

**Historic Architectural Review Commission
Staff Report for Item 9**

To: Chairman Bryan Green and Historic Architectural Review
Commission Members

From: Enid Torregrosa, MSHP
Historic Preservation Planner

Meeting Date: February 28, 2017

Applicant: Michael Ingram, Architect

Application Number: H17-03-0002

Address: #1315 Olivia Street

New design to be reviewed based on the new guidelines for New Construction.

Description of Work:

New two-story wood frame single-family structure on empty lot. New pool, wood picket fences, and site improvements.

Site Facts:

The site in question has been vacant since 2010 after a fire damaged a neglected historic and contributing house. The Chief Building Official declared the structure unsafe and ordered its demolition. The historic wood frame house used to be two-story on the front portion and one-story on its rear. Side adjacent houses are two-story and one and a half story on front with one story on back. The immediate rear house is one-story. The lot is located on an X Flood Zone.

The city recognized two units on the lot through a Beneficial Use Allocation granted in 2010 and the Department of Community Affairs did not appeal the city's decision.

In June 28, 2016, the Commission reviewed a design that included two two-story frame structures for the vacant lot and there was a motion to postpone the item. The applicant withdrew the application.

Guidelines Cited on Review:

- New construction (pages 38a-38q), specifically guidelines 1, 2, 3, 6, 8, 9, 11, 12, 14, 17, 18, 22, 23, 24 and 25.
- Decks, pools (pages 39-40), specifically guidelines 3 and 4 of page 40, pools.

Staff Analysis

This staff report is for the review of a new proposal for a two-story single-family frame house to be located on a vacant lot. Differences from a previous submittal the new proposal only proposes one single-family house, one pool, and one driveway. The proposed design consists of an “L” shape floor plan structure with a full one-story front porch setback from the front property line 10 feet. The structure has two attached volumes, both covered with hip roofs, being the rear one lower in height than the front one. The design includes a one-story covered porch, attached to the rear façade, with a shed roof. The design creates a transition of both site setbacks and heights with adjacent houses. Adjacent historic houses on both sides of the lot have two different front yard patters, the front porch of the new house will be set back from the 1317 Olivia Street, and the front façade of the new house will have the same setback of the porch of 1311 Olivia Street. Furthermore, the new design proposes a building that will have a one-story full front porch, while the house at 1311 Olivia have a two-story full front porch, but 1317 Olivia has a one-story full front porch. The new design also creates a transition by lowering in height the roofs towards the rear of the property, ending with a one-story rear porch that is setback from the rear property line 19’ - 2”, versus an almost 5’ rear yard setback that 1311 Olivia Street possesses.

The proposed design, based on traditional architecture, does not mimic any specific structure found in the district. The proportions, building form, rhythms of fenestrations, roof forms, textures, and materials are compatible with similar typology found in the surrounding urban context. Proposed finishes include hardi board for exterior walls, 2 over 2 impact resistant clear glass windows, operable solid wood shutters, and metal v-crimp panels for the roofing system.

The plan also calls for one pool in the rear yard and behind the house, a front yard 4’ tall wood picket fence and one car driveway on the east side of the site.

Consistency with Guidelines

It is staff’s opinion that the proposed design meets the cited guidelines. The new structure will not outsize the surrounding structures as it has been designed taking into account actual setbacks and heights of all surrounding houses on the urban block. The proposed building form, the transition of heights, which helps reducing the mass of the structure, and architectural vocabulary used, makes this new design one harmonious and sensible to its urban context.

The applicant has made an effort of meeting with neighbors, one suggestion that Commission made to him when reviewing the previous design. In addition, the applicant has met several times with staff to review several diagrams for consistency with new guidelines.

The applicant has met with the city's urban forester and she has reviewed the revised plans. The Planning Department has also reviewed the submitted plans and their conclusion was that they meet zoning and planning regulations.
