Subject: FW: Planning Board Meeting Thursday, March 15th, at Old City Hall at 6:00PM

To: abudde@keywestcity.com

Members of the Planning Board:

Attached please find the Petition from the Key West Bight Neighborhood Association about music from the roof top of the old Waterfront Market. We have 196 signatures from friends and neighbors that are against amplified music on the rooftop. We are not against the brewery, the restaurant, or the roof top restaurant. We are against letting them have amplified music on the rooftop. We would like [the petition to be read](#) into the minutes of the meeting of the Planning Board in their meeting on 15 March 2012.

Thank you,

Doug Bennett for

The Key West Bight Neighborhood Association.

Key West Bight Neighborhood Association Petition

Neighbors are excited about the new brewery/restaurant development taking shape in the former Waterfront Market Building. Architect Bill Horn has created an interesting redesign of the building owned by the City of Key West, which includes a rooftop restaurant with 130 seats and a bandstand there for musicians. It looks great, but Bight neighbors—many who have lived here since before Schooner Wharf became a bar—are considerably less pleased with the possibility of amplified sound on this roof: Even with just the ground-level noise swell, the quality of life in the neighborhood has deteriorated in direct proportion to invasive open-air amplification emanating from bars and restaurants that currently line the harbor Boardwalk. Adding rooftop music to this already intense cumulative mix is sure to impact far more neighborhoods than the Bight area so we are asking the City to:

1. Refuse to permit the use of amplified music on the rooftop of this tax-payer owned building, or any buildings in the Key West Bight;
2. Enforce the existing noise ordinance for all buildings with open-air music leases.

Key West Bight Neighborhood Association

Petition

Neighbors are excited about the new brewery/restaurant development taking shape in the former Waterfront Market Building. Architect Bill Horn has created an interesting redesign of the building owned by the City of Key West, which includes a rooftop restaurant with 130 seats and a bandstand there for musicians. It looks great, but Bight neighbors—many who have lived here since before Schooner Wharf became a bar—are considerably less pleased with the possibility of amplified sound on this roof: Even with just the ground-level noise swell, the quality of life in the neighborhood has deteriorated in direct proportion to invasive open-air amplification emanating from bars and restaurants that currently line the harbor Boardwalk. Adding rooftop music to this already intense cumulative mix is sure to impact far more neighborhoods than the Bight area so we are asking the City to:

1. Refuse to permit the use of amplified music on the rooftop of this taxpayer owned building, or any buildings in the Key West Bight;
2. Enforce the existing noise ordinance for all buildings with open-air music leases.
