RE: Exercise Contractual Option to Renew for Real Time  
Passenger Information (RPTI) System

Dear Mr. Welch,

The City of Key West appreciates the month to month service since the original contract's term and continued availability of the original contractual option to renew for a period of five years starting on the expiration date in November of 2018. This leaves a remaining period that will expire on November 30, 2023.

The City of Key West would like to exercise this option. The extension delay was prompted by service and technology issues raised by the City of Key West in November of 2018. Since that time, GMV Syncromatics has corrected the issues, enhanced certain services, and now provides better automated vehicle locator service.

This extension allows for mutually agreed upon price increases. A 2% increase on December 1st of each year increase adjustment is equitable. This increase will start on December 1, 2021.

Sincerely,

Gregory W. Veliz  
City Manager  
City of Key West
