

**TREE COMMISSION TREE REMOVAL REPORT
CITY of KEY WEST**

PROPERTY: 241 Trumbo Road

APPLICATION NUMBER: TP2026-0005

REQUEST: The applicant is requesting Conceptual Landscape Plan approval with palm tree removal.

SUMMARY: The Conceptual Landscape Plant Schedule reveals an overwhelming proportion of native dicots. 91.5% of the 127 plants are dicots with 62% being 45-gallon signifying plants that have a 12' overall height. 34% are 25 gallon which translates to a 6-10' plant overall height. The planted height will only be a few inches less than the overall height or procurement metric used on the plant schedule. These are large, well-established nursery stock plants that provide immediate landscape presence. There are 10 palms trees comprising two species listed on the plant schedule. Both species are of course native to the Florida Keys.

The Preliminary Landscape Plan consists of 8 landscape areas and 2 vehicle use landscape areas.
