TAKE NOTICE that the City of Key West Code Compliance Division has requested the City of Key West Special Magistrate to conduct an administrative hearing regarding code violation(s) reported to you by **NOTICE OF CODE VIOLATION** concerning the above noted subject address.

You were noticed that your property is in violation of the City of Key West Code of Ordinances for the following reason(s):

Count 1: Sec. 14-37 Building permits; professional plans; display of permits

(a) Building permit required; display. Building permits shall be procured from the building official before performance of any work or construction of any character, whether permanent or temporary. Within 48 hours after it is issued, the applicant must cause the permit to be posted and displayed at the work site so that it is readily visible from an adjacent public street throughout the term of the work. No work shall be performed unless a proper permit is so posted.

(b) Professional plans required. Professional plans shall be required as follows:

(1) Plans for work requiring a building permit shall be submitted in duplicate or in triplicate if required by the state to the building official and shall be prepared by, and bear the seal of, an architect or structural engineer duly registered in the state, except if the work is by the owner-occupant upon a one- or two-family residence, and the work is cosmetic, nonstructural repair, alteration or addition.

(2) Notwithstanding subsection (b)(1) of this section, plans for work which requires a building permit and which involves mechanical, plumbing or electrical repairs, alterations or additions shall be prepared by and shall bear the impress seal of an engineer duly registered in the state, as reasonably required in the interest of health and safety by the building official.

(c) Work done by owner-occupant. A building permit may be issued to the owner-occupant of real property to construct or cause to be constructed, while the owner-occupant is present on the site, a one- or two-family residential structure for his own use and not offered for sale or lease or to repair the structure without being required to be a qualified contractor himself in accordance

with this article and without being required to employ a licensed contractor. The owner-occupant may not construct or repair or cause the construction or repair of more than one such structure during any one-year period.

To wit: I received a complaint on this date that the subject property has a converted shed and that pvc pipe is being laid to attach to the existing sewer line by Robert's Plumbing without the benefit of required building permits.

Count 2: Certificate of occupancy – Required

No land or building or part thereof erected or altered in its use or structure after the effective date of the ordinance from which this section derives shall be used until the chief building official shall have issued a certificate of occupancy stating that such land, building, or part thereof and the proposed use thereof are found to be in conformity with the provisions of the land development regulations. Development permits shall also be required as provided in section 90-356. It shall be the duty of the chief building official to make a final inspection of the building or premises and to issue a certificate of occupancy if the land, building or part thereof and the proposed use thereof are found to conform with the land development regulations or, if such certificate is refused, to state such refusal in writing together with the cause. Failure to obtain a certificate of occupancy shall be deemed a violation of the land development regulations.

To wit: I conducted a site visit on this date and observed a shed which has been converted into a unit which is being rented by the property owner to the current tenant. No certificate of occupancy on file for this unit.

Count 3: Sec. 122-370 Dimensional requirements - MDR

The dimensional requirements in the medium density residential district (MDR) are as follows:

- (1) Maximum density: 16 dwelling units per acre (16 du/acre).
- (2) Maximum floor area ratio: not applicable.
- (3) Maximum height: 35 feet.
- (4) Maximum lot coverage:
 - a. Maximum building coverage:
 1. Single-family and two-family: 35 percent.
 2. Multiple-family and community facilities: 40 percent.
 - b. Maximum impervious surface ratio:
 1. Single-family and two-family: 50 percent.
 2. Multiple-family and community facilities: 60 percent.

To wit: I conducted a site visit on 12 January 2013 and observed a converted shed which has been built on the setback of the subject property.
