

TREE COMMISSION TREE REMOVAL REPORT
CITY of KEY WEST

PROPERTY: 1317 Olivia St

APPLICATION NUMBER: T2025-0080

REQUEST: Property owner is seeking removal of (1) Gumbo Limbo (*Bursera simaruba*).

APPLICATION SUMMARY: An application was submitted to remove one Gumbo Limbo tree from the side of the property. The application states that the tree is leaking sap or displaying basal rot. It is also growing between 2 close properties.

TREE ASSESSMENT and PHOTOS:

A photo of the tree overall

Two photos of the tree's canopy

A photo of the tree's canopy from 1315 Olivia ROW and a photo of the tree's canopy's limbs

Two photos of the tree's limbs that look worn

A photo of the tree's base and a photo of the monstera taking over the trunk

Two photos of the monstera's growth on the trunk and the leakage on the trunk

Two photos of the monstera's growth on the trunk and the leakage on the trunk

Diameter: 28.5"

Condition: 60% (the tree is in fair health, the tree is massive and there is foliage throughout the canopy, but there is a substance leaking and there are some branches that look worn)

Location: 40% (growing in side yard between 2 close properties)

Species: 100% (on City of KW protected tree list)

Tree Value: 67%

Required Mitigation: 19.1 caliper inches

RECOMMENDATION: The tree is probably one of the largest Gumbo Limbos I've seen. There is a very strong monstera plant growing on the tree that could be affecting the tree. I'm not sure if the reason for the leaking is from a disease or the monstera impacting the trunk. There are multiple trees along this property line, so removal would not impact the vegetation cover greatly should removal be approved, but I am wondering if removing the monstera would have any effect on the tree.

PREPARED BY:
