

Historic Architectural Review Commission Staff Report for Item 6

To: Chairman Haven Burkee and Historic Architectural Review
Commission Members

From: Daniela Salume, MFA
Historic Preservation Manager

Meeting Date: May 27, 2025

Applicant: Sandbar Design Studio, Inc

Application Number: C2025-0036

Address: 1222 Seminary Street

Description of Work:

New single-family residence, pool, and site improvements.

Site Facts:

The building under review is a historic and contributing structure to the historic district, built circa 1940. It is currently a multi-family home. However, staff has found evidence that the house was built prior to 1940 as it shows on the 1926 Sanborn Map but as a smaller structure. The site includes the main one-story frame structure, a covered wood deck at the rear, a pool with surrounding decking, and walkways. Currently the house sits on concrete footers and is located within an X flood zone.

- Guidelines for New Construction (pages 38a-38q), specifically guidelines 1, 2, 3, 6, 7 (first and last sentence), 8, 9, 11, 12, 13 (first sentence), 14, 15, 17, 18, 22, 23, 24, and 25.
- Guidelines for Decks, Patios, Hot Tubs, Spas, Pools, and Related Equipment (page 39a), specifically guidelines 1, 3 and 4.
- Guidelines for Fences and Walls (page 41), specifically guidelines 1, 2, 3, 4 (second sentence), 8, 9, and 10.
- Guidelines for air conditioning units, antennas, trash facilities & satellite dishes (pages 42-43), specifically guidelines 1 (first sentence), 5, and 6 (first sentence).

Staff Analysis:

A Certificate of Appropriateness is currently under review for the construction of a new single-family residence. The proposed materials include Hardie siding, aluminum impact-rated windows and doors (front door will be half glazed), and a 5V crimp metal roof. An active exploratory demolition permit is in place, which explains the current condition of the structure as shown in the Property Appraiser's website photos. The existing building has significant deterioration, including termite damage, compromised flooring and walls due to rot, and a lack of a proper foundation. Staff notes that the proposed site plan does not currently show the paver path, pea rock driveway, and pool decking. These items have not yet been determined, and staff will continue to work with the applicant at the staff level to review these details.

The proposed site plan includes a 40-foot by 6-foot pool located at the rear of the property. The driveway will be finished with pea rock. Pressure-treated wood is proposed for both the front porch and the pool deck. Pool and HVAC equipment will be screened from view along the side of the house with a really tall and elevated louvered wall. Additionally, the front fence will be replaced to match the existing 4-foot picket fence.

Consistency with Cited Guidelines:

The exposed truss on the north elevation is not a feature typically found on historic homes in Key West. According to Guideline 18, *roof forms in new construction must appear similar to the established range of roof shapes found in surrounding historic buildings and be compatible with the architectural style of the proposed structure.* Exposed trusses, especially in a decorative or structural display, introduce a more contemporary and industrial character that disrupts the traditional streetscape.

The use of decorative wood shakes in the front gables is also inconsistent with the materials commonly used on historic buildings. As outlined in Guideline 22, *materials for walls and roofs must reflect those used on neighboring historic structures of the same typology* such as horizontal wood siding or board-and-batten. Decorative shakes are not typical in Key West and may seem out of place.

The proposed louvered fence seen on the north elevation exceeds the six-foot maximum height permitted under Guideline 4, which limits fence height to six feet along side and rear of property. Currently, it measures about 9 feet 4 inches from grade. Additionally, Guideline 8 outlines appropriate fencing in Key West which typically includes vertical wood pickets, wrought iron, or concrete, not modern louvered screens as fencing.

Overall, while the proposed hardie siding, impact aluminum windows and doors, and 5V crimp metal roof are appropriate for new construction, the truss detail, shake siding, and louvered 9'4" fencing do not reflect the historic character of the area and should be revised to better comply with the Historic Architectural Guidelines.
