FROM: Karen DeMaria, Interim Urban Forestry Manager, City of Key West

RE: 146 Golf Club Drive

A site inspection was done on December 20, 2011, and documented the following:

The tree is a Gumbo Limbo tree (*Bursera simaruba*).

146 Golf Club Drive cont....page 2

Circumference: 53" = 16.88" dbh

Location: 60% (Potential issues with water lines and walkway)

Species: 100% (on the protected tree list)

Condition: 75% (Overall health of tree appears to be good. Tree has seeds. The canopy has been reduced due to trimming toward the roofs of the houses.)

NOTE: the tree does have white fly but this does not appear to be impacting the overall health of the tree.

Total Average Value = 78%

Value x Diameter=replacement calipher (dbh) inches = $.78 \times 16.88$ " = **13"** replacement

146 Golf Club Drive cont....page 3
