truly remarkable battery life of up to 15 hours on a single charge. With the dual battery configuration, the B300 has a battery life of up to 30 hours. We designed the B300 ultra rugged notebook so that you can do your job, wherever that is, for the full shift or deployment.

of battery life

### Blazing Fast Wireless.

With new multi-carrier 4G LTE, you can easily switch carriers without changing hardware.<sup>4</sup> The B300 also now supports the next generation 802.11ac WiFi for up to three times faster throughput vs. the previous generation.

## Built to Survive™.

Only Getac manufactures rugged laptop computers down to the chassis. Built from high quality magnesium alloy, the B300 features four main casings specifically engineered to protect the computer against drops, shocks, spills, vibration and more. The fanless, sealed design of the B300 ruggedized laptop protects it against dust and liquid. The B300 has been independently tested and certified to MIL-STD-810G, IP65 and MIL-STD-461F standards.

### Core Manufacturer.

Getac is one of the largest manufacturers of magnesium alloy computer chassis in the world. Our expertise in manufacturing the housing itself provides key insight into how to make them stronger.

### Fanless & Sealed.

Using a sophisticated copper pipe cooling system, we are able to efficiently dissipate the heat without the need for internal fans. This fanless design allows the B300 ultra rugged notebook to employ sealed design protecting against dust and water.

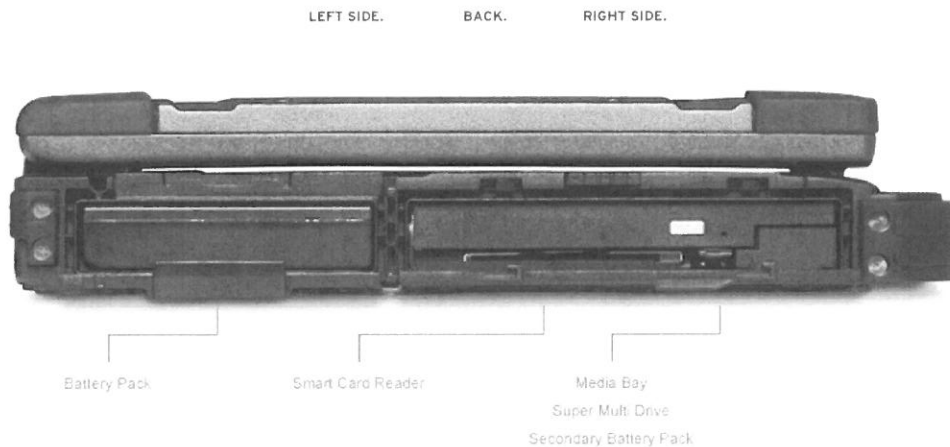

### Low Temperature.

Being able to work in any environment is critical, even freezing cold conditions. By insulating the storage drive inside a heating blanket, we are able to boot the computer without risk to the drive or it's data in environments as cold as -29C/-20F. The low-temperature feature comes standard with every B300.

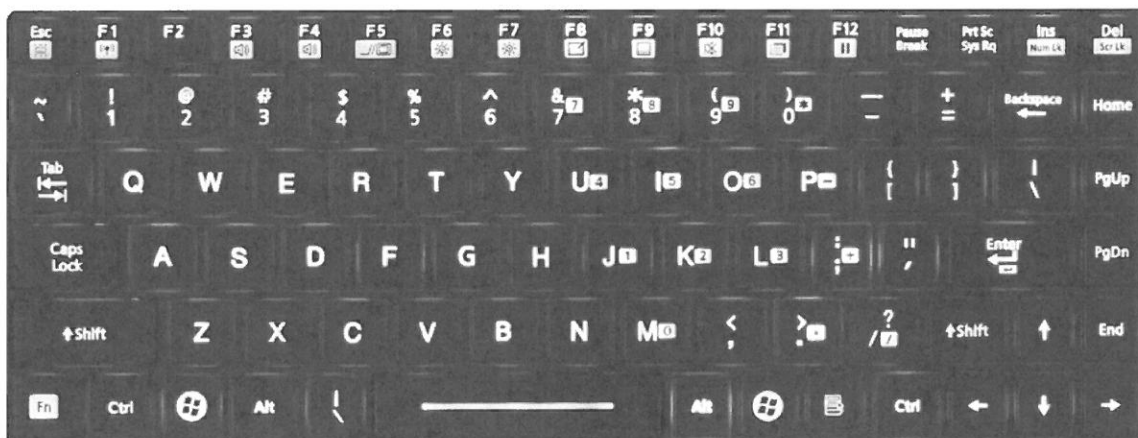

## Easy Access to Protected Connections and Ports.

With two USB 3.0/eSATA combo ports, a separate third USB 3.0 port, two serial ports, an Ethernet port, a VGA port and an IEEE1394a port among others, the B300 ultra rugged notebook has plenty of ports to connect the peripherals that you use.

## Backlit Keyboard.

Every B300 ultra rugged notebook comes standard with a red backlight allowing you to type in the dimmest conditions without silhouetting yourself. Additionally, the red glow reduces eye strain compared to other backlights reducing fatigue. The B300's island style independent keys provide an unmatched premium feel and increased durability.

## Vehicle Ready.

Mounting a B300 in a vehicle for public safety or field service has never been easier. We've worked with a leading dock manufacturer to provide an ideal solution for you. The new B300 dock is designed to maximize the space available inside the vehicle by using a small docking station footprint. By connecting the antennas, peripherals and power to the docking station, you can quickly dock the computer in and out as needed during your shift.

## Industry's Best 5-Year Bumper-to-Bumper Warranty.

The B300 ultra rugged notebook comes standard with the industry's best 5-Year bumper-to-bumper warranty. It's the peace-of-mind protection of knowing you're covered.<sup>5</sup>

### Covers Everything.

Getac's warranty includes all major system components.

### Accidental Damage.

Getac's warranty includes coverage for accidental acts and exposure to environmental conditions.

### Genuine Parts.

Getac's warranty repairs are carried out by expert technicians using Getac original production parts.

1) TopTenReviews.com

2) Testing conducted by Getac in September 2013. Performance tests are conducted using specific computer systems and reflect the approximate performance of the B300 ultra rugged notebook at the time of testing.

3) RuggedPCReview.com

4) Data plan required. Cellular data is available in the US on Verizon Wireless and AT&T networks. LTE is available in select markets. Check with your carrier for details. 4G LTE configuration must be ordered at time of purchase.

5) For full details of the warranty protection, see the terms and conditions.
