RE: APPLICATION FOR EASEMENT
PROPERTY: 1500 - 1502 VERNON AVENUE

Dear Katie:

Enclosed please find The Honorary Conch Corporation's ("Owner") Application for Easement ("Application") for the properties located at 1500-1502 Vernon Avenue, Key West, Florida bearing Monroe County real estate numbers 00037410-000100 & 00037410-000200 (collectively the "Property").

There are no know easements, deed restrictions, or other encumbrances attached to the property that Owner is aware of.

Together with the following required supporting documents:

1. Check No. 1219 in the amount of \$2,900 for the application fee payable to City of Key West;
2. Notarized verification form signed by the property owner together with the Sunbiz Detail showing the signor as a member;
3. Notarized authorization form sign by the property owner;
4. Certificate of Liability Insurance listing City of Key West as an additional Certificate Holder;
5. Copy of recorded Warranty Deeds;
6. Monroe County property record cards;
7. Signed and seal Specific Purpose Survey; and
8. Photographs showing the proposed areas.

Also enclosed is a complete copy set of the documents submitted, to be date stamped once received.

Please do not hesitate to contact me with any questions or comments. I look forward to working with you on this matter.

Sincerely,

CHELSEA C. VANADIA

SURVEYOR'S NOTES:

- EXAMINATION OF THE ABSTRACT OF THE TITLE WILL HAVE TO BE MADE TO DETERMINE RECORD INSTRUMENTS IF ANY, AFFECTING THE PROPERTY.
- LOCATION AND IDENTIFICATION OF UNDERGROUND ENCROACHMENTS OR UTILITIES ON AND/OR ADJACENT TO THE PROPERTY WERE NOT SECURED AS SUCH INFORMATION WAS NOT REQUESTED
- NO SEARCH OF PUBLIC RECORDS HAS BEEN MADE (BY THIS OFFICE) FOR ACCURACY AND OR OMISSIONS.
- THIS CERTIFICATION IS ONLY FOR THE LANDS AS DESCRIBED, IT IS NOT A CERTIFICATION OF TITLE, ZONING, EASEMENTS, OR FREEDOM FROM ENCUMBRANCES, "TITLE" ABSTRACT NOT REVIEWED.
- THERE MAY BE ADDITIONAL RESTRICTIONS THAT ARE NOT SHOWN ON THIS SURVEY THAT MAY BE FOUND IN THE PUBLIC RECORDS OF THIS COUNTY.
- THIS SURVEY HAS BEEN PREPARED FOR THE EXCLUSIVE USE OF ENTITIES NAMED HEREON AND THE CERTIFICATION DOES NOT EXTEND TO ANY UNNAMED PARTY.
- DIMENSIONS, BEARINGS OR ANGLES INDICATED HEREIN ARE MEASURED AND ARE THE SAME AS PLAT VALUES UNLESS OTHERWISE INDICATED BEARINGS ARE BASED ON SHOWN PLAT VALUES (IF ANY) OR AN ASSUMED VALUE.
- ALL RIGHTS OF WAYS SHOWN ARE PUBLIC UNLESS OTHERWISE NOTED
- UTILITY FACILITIES WITHIN UTILITY EASEMENTS NOT NOTED AS VIOLATIONS, DRIVEWAYS OR PORTIONS THEREOF WITHIN ROADWAYS NOT NOTED AS VIOLATIONS OR ENCROACHMENTS.
- THE LEGAL DESCRIPTION WAS FURNISHED BY THE CLIENT
- THIS DRAWING IS PROPERTY OF ZURWELLE-WHITTAKER, INC AND CANNOT BE REPRODUCED WITHOUT WRITTEN CONSENT
- THE ELEVATION INFORMATION SHOWN HEREON (IF ANY) IS RELATIVE TO THE NATIONAL GEODETIC VERTICAL DATUM, (N.G.V.D.), OF 1929 UNLESS OTHERWISE NOTED
- BENCHMARK USED: NGS BENCHMARK & FPRN (SEE BENCHMARK INFO.)
- COORDINATES SHOWN ARE RELATIVE TO THE NORTH AMERICAN DATUM OF 1983/90 AS BASED ON THE STATE OF FLORIDA'S D.O.T. FLORIDA PERMANENT REFERENCE NETWORK (F.P.R.N.) A GPS/GNSS REFERENCE NETWORK. BASE STATION USED: FLKW (KEY WEST STATION)
- COORDINATE CONVERSIONS (IF ANY) HAVE BEEN CONVERTED USING CORPSCON VERSION 6.6.1, FROM U.S. ARMY CORPS OF ENGINEERS, ALEXANDRIA, VIRGINIA.
- UNLESS IT BEARS THE SIGNATURE AND THE ORIGINAL RAISED SEAL OF A FLORIDA LICENSED PROFESSIONAL SURVEYOR AND MAPPER, THIS DRAWING SKETCH, PLAT OR MAP IS FOR INFORMATIONAL PURPOSES ONLY AND IS NOT VALID.
- ACCURACY OF HORIZONTAL CONTROL: (FOR EXPECTED USE OF LAND AS DEFINED BY (5J-17)) THE FIELD MEASUREMENTS VERIFIED BY CALCULATIONS OF A CLOSED GEOMETRIC FIGURE BASED UPON FIELD INFORMATION TAKEN IN THE FIELD BY TOTAL STATION AND OR GPS.

RE: Temporary Use Agreement
Honorary Conch Corporation
Site No. 397974 / Project No. 394395
BOT No. 440359785
Property ID No. 00037410-000000 – Vernon Ave. Key West, FL 33040
Gulf of Mexico, Class III Outstanding Florida Waters
Monroe County – ERP

Dear Ms. Vanadia

Thank you for returning the Temporary Use Agreement (TUA) with the appropriate signature. Enclosed is the fully executed Temporary Use Agreement to provide you, with continued temporary authorization for the existing docking facility structures and mooring areas on state-owned submerged lands. The Temporary Use Agreement is effective today, March 18, 2021.

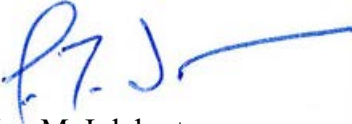

Please note that the TUA requires the following to be accomplished within the specified timeframes:

1. Completion of an application for a sovereign submerged lands lease by September 14, 2021 (180 days from the TUA's effective date), consisting of:
 - A. Payment of the \$692.31 lease application fee;
 - B. An acceptable sketch and legal description meeting the Department's requirements;
 - C. A completed billing information form;
 - D. A completed financial assurance affidavit

Please note that online payments can be made by going to the DEP Business Portal at <http://www.fldepportal.com/go/pay/>. Also, any document submittals can be made to our email mailbox at fmerp_compliance@dep.state.fl.us or may be mailed to the above address.

If you have any questions about the lease application or TUA requirements, please contact Mckenzie Fraley by email at Mckenzie.Fraley@FloridaDEP.gov or by phone at 305-289-7079. Your continued cooperation in this matter is appreciated.

Sincerely,

Jon M. Iglehart
Director of District Management

TEMPORARY USE AGREEMENT
BOT# 440359785

This Temporary Use Agreement (hereinafter referred to as the "Agreement") is entered into this 18th day of March, 2021, by and between the Board of Trustees of the Internal Improvement Trust Fund of the State of Florida (hereinafter referred to as the "Board") and Honorary Conch Corporation (hereinafter referred to as the "Applicant").

RECITALS:

- A. The Applicant desires to enter into this Agreement for the sovereign lands (hereinafter referred to as "lands") and water column located adjacent to Parcel No. 00037410-000000 - Vernon Ave. Key West, Florida 33040.
- B. A private residential multi-family pier has been constructed on these lands adjacent to Applicant's upland real property that requires a sovereignty submerged lands lease (hereinafter referred to as "lease") pursuant to Rule 18-21.005(1)(d), Florida Administrative Code (F.A.C.). The Board has not issued the required lease.
- C. The Applicant desires to obtain the consent of the Board to maintain and use the structures and mooring areas as a multi-family pier located on these lands as shown on Exhibit A.
- D. The parties acknowledge that the Florida Department of Environmental Protection (hereinafter referred to as "Department"), as staff to the Board, will expeditiously process the Applicant's application for a sovereign submerged lands lease.
- E. The Applicant desires to have the temporary use of the structure as a private residential multi-family pier located on these lands during the processing and review of the Applicant's lease application.

NOW, THEREFORE, for and in consideration of the mutual agreements and covenants set forth herein, the Applicant agrees to pay to the Board a total of **\$587.44** for deposit into the Internal Improvement Trust Fund as compensation for the past and current use of these lands without the approval or authorization of the Board (see attached Exhibit B). Such payment, which shall be paid online by check, credit card or debit card at <http://www.fldepportal.com/go/pay-invoices/> or paid by a cashier's check, certified check or money order payable to the Department of Environmental Protection, shall be delivered to the Board's Accounting Office, Post Office Box 3070, Tallahassee, Florida 32315-3070 within 30 days of the date of this Agreement.

The parties hereto, then, agree as follows:

1. The Applicant acknowledges and understands that the grant of this Agreement does not guarantee that the Board will grant the Applicant a lease or that the Department will recommend that a lease be granted. **The Board will issue a lease if the Applicant meets the lease requirements of Rule 18-21, Florida Administrative Code (F.A.C.).**

2. The Applicant is hereby granted the temporary exclusive use of the structures and activities located on these lands as depicted in Exhibit A, consisting of approximately 555 square feet. This temporary exclusive use is for a term not to exceed one year from the date of execution of this Agreement, or until the date of execution of a sovereign lands lease between the Board and the Applicant, whichever occurs first. The Applicant shall make no claim of title to or interest in the sovereign lands identified in Exhibit A solely by reason of occupancy or use thereof under this Agreement.

3. The existing structures and activities can only be utilized as they existed on the date of execution of this Agreement. In the event any part of any of these structures or activities are determined by a final adjudication issued by a court of competent jurisdiction to encroach or interfere with riparian rights of the adjacent upland riparian owner, Applicant agrees to either obtain written consent for the offending structure or use from the affected adjacent upland riparian owner or remove the interference or encroachment within 60 days from the date of the adjudication. Failure to comply with this paragraph shall constitute a material breach of this Agreement and be grounds for immediate termination of this Agreement at the sole option of the Board.

4. The consideration paid for this Agreement includes the lease fees due for these lands from February 25, 2021 through February 25, 2022. This consideration is not refundable, notwithstanding the denial of a lease by the Board.

5. The Applicant acknowledges that the lease fees assessed in this agreement after March 1, 2021 are an estimate created using the minimal annual fee from the 2020-2021 billing cycle. A supplemental invoice will be generated and issued to the applicant at the time of lease execution that accounts for any difference in lease fees owed for the new per square foot fee established on March 1, 2021 which is based on changes in the consumer price index, pursuant to Rule 18-21.011(1)(b.), F.A.C., and changes in the square footage of the preempted area based on a survey supplied by the Applicant pursuant to Applicant's lease application, and the Applicant hereby agrees to pay the full amount any additional lease fees owed to the Board due to these changes within 30 days of the receipt of the supplemental invoice.

6. In the event that a lease application is not approved by the Board, or the Applicant fails to execute the lease prior to the expiration or termination of this Agreement, whichever occurs first, the Applicant shall remove all structures and cease

all activities referenced herein on the sovereign lands at the Applicant's sole expense. In the event that the Applicant asserts title to the sovereign lands identified in Exhibit A, and either the Applicant fails to timely submit the information concerning title as required herein, or the Board denies the Applicant's claim of title and the Applicant has not commenced an action to quiet title as specified herein, the Applicant shall remove all structures and cease all activities referenced herein on the sovereign lands at the Applicant's sole expense. In the event that the Applicant fails to complete the requirements of paragraph 8 of this Agreement, the Applicant shall remove all structures and cease all activities referenced herein on the sovereign lands at the Applicant's sole expense. The complete removal of the structures as required by this paragraph shall be accomplished within 180 days following the expiration or termination of this Agreement, whichever occurs first. The complete cessation of the activities shall occur immediately following the expiration or termination of this Agreement, whichever occurs first.

7. If the Applicant asserts title to the lands identified in Exhibit A, the Applicant must submit an application, accompanied by all evidence upon which Applicant relies for the assertion of title, to the Department's Division of State Lands (hereinafter referred to as "DSL"), within 90 days after the execution of this Agreement. DSL will review the application and accompanying evidence and give a response to Applicant as to whether the Board will assert title to the lands described in Exhibit A. If DSL responds that the Board will assert title to said lands, the Applicant must file an appropriate action in circuit court within 90 days of DSL's response to obtain a legal determination of title to the lands. If DSL, after consultation with the Board, responds that the Board does not assert title to the lands, then the Applicant shall not have to apply for a lease, and that portion of the consideration representing lease fees and interest, if any, shall be refunded. If DSL, after its review, responds that the Board does not assert title to a portion of the lands, any consideration for that portion representing lease fees and interest, if any, will be refunded. Failure to submit the initial application and evidence within 90 days after execution of this Agreement, or failure to file the appropriate court action within 90 days after DSL's response, shall constitute a waiver by the Applicant of all of its claim of title to the lands and an acknowledgment that the Board owns the lands.

8. Applicant shall complete the application for a lease to the Board within 180 days of the execution of this Agreement for the lands identified in Exhibit A. The items needed to be submitted to complete the lease application include:

- A. Payment of a \$692.31 lease application fee;
- B. An acceptable sketch and legal description meeting the Department's requirements (requirements attached to fully executed Agreement);
- C. A completed billing information form (form attached to fully executed Agreement); and

D. A completed financial assurance affidavit (form attached to fully executed Agreement).

9. This Agreement is temporary in nature and may not be extended or modified except upon the express written agreement of the Board. No request for an extension of the Agreement shall be considered by the Board except upon a demonstration by the Applicant that the Applicant is in full compliance with the terms and conditions of this Agreement and has exercised due diligence in its efforts to procure a lease from the Board.

10. As a material condition of this Agreement, Applicant agrees to comply with all applicable requirements of Chapters 253, 373, 376, and 403, Florida Statutes, and the rules promulgated pursuant thereto. The Board has the right to immediately rescind this Agreement upon the failure of Applicant to comply with either the terms of this Agreement, statutes, rules, or any permits or exemptions. Upon written notice that the Board has exercised its right to rescind under this paragraph, Applicant shall immediately cease and desist all activity authorized by this Agreement, or within the timeframe specified in the notice, or within twenty days of receipt of the notice if no timeframe is specified. Notice may be given by the Board by certified mail or hand delivery to: Gregory Ozzimo, 400 South Street, Key West, FL 33040, or by posting the notice at the property described in Paragraph A.

11. Applicant shall save and hold harmless and indemnify the Board, Department, and the State of Florida against any and all liability, claims, judgments or costs of whatsoever kind and nature for injury to, or death of, any person or persons and for loss or damage to any property arising out of or connected with Applicant's occupation and use of these lands and the structures or activities located thereon. By execution of this Agreement, applicant waives any claim it may have against the Department concerning the submerged lands described on Exhibit A except as described in Paragraph 7 above.

12. Applicant agrees that any litigation arising from matters relating to this Agreement between the Board and the Applicant shall be initiated and maintained only in Leon County, Florida.

13. This Agreement, and any rights and privileges contained herein, are for the sole benefit and use of the Applicant and shall not be assigned or transferred by the Applicant to any other party without the prior written consent of the Board, which consent shall not be unreasonably withheld.

14. The terms of this Agreement may be enforced by the Board notwithstanding that the authorization granted hereunder has expired.

Executed on the date first written above.

FINANCIAL ASSURANCE AFFIDAVIT

I _____ (insert name), swear or affirm:

1. Honorary Conch Corporation. (“Lessee”), has applied to the Board of Trustees of the Internal Improvement Trust Fund of the State of Florida (“Board of Trustees”) for a sovereignty submerged lands lease (“Lease”) for the sovereignty submerged lands located adjacent to Vernon Ave, Key West, FL 33040, Property ID No. 00037410-000000, Section 5, Township 68, Range 25, Monroe County, Florida (“Leased Premises”).
2. I am the _____ (insert title) of the Lessee.
3. The Lessee is not the subject of a pending bankruptcy proceeding.
4. The Lessee has no unsatisfied judgments entered against it in the State of Florida.
5. The Lessee has satisfied all state and local taxes for which it is responsible in the State of Florida.
6. There are no other matters pending or threatened against or affecting the Lessee or the Lessee’s interest in the riparian upland property adjacent to the Leased Premises that would impair the Lessee’s financial capability to undertake and operate the facility authorized by the Lease.
7. This affidavit is made as an inducement for the Board of Trustees to grant a Lease to the Lessee, and the Lessee intends for the Board of Trustees to rely on these representations.

Honorary Conch Corporation.

SURVEY REQUIREMENTS
For Leases and Private Easements
(>3,000 Square Feet Preempted Area Over Sovereignty Submerged Lands)

Instructions to Staff:

1. Distribute the [Survey Requirements Package](#) to applicants whose projects will require a lease or private easement, either of which will preempt >3,000 sq. ft. of sovereignty submerged lands. This is part of the initial application review process and completeness summary.
2. When you receive the survey and the [Survey Review Checklist](#) from the applicant, fill in the DEP/WMD review column to check the survey for completeness, accuracy, and inclusion of specific sovereignty submerged lands (SSL) information.
3. When the project is complete, keep a copy of the final survey drawing and the completed survey review checklist in the master file. Place the two original final survey drawings and a copy of the completed checklist in the folder (containing SSL instrument processing information) to be sent to the Division of State Lands, Bureau of Public Land Administration, MS 130, for instrument processing.
4. Staff may wish to make a photocopy of the survey and add notes or show locations of the items listed below. This information should be included in the package sent to BPLA to be used in understanding special conditions and to use for subsequent inspections. Staff should not expect the surveyor to include all these items on the survey drawing.

- Manatee signs (location and direction to face)
- Boat ramp
- Fueling
- Sewage pumpout (whether portable or fixed)
- Fish cleaning station
- Entry gates
- Location where hand rails will be required
- Informational signs
- No mooring signs
- Slip numbers and mooring locations
- Other _____

5. Rules 18-21.008 and 18-21.010 require surveys for leases and easements. If changes to a project require a permit modification, then a revised survey is needed. When structures are expanded or redesigned, if the lease or easement boundary changes or new slips are added, a new survey will show all staff, inspectors, and the owners what is authorized.

However, you may give consideration to the renewal date of the SSL instrument and the type of changes proposed. For example, if the changes are to add a few extra feet to finger piers and the lease boundary will not change, the modified survey could be required at the time of renewal to save staff processing time and save expense to the applicant/owner. In this case, condition the authorization to require a revised survey upon renewal and send a copy to DSL, BPLA, to be placed in the instrument file so that when an inspection is requested or any review of the file is done, this information will be known and the survey can be required with the renewal.

The survey package on the following pages also is available on the Bureau of Survey and Mapping's web site at <http://www.dep.state.fl.us/lands/survey.htm> within the "Survey & Mapping Quick Links", under "Documents and Presentations", and selecting "Technical Information" under the Survey and Mapping header.

SURVEY REQUIREMENTS PACKAGE

For Leases and Private Easements (>3,000 Square Feet Preempted Area Over Sovereignty Submerged Lands)

Instructions to Applicant:

This Survey Requirements Package contains the survey requirements and data required to be included in the survey to be submitted regarding your proposed project. It **MUST** be given to the surveyor with whom you contract.

In addition, we request that your surveyor contact the Division of State Lands, Bureau of Survey and Mapping at 850/245-2606, prior to performing work to ensure that the requirements regarding compliance with the Standards of Practice (Minimum Technical Standards) pursuant to Chapter 5J-17-050 through 5J-17.052, Florida Administrative Code (F.A.C.), are clearly understood and that all questions are adequately answered. Technical inquiries should be made to the Bureau only by your surveyor or engineer.

SURVEY REQUIREMENTS

Provide two 8 1/2 x 11 inch prints of a field survey. If your original drawing is larger than 8 1/2 x 11 inch, then also submit two copies of the original size drawing (so that staff can refer to a clear view of the entire project). All copies must be signed, sealed, and dated by a Florida licensed Surveyor and Mapper in accordance with Rules 5J-17.061 and 5J-17.062, F.A.C., and must meet the Standards of Practice (Minimum Technical Standards) in compliance with Rules 5J-17.050 through 5J-17.052, F.A.C. In addition, the survey must also include the following information.

General:

- Scale – Each sheet must include a graphic scale, scaled to an engineers scale.
- Provide a location or vicinity map of at least 7.5 minute quad scale.

[a] Show the boundaries of the lease/easement parcel sought which must include the entire "preempted area." This area includes all the sovereignty or state-owned submerged lands affected by the activity, from which any traditional public uses have been or will be excluded by an activity, such as the area occupied by docks, piers, and other structures; temporary and permanent mooring areas; the area between a dock and the shoreline where access is not allowed; between docks; or areas where mooring routinely occurs that are no longer reasonably accessible to the general public; turning basins within aquatic preserves; permanent mooring areas not associated with docks; and swimming areas enclosed by nets, buoys, or similar marking systems. When the Board of Trustees requires an activity to be moved waterward to avoid adverse resource impacts (such as dredging or disturbance of nearshore habitat), the portion of the nearshore area that is avoided by the proposed activity shall not be included in the preempted area. [See "preempted area" definitions in sections 18-21.003, F.A.C., and 18-20.003, F.A.C., as applicable]

- The lease boundary shall be drawn to accommodate all vessels to be moored, including such things as bow pulpits, bow sprits, dive platforms and motors.
- Please contact the appropriate DEP or WMD district office if you have any questions regarding your specific project.
- The boundary of any designated swimming area must be shown.

- [b] Show the size and dimensions of all existing and proposed overwater structures and activities, including mooring pilings, located within the riparian rights boundaries of the parcel sought; and identify the location(s) of any existing and proposed fueling and sewage pumpout facilities. **YOU DO NOT NEED TO INCLUDE** buildings, structures, streets, platted areas, parking lots, etc., that are located landward of the mean or ordinary high water line or the safe upland line.
- [c] The applicant's upland property (parcel) boundaries must be clearly sketched on the submerged land lease or easement survey drawing. You are not being asked to survey the upland property; only to show the parcel boundary and where the upland property lines intersect the MHWL/OHWL/SUL.
- [d] Show the primary navigation channel(s) or direction to the center of the affected waterbody.
- [e] Show the applicant's riparian rights lines extending into the waterbody from both sides of the applicant's upland property (parcel).
- See attached guide, "[Allocation of Riparian Rights](#)" from the DEP Bureau of Survey and Mapping.
- NOTE:** This information regarding boundaries of riparian rights represents the generally accepted methodology for determining such boundary lines, and may not identify all considerations regarding riparian lines under certain conditions. However, a binding determination of riparian boundaries can only be made by agreements of the affected parties or by a final adjudication of a court of competent jurisdiction. Acceptance of a survey and issuance of a submerged lands lease or easement shall not constitute a binding determination of riparian boundaries by the Department and shall not prevent the Department from ordering the removal or the relocation of any structure which may later be determined to encroach upon or interfere with adjacent upland owners' riparian rights.
- [f] Show the distance from existing and proposed structures, moorings, and activities to the projected riparian lines.
- All structures and activities must be set back a minimum of 25 feet inside the applicant's riparian rights lines. Marginal docks must be set back a minimum of 10 feet. [For exceptions to the setbacks, see subsection 18-21.004(3), F.A.C.]
- [g] For leases in the Florida Keys: indicate the water depths referenced to mean low water within the lease area and out to the navigation channel.
- [h] Label the linear footage of the applicant's shoreline which borders on sovereignty or state-owned submerged lands. [Note: this can include the linear distance across an upland cut or man-made canal for the distance that the applicant is the upland owner.]
- [i] Show the location of any shoreline vegetation, if existing. Inside aquatic preserves, show the shoreline conditions within the lease area plus 1,000 feet extending from each side: % natural_____; % with seawall, bulkhead or riprap_____.
- [j] Identify and sketch in on the survey drawing any structures (docks, piers, pilings, etc.) existing within 100 feet of the applicant's requested lease or easement area. [Note: all structures and activities along the applicant's shoreline are considered preempted area.]
- [k] The legal description must reference the section, township, range, county, and name of the affected waterbody and must include the total square footage of the lease/easement parcel sought. The legal description must be provided on a separate sheet if it is not

clearly legible when reduced to 8 1/2 x 11 inch paper. It is not required that the submerged land lease or easement boundary be monumented. However, the submerged lands lease or easement boundary must be tied to at least one corner of record, which must be a section corner, subsection corner, or record plat or deed corner, and must be labeled on the survey drawing. Depending on the complexity of the survey/easement, you may show calls and bearings on a table and use numbering on the survey. If there are several lease/easement parcels, list them in a table and provide amounts for each plus the total area in square feet. The section/township/range should match on the survey, deed and title review sheet.

- [l] A surveyed or scaled 1983 or 1927 NAD coordinate of the point of beginning (POB) or point of commencement (POC) of the proposed lease or easement area must be shown on the survey drawing. The coordinates may be scaled from a USGS Quad Sheet or other suitable map. The method used to determine the coordinates must be noted on the drawing.
- [m] Provide a separate legal description of any non-water dependent structure(s). Depending on the complexity of the survey, the description may be placed on a separate page with a table matching length numbers to actual calls and bearings and distances.
- [n] If privately-owned submerged lands lie adjacent to the sovereignty or state-owned submerged land parcel sought, the boundary line of the privately-owned parcel must be shown and, if conveyed by Trustees' Deed, the Deed Number must be included. Trustees' deeds and disclaimers or Butler Act conveyances will be identified by DEP's Title and Land Records Section during review of the application to determine ownership of submerged lands sought.
- [o] All submerged land lease or easement surveys must be field surveys and clearly stated as such. Each survey will be checked for compliance with Rules 5J-17.050 through 5J-17.052, F.A.C., and, if applicable, Chapter 177, Part II, F.S., and must meet the requirements of the Department's SLER 0950 "Survey Requirements" procedure.
 - Certify the survey to the Board of Trustees (TIIF) (and to the owner if desired). The typical phrase is "Certified to the Board of Trustees of the Internal Improvement Trust Fund of the State of Florida," This statement must be included on the survey; however, an alternate statement of "This survey is certified to the Board of Trustees of the Internal Improvement Trust Fund of the State of Florida" is also acceptable. An additional statement that the survey is certified to the owner may be included if desired.
- [p] A mean high water line (MHWL), ordinary high water line (OHWL), or safe upland line (SUL) at or above MHWL/OHWL must be shown on the survey drawing.
 - Information regarding a **mean high water line** may be found on the DEP website at: www.labins.org.
 - For information regarding an **ordinary high water line**, contact the DEP Bureau of Survey and Mapping.
 - Information regarding a **safe upland line** for *tidal* waters may be found on the DEP website at: www.labins.org. If the information needed is not available at this website, you may use the approximate elevation of MHW plus 0.5 foot, or contact the DEP Bureau of Survey and Mapping.
 - If a **safe upland line** for *non-tidal* waters is used, see attached guide, "[Safe Upland Line Methodology for Submerged Land Lease or Easement Surveys in Non-tidal Waters.](#)"

- **NOTE:** If a **safe upland line** is used, the surveyor should preface the legal description of the lease or easement with: "Any and all sovereignty lands lying within the following described boundaries: "(and then proceed with the legal description using the safe upland line).
- Additional questions regarding acceptable procedures for establishment of a MHWL, OHWL, or SUL may be directed to the DEP Bureau of Survey and Mapping.

- [q] If a proposed structure or activity occurs on a beach that was restored, the **Erosion Control Line** (ECL) follows the MHWL surveyed prior to nourishment, and the land seaward of the ECL is considered sovereignty submerged land. Subsequent filling is called "nourishment." Because the ECL is already established, no additional survey is required, even if the beach recedes landward of the original ECL. When sand from an inlet maintenance dredging project is placed on the beach as "disposal," no ECL is required.
- Questions regarding the ECL may be directed to the DEP Bureau of Survey and Mapping.
 - **NOTE:** ECLs are normally established after the Joint Coastal Permit (JCP) is issued by the Bureau of Beaches and Coastal Systems.

- [r] Survey drawing:
- If a proposed structure or activity extends landward of the MHWL, OHWL, or SUL, the landward line of the submerged land lease or easement boundary must abut the MHWL, OHWL, or SUL.
 - If a proposed structure or activity is entirely waterward of the MHWL, OHWL, or SUL, the most landward line of the submerged land lease or easement boundary may not be required to abut the MHWL, OHWL, or SUL (such as for an offshore mooring area).

- [s] Depending on the nature of the shoreline, the following information is required.
- **Natural Shoreline** – A MHWL, OHWL, or SUL may be used. The procedure used for establishing the MHWL, OHWL, or SUL must be approved by the DEP Bureau of Survey and Mapping.
 - **Seawall** – If a seawall is in place and the surveyor has determined that it has not been constructed on the face of illegal fill, he may tie the lease or easement to the face of the seawall. However, the Department requires that the surveyor determine the NGVD 29 or NAVD 88 elevations at the top and bottom of the seawall and note the elevations on the survey drawing.
 - **NOTE:** If the proposed project is located in an **aquatic preserve**, show the nature (condition) of the subject lease area shoreline together with the adjacent 1,000 feet of shoreline on each side of the proposed lease area on the survey drawing as either natural or as bulkheaded, seawalled, or riprapped. This information is required because two times the base lease rate is applied when 75% or greater of the sum total of the linear footage of the subject lease area shoreline together with the adjacent 1,000 feet of shoreline on each side of the lease area is in a natural condition. [See paragraph 18-21.011(1)(b), F.A.C.]

**FLORIDA DEPARTMENT OF ENVIRONMENTAL PROTECTION
BUREAU OF SURVEY AND MAPPING**

**SAFE UPLAND LINE METHODOLOGY FOR
SUBMERGED LAND LEASE OR EASEMENT SURVEYS
IN NON-TIDAL WATERS**

This is to outline a procedure for determining a safe upland line on freshwater lakes and rivers for the purpose of area computations of submerged land leases and easements. The safe upland line determined by this procedure is not to be considered a sovereignty submerged land boundary and will not be recognized by the Department for use in controlling future development or for any other use or purpose unless specifically stated otherwise by the Department. The typical procedure for establishing the elevation of a safe upland line follows.

1. The safe upland elevation should be based on the elevation of mature upland vegetation.
2. Suggested upland species are:

Flowering Dogwood	<u>Cornus florida</u>
American Beech	<u>Fagus grandifolia</u>
White Ash	<u>Fraxinus americana</u>
American Holly	<u>Ilex opaca</u>
Southern Red Cedar	<u>Juniperus silicicola</u>
Tulip Tree	<u>Liriodendrom tulipifera</u>
Eastern Hop Hornbeam	<u>Ostrya virginiana</u>
Narrow-leaf Panicum	<u>Panicum aciculare</u>
Black Cherry	<u>Prunus serotina</u>
Live Oak	<u>Quercus virginiana</u>
Sassafras	<u>Sassafras albidum</u>
Saw Palmetto	<u>Serenoa repens</u>

3. The upland vegetation must be of sufficient size to indicate a pre-regulation safe upland line if there is a weir or other water level control structure on the water body.
4. A transect should be located in an unaltered area of the water body.
5. The transect on a lake does not have to be located at the project site.
6. The transect on a river does not have to be located at the project site, but the effect of the gradient of the river should be considered.
7. Elevations should be taken along the transect, at the breaks in elevation, the base of the upland vegetation, and at the present water level.
8. Changes in vegetation communities should be noted.
9. The diameter of the upland trees should be noted.
10. Any other conditions that may affect the determination of the safe upland elevation should be noted.
11. The safe upland line is considered a continuous contour approximated by bearings and distances included in a closed traverse around a submerged lease or easement area.

The Bureau must receive a cross sectional plot of the transect containing the above information before the submerged land lease or easement survey is approved. This information and notes indicating the methodology used to determine the safe upland line must be included as part of the survey drawing. Also, a copy of a USGS quad sheet or other suitable map showing the approximate location of the transect must be furnished to the Bureau.

The above is intended to be general guidelines. Every freshwater lake and river has its own individual characteristics and procedures will vary.

BUREAU OF SURVEY AND MAPPING**

Guidelines for Allocation of Riparian Rights

The 1985 and 2009 Studies

In 1985 and again in 2009, the Bureau of Survey and Mapping sponsored a study of the effect of shoreline and channel geometry on the division of riparian rights. This study was prepared by Dr. David Gibson, Associate Professor at the University of Florida. The research was intended to analyze existing methods for making allocations of riparian rights together with a study of different shoreline configurations. The result was a set of recommended guidelines.

This document concentrates on the two riparian right “equities” of dominant interest among waterfront owners: (1) right of ingress/egress to navigable waters – the right to build a dock out to deep water, (2) right of view out to the edge of the main navigational channel (view). The following are conclusions from the studies and examples of riparian rights allocations.

Conclusions from Literature Study

1. Docking is a near-shore consideration and is limited by the line of deep water (line of navigability or line of navigation). The great weight of research indicates that when docking is the primary issue, courts will usually apportion the space between the shore and the line of navigability.
2. In considering docking when the shore is relatively straight on a large body of water (one without a nearby channel or thread), such as the ocean, a large lake, ocean bay or wide river, the dominant construction makes division lines perpendicular with the general direction of the shore extended to the line of navigable water. The shore’s general direction requires smoothing of smaller indentations and projections, and perpendiculars are constructed with the “smoothed” shore from the place where the side lot line hits the Mean High Water Line or Ordinary High Water Line.
3. Along a river without a marked channel and the opposite bank is in proximity to the area of concern, the dominant technique is to construct riparian lines perpendicular with the stream’s thread (median). The stream’s thread should be found as the median line of the water surface half way between the banks during ordinary stages of water height.
4. Along a river or other water body with a nearby marked navigation channel and a regular shore, most courts construct perpendiculars with the nearest channel edge as opposed to the thread. It appears that the proximity of a channel edge, or any other similarly established outer line, will most likely be used by courts for the apportionment using perpendiculars if the shore is relatively straight.
5. The direction of upland boundaries is largely ignored when apportioning riparian rights. The public’s mistaken belief that riparian lines are on the extension of their side upland lines is the most frequent cause of riparian disputes. Instead, the water body must be **equitably apportioned** as if all waterfront owners were standing on the shore looking out over the water body – see example below.

6. When the shore is irregular in the form of a cove or projection into an ocean, ocean bay, lake or river, most courts apportion the line of deep water to divide riparian rights as opposed to any perpendicular method – see example above.

7. Methods of apportionment designed for the whole water body, such as the center point method in lakes, thread of lakes, perpendiculars to channels or threads, should be used mainly for those riparian rights that require apportion of the entire water surface. They may also be used to determine direction but not the terminus of near-shore division lines when they give substantially the same apportionment as a near-shore method. This would be true in round lakes with concentric water depth contour lines, along rivers with parallel banks and parallel channel, and along long lakes with consistent water depth contours – see example below.

8. The apportionment of the line of deep water is the most universal technique for division of riparian rights that will give the same solution as more traditional techniques in many cases and will follow dominant national case law where the shore is irregular.

Recommended Procedures and Water Body Classifications

In explaining allocation procedures, reference will be made to several sketches which were constructed to show numerous cases of water boundaries. It is presumed that the main considerations are docking, view and access to navigation channels. It should be noted that the upland boundaries of the lots surrounding the water are shown only as very light dashed lines for the reasons stated in no. 5 above.

River, No Marked Channel, Parallel Banks – Perpendicular with Median Line In the river example below, the water body would be classified as (1) being a narrow river where the opposite bank is of a consideration and (2) as having generally parallel banks without deep coves and projections.

The main technique to be applied here is the “perpendicular with the stream’s thread” method. The banks being the limit of water at its ordinary stage would be determined. A median line would be constructed exactly midway between the banks at their ordinary stage of water. Perpendiculars would be constructed at the thread and produced back to the shore points. Docking and access rights would stop at the line of deep water – see example below.

For example, at area "1", the red riparian line is the "docking" line shown perpendicular with the dotted median line stopping at the line of deep water. The dashed extension of the riparian line is the "view" line out to the median line. These lines are: not on the extension of the upland side line, not perpendicular with the water boundary, or not perpendicular with the line of deep water.

Other docking and view riparian lines are shown in the neighborhood. This same technique would be used on the entire river upstream of point "a". None of the coves are deep and no inequity would result.

River, Marked Channel, Parallel Banks – Perpendicular with the Channel Line

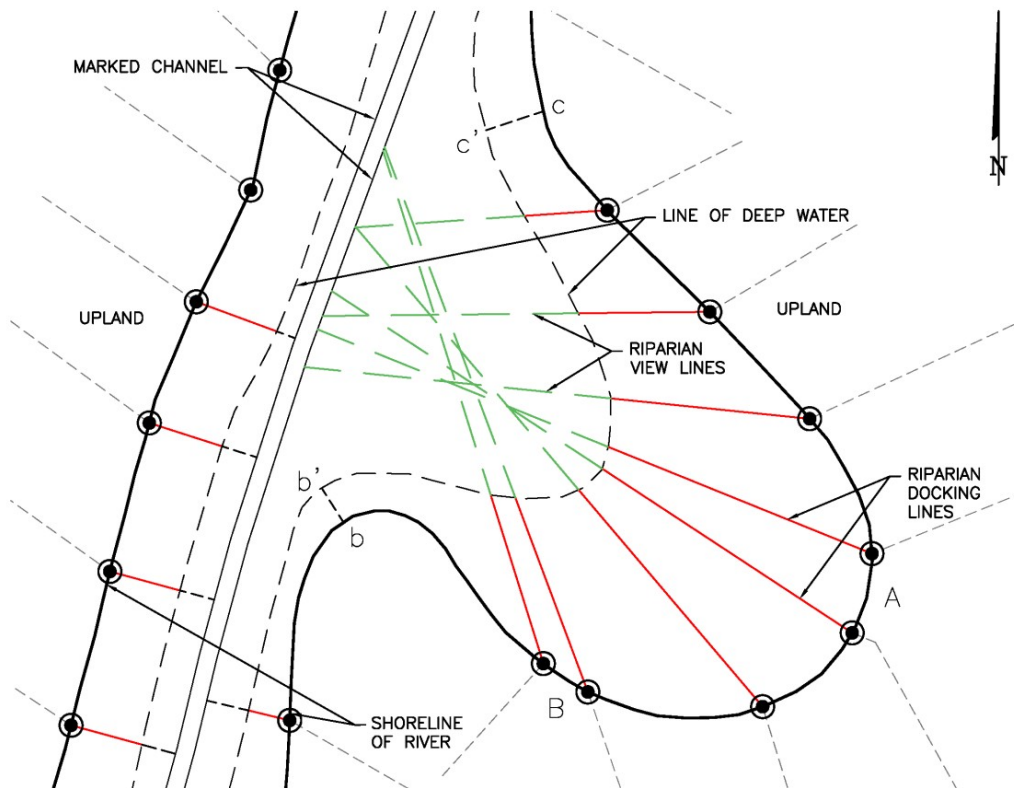

Downstream of the above example a maintained and marked channel exists that would take over from the thread for the apportionment base line. The channel probably has an east and west edge, and perpendiculars would be constructed at the nearest edge and run back to shore – see example below.

For example, at area “2” above, perpendiculars are constructed at the nearest channel edge and run back to shore.

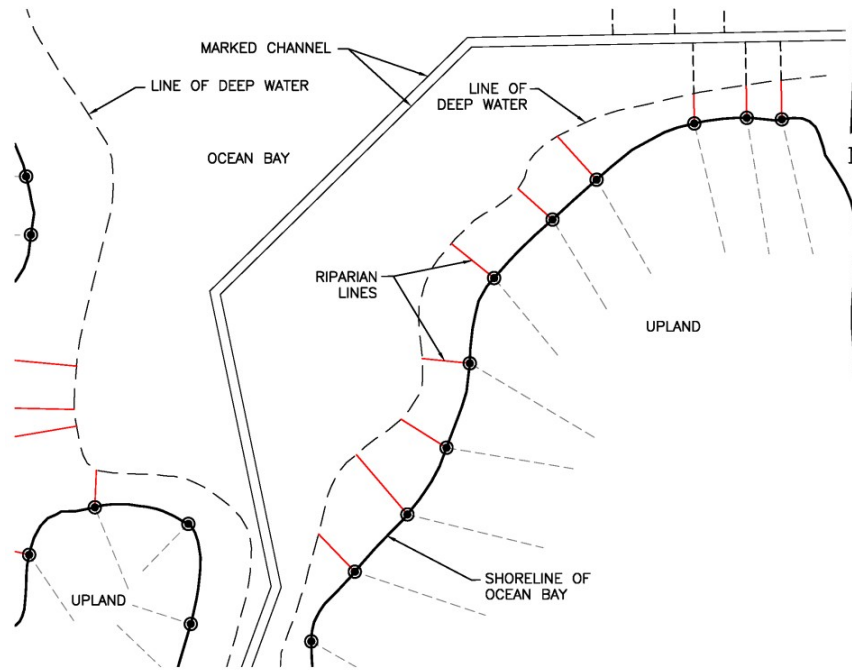

Deep Cove on One Bank – Apportion Line of Navigability The deep cove on the east bank in the following example requires special treatment. Inequities are obvious; if the typical solution of extending the lot lines is applied, persons “A” and “B” would be entirely cut off from navigable water and the channel. If the previous technique of perpendiculars from the channel were applied, then person “B” would receive nothing. Therefore, the line of navigability should be apportioned.

Finding the cove limits (headland points) would be a critical decision. The headlands of the cove would be identified as points “b” and “c” the places where the east river bank departs its generally parallel course and enters the cove. As a general rule the “45 degree method” can be used to find the headlands –where the shore first departs at a 45 degree angle from the general direction of the water body.

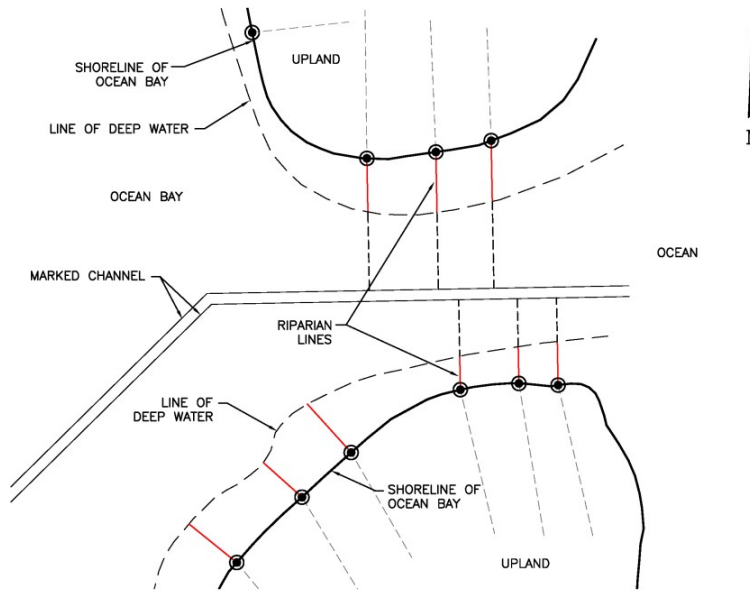

Points b' and c' would be established directly opposite the headland shore points using perpendiculars with the line of navigability. Between b' and c', the line of navigability would be divided in proportion to frontage. For example if the total distance b' to c' on the "outer line" is only 700 ft and the shore frontage from b to c is 1000 ft then each foot of shore frontage only receives 0.70 ft on the outer line – equitable apportionment. Straight lines would run back to shore points. The view zones would be the extension of the docking lines out to the channel line, (however view zones are not exclusive and they may overlap).

Large Water Body -- Perpendicular with Shore Northerly of the above example, on the east side of the ocean bay, the shore and the marked channel are diverging from each other. Since docking is a near-shore consideration, then a near-shore solution is called for. The dominant method is to construct perpendiculars with the generalized shore, projecting these riparian lines out to the line of deep water.

Inlet Channel – Perpendicular with Channel Line At the inlet of the ocean bay, the proximity of the channel is now the important consideration, and perpendiculars would be dropped from it as shown.

Coves

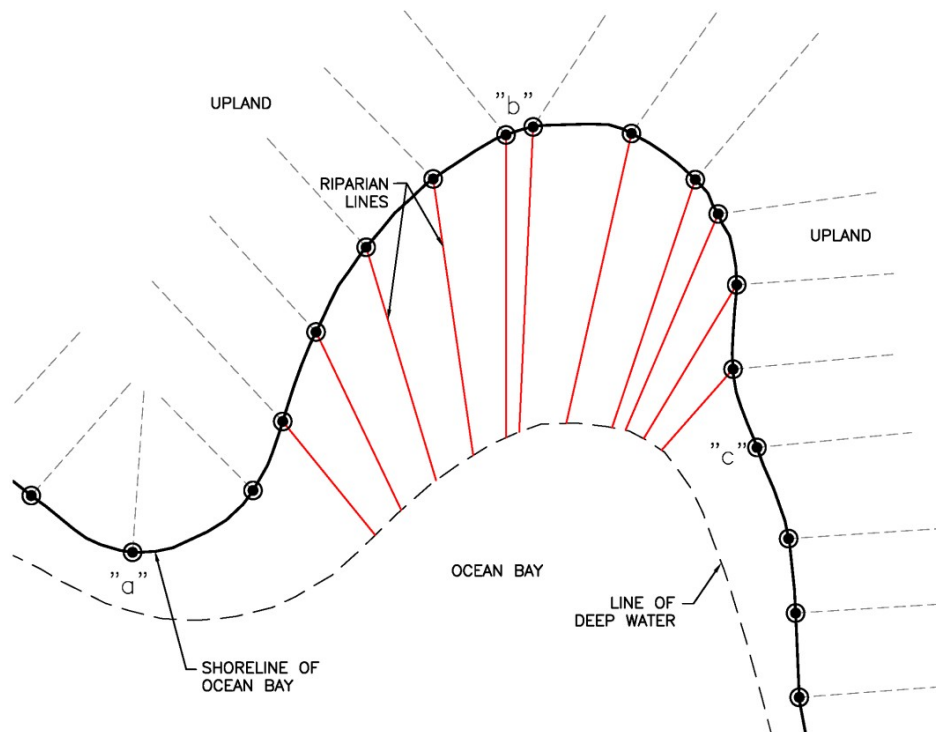

Large Bay Cove – Apportion Line of Navigability Around the ocean bay, the dominant construction is perpendicular with the generalized shore direction, projecting these out to the line of deep water.

However, the large cove on the north side of the bay calls for apportioning the line of navigability. The main question would be determining the apportionment limits. There is a well-

defined headland on the cove's west end at "a," but on the east side the cove's beginning is not so well defined.

As a guideline for thought, there is no use apportioning lots in which a more basic method works; therefore, start at the point of greatest inequity, point "b" in this case, and go in each direction until straight-line projections will intersect the line of navigability at nearly right angles well clear of the problem area, such as at "c" in this case. Apportionment between "a" and "c" will give each owner a portion of the line of deep water for constructing a dock.

A problem is noticed for owner "b". Due to small frontage, that lot will receive a very small portion of deep water frontage, perhaps not enough on which to build a dock without conflict with adjoining. This is a situation for the neighbors or courts to address. The surveyor should not attempt to solve this situation. Instead, the surveyor should rely on geometric construction principles. After the "theoretical" riparian lines are determined, let the owners negotiate a solution (riparian boundary agreement or license) or let the courts decide an equitable solution.

Commercial marina leasing has now made the allocation of the entire water body a consideration. Consider the water body shown in the following figure. It could be a river, a long lake, or intra-coastal waterway and a marked channel is present, therefore, the dominant riparian construction is perpendicular with the channel. The north shore is undulating with three "coves" to investigate: a (A) "shallow cove," not indented enough to require a cove method apportionment, a (B) "deep cove," requiring a cove apportionment, and (C & D) "hidden coves" which departs to form its own geometry. The deep water line, shown as a dashed line, illustrates that cove C contains deep water while cove D does not.

Shallow Cove A is called "shallow" because the intersection between the shore and riparian lines are at 45 degrees or less throughout the cove. This "45 degree rule" is presented here for consideration. At a location such as "d" where the shore and riparian line are at 45 degrees, the width of the riparian zone is 0.71 times the frontage distance, but these zone widths still give sufficient width for dock building out to the deep water line (dashed) and leasing/view out to the channel line. In the Florida case *Hayes v Bowman*, this angle was about 55 - 60 degrees which caused a reduced riparian zone width 0.85 times the lot frontage. Therefore, it was recognized that the riparian zone width may be significantly less than the riparian frontage width.

Deep Cove B begins at location "e" where the angle exceeds 45 degrees. This is the beginning of a deep cove B calling for a cove apportionment. The beginning points on the cove are A and A'. The end of the cove at point "f" is identified as points B and B', where the channel perpendicular and the shore make an angle of 45 degrees. The deep water line from A' to B' is apportioned according to relative shore frontages between A and B.

Hidden Cove C begins at "g" and ends at "h", again using the 45 degree rule. However, since this cove has its own geometry separate from the main water body, each riparian parcel fronts on this cove (not on the main water body). Therefore, perpendiculars are constructed with the cove's median lines. At the north end of the cove, a center point is chosen at the deep water end, and riparian lines are connected with the central point for parcels northwest of that point. This allocates the line of deep water between those riparian owners.

In **Hidden Cove D** apportionment of the line of navigability would give the lot at "D" no deep water frontage. Courts could treat this cove as a separate shallow water body. Since it is shallow, the owners could have the riparian right of ingress/egress only to the shallow waters

for small boats, but not to the line of deeper water. They could also have the right of view to the cove's median line as shown. However, to solve this question, courts would have to address the issues involved and therefore it is outside of the scope of this report.

Of course, outside hidden cove D, riparian owners have clear access to deep water as shown.

Long Fresh Water Lake – Radials to End Center Points – Perpendicular with the Median Line (Thread) To apportion riparian rights in a “long lake”, the traditional approach would establish center points in the semi-circular lake ends together with a thread midway between the banks. Around the lake ends, lines would radiate from center points to shore points, and along the thread, perpendiculars would be constructed and run back to shore points.

However, several geometric problems are encountered. At point “f”, it's impossible to drop a perpendicular to either line of the thread. Therefore an equitable approach would be to extend the riparian line to the angle point in the thread as shown.

Similarly, at point “g” on the west shore, two perpendiculars are possible, each dropped to a different line of the thread. Which one? Again an equitable approach would be to draw the riparian line to the angle point in the thread.

At parcel “E” there is a deep cove, and a perpendicular with the thread construction would be inequitable. This should then be apportionment of the line of deep water by the cove method with headlands identified at points “h” and “i.”

SUMMARY STATEMENTS – Please note that this document presents guidelines for a wide range of riparian situations. However, there are always unique situations that need to be addressed. The courts require that the allocation be “equitable” for the whole neighborhood. The geometric method, if extended up and down the shore, should be equitable for the whole neighborhood of riparian owners. In addition to a survey map of the parcel, it is recommended that a surveyor submit a riparian “report” that depicts the equity when the allocation is applied to the whole neighborhood.

Monroe County – ERP

Dear Ms. Vanadia:

Department personnel conducted a compliance inspection of the above-referenced facility on February 15, 2021. The Department also conducted a file review for the processing of a sovereignty submerged lands lease application.

Based on the information provided during the inspection and file review, the facility was determined to be in compliance because all structures are located landward of the Department-approved mean high water line (MHWL) elevation at the site, thereby not being located on sovereignty submerged lands. **Therefore, a sovereign submerged lands lease is no longer required for the structures at the site.** A copy of the inspection report is attached for your records.

The Department appreciates your compliance efforts. Should you have any questions or comments, please contact McKenzie Fraley at 305-289-7079 or by via e-mail at: Mckenzie.Fraley@FloridaDEP.gov.

Sincerely,

Site History

Based on the February 15, 2021 inspection, an approximate 550 square foot pier structure appeared to be located waterward of the mean high water line (MHWL), as the wrack-line was landward of the structure.

March 18, 2021: The Department and the upland owner entered a Temporary Use Agreement (TUA) during the processing and review of the submerged lands lease application for the private residential multi-family pier.

April 13, 2021: The Department received the Financial Assurance Affidavit, the Billing information Form, payment of the TUA fee, the Tidal Water Survey Procedural Approval, and the initial submerged lands lease sketch and legal description. This sketch and legal description was missing the following items for Department approval;

- 2 prints of sketch on 8.5x11 sheets labeled "NOT A FIELD SURVEY" (only 1 13x19 sheet provided without label)
- Riparian lines and distance from structure to riparian lines needed
- Total lease area needed (area below MHWL)
- Dimensions of structure required and fence needs label
- Legal description says "approximate mean high..." (should say actual)
- Location map and parcel sketch should be on separate pages

- Description needs square footage of lease area
- Description needs Section, Township, and Range
- Description needs waterbody

October 5, 2021: The Department did not receive a response from the surveyor, nor was a revised survey submitted. The Department and the upland owner entered a TUA Addendum extending the deadline to complete a submerged lands lease application to February 25, 2022.

December 8, 2021: The Department received an inquiry from the upland owner’s attorney showing that the MHWL was waterward of the pier structure and requesting further instructions. This was referred to the Department’s Division of State Lands, Bureau of Survey and Mapping for review.

February 25, 2022: During the Bureau of Survey and Mapping’s review of the MHWL location/elevation, another TUA Addendum was entered, extending the submerged lands lease application deadline to August 25, 2022.

April 8, 2022: The Department received an approved survey and a Tidal Water Survey Procedural Approval from the Bureau of Surveying and Mapping, showing that **there are no structures waterward of the MHWL and that a submerged lands lease is not required for the structures at this Property.**

Inspection Findings

April 8, 2022: The Department received an approved survey and a Tidal Water Survey Procedural Approval from the Bureau of Surveying and Mapping showing that **there are no structures below the MHWL and that a lease is not required for this Property.** The survey and Approval Form are attached.

TIDAL WATER SURVEY

1502 VERNON AVENUE

KEY WEST, FL

LOCATION MAP - NTS
SEC. 5-T685-R25E

STRAITS OF FLORIDA
(HAWK CHANNEL)

SURVEYORS NOTES

- THE MEAN HIGH WATER ELEVATION OF -0.17' NAVD88, AS SHOWN HEREON WAS ESTABLISHED BY EXTENDING THE ELEVATION SHOWN AT MEAN HIGH WATER INTERPOLATION POINT NUMBER 827-4557, AS PROVIDED TO THIS SURVEYOR BY M. KEVIN MEARS, PSM, WITH FLORIDA DEPARTMENT OF ENVIRONMENTAL PROTECTION ON FEBRUARY 22, 2022.
- THIS TIDAL WATER SURVEY COMPLIES WITH CHAPTER 177, PART II, FLORIDA STATUTES.
- THIS IS A FIELD SURVEY.
- ALL FIELD DATA AND MEAN HIGH WATER DATA WAS ACQUIRED ON 02/25/2022.
- ADDITIONS OR DELETIONS TO SURVEY MAP OR REPORT BY OTHERS THAN THE SIGNING PARTY IS PROHIBITED WITHOUT THE WRITTEN CONSENT OF THE SIGNING PARTY.
- HORIZONTAL COORDINATES AND BEARINGS SHOWN ARE REFERENCED TO GRID NORTH, BASED ON THE 2011 ADJUSTMENT OF THE NORTH AMERICAN DATUM OF 1983 (NAD 83/2011), OF THE FLORIDA STATE PLANE COORDINATE SYSTEM (TRANSVERSE MERCATOR PROJECTION), EAST ZONE (0901).
- COORDINATES WERE ESTABLISHED BY A REAL-TIME KINEMATIC (RTK) GNSS CONTROL SURVEY WHICH IS CERTIFIED TO A 2 CENTIMETER LOCAL ACCURACY, RELATIVE TO THE NEAREST CONTROL POINT WITHIN THE NATIONAL GEODETIC SURVEY (NGS) GEODETIC CONTROL NETWORK. METHOD: WIDE AREA CONTINUOUSLY OPERATING GPS REFERENCE STATION NETWORK (TRIMBLE VR5).
- ALL UNITS ARE SHOWN IN U.S. SURVEY FEET.
- ELEVATIONS SHOWN HEREON ARE IN FEET AND BASED ON THE NORTH AMERICAN VERTICAL DATUM OF 1988 (NAVD88).
- BENCHMARK DESCRIPTION: NATIONAL GEODETIC SURVEY BENCHMARK: DESIGNATION 872 4557 TIDAL 3, P.I.D. AA0915, ELEVATION 2.66' NAVD88.
- APPROXIMATE BOUNDARY LINES ARE GRAPHICALLY DELINEATED FROM INFORMATION OBTAINED FROM RECORDED DOCUMENTS AT THE TIME OF THE SURVEY. THIS IS NOT A BOUNDARY SURVEY AND THE INFORMATION SHOULD NOT BE RELIED UPON AS SUCH.
- PROPERTY ADDRESS: 1502 VERNON AVENUE, KEY WEST, FL
- REVISION(S): REVISED 04/08/2022 TO ADD DATE MHW ELEVATION WAS PROVIDED TO THIS SURVEYOR.

REVIEWED
By Kevin Mears at 4:57 pm, Apr 08, 2022

NOTE: LEGAL DESCRIPTIONS HAVE BEEN FURNISHED BY THE CLIENT OR HIS/HER REPRESENTATIVE. ADDITIONS OR DELETIONS TO SURVEY MAP OR REPORT BY OTHER THAN THE SIGNING PARTY IS PROHIBITED WITHOUT WRITTEN CONSENT OF THE SIGNING PARTY. THE BOLD LINE SHOWN HEREON REPRESENTS THE SURVEYORS OPINION OF THE DEED LINES. THE MEAN HIGH WATER LINE AS SHOWN ON THIS SURVEY MAP WAS IDENTIFIED IN ACCORDANCE WITH CHAPTER 177, PART II, FLORIDA STATUTES.

SCALE: 1"=20'

FIELD WORK DATE: 02/25/2022

MAP DATE: 03/01/2022

REVISION DATE: 04/08/2022

NOTE: FOUNDATIONS BENEATH THE SURFACE ARE NOT SHOWN. MEASURED DIMENSIONS EQUAL PLATTED OR DESCRIBED DIMENSIONS UNLESS INDICATED OTHERWISE. THE FOLLOWING IS A LIST OF ABBREVIATIONS THAT MAY BE FOUND ON THIS SHEET.

BFP = BACK-FLOW PREVENTER	GUY = GUY WIRE	POC = POINT OF COMMENCEMENT
BO = BLOW OUT	HB = HOSE BIB	PRC = POINT OF REVERSE CURVE
C & G = 2" CONCRETE CURB & GUTTER	IR = IRON PIPE	PRM = PERMANENT REFERENCE MONUMENT
CB = CONCRETE BLOCK	IR = IRON ROD	PT = POINT OF TANGENT
CBW = CONCRETE BLOCK WALL	L = ARC LENGTH	R = RADIUS
CL = CENTERLINE	LD = LANDSCAPING	R/W = RIGHT OF WAY LINE
CLF = CHAINLINK FENCE	MB = MAILBOX	SSCD = SANITARY SEWER CLEAN-OUT
CM = CONCRETE MONUMENT	MEAS = MEASURED	TBM = TEMPORARY BENCHMARK
CONC = CONCRETE	MF = METAL FENCE	TOS = TOP OF BANK
CPP = CONCRETE POWER POLE	MHW = MEAN HIGH WATER	TOS = TOE OF SLOPE
CVRD = COVERED	NAVD = NORTH AMERICAN VERTICAL DATUM (1988)	TS = TRAFFIC SIGN
DELTA = CENTRAL ANGLE	NTS = NOT TO SCALE	TYT = TYPICAL
A = DELTA	OH = ROOF OVERHANG	UR = UNREADABLE
EL = ELEVATION	ORW = OVERHEAD WIRES	UR = UTILITY FACILITY
ENCL = ENCLOSURE	PC = POINT OF CURVE	WD = WOOD DECK
EP = EDGE OF PAVEMENT	PF = FINISHED FLOOR ELEVATION	WF = WOOD FENCE
FF = FINISHED FLOOR ELEVATION	PCC = POINT OF COMPOUND CURVE	WL = WOOD LANDING
FI = FIRE HYDRANT	PCP = PERMANENT CONTROL POINT	WM = WATER METER
FI = FENCE INSIDE	PK = PARKER KALON NAIL	WPP = WOOD POWER POLE
FND = FOUND	POB = POINT OF BEGINNING	WRACK LINE = LINE OF DEBRIS ON SHORE
FO = FENCE OUTSIDE	PI = POINT OF INTERSECTION	WW = WATER VALVE
FOL = FENCE ON LINE

Tidal Water Survey Guidelines

The following guidelines shall be met for the survey drawing to be filed in the Department of Environmental Protection mean high water line repository.

- _____ The location of the mean high-water line shall be dated within 90 days of submittal.
- _____ A minimum of one site benchmark set for each site is shown and described with the datum reference indicated, i.e. 5.75' NAVD 88.
- _____ The horizontal location of the MHW line and a notation of the location method used is included. The MHW line shall reflect bearings and distances or station and offset ties to a witness or reference line.
- _____ A note is on the survey drawing describing the approved procedure used to establish the MHW line elevation.
- _____ The survey drawing includes the following notation near the tidal boundary that reads: “Mean High Water Elevation X.XX feet, NAVD88 as located on (date).”
- _____ A location or vicinity sketch showing the Section/Township/Range is included on the drawing.
- _____ The Survey drawing is labeled as a “Tidal Water Survey” or a “Boundary and Tidal Water Survey.”
- _____ A note is included on the survey drawing that reads: “This Tidal Water Survey complies with Chapter 177, Part II, Florida Statutes.”
- _____ Provide a copy of the “Tidal Water Survey Procedural Approval” form with the submittal of the survey drawing.
- _____ Provide a copy of the survey drawing in Portable Document File (pdf) format with the submittal of the survey drawing.

All of the above must be complied with.

BSM will use these guidelines to review the survey drawing. **No other review will be made.**

QUIT CLAIM DEED

THIS INDENTURE, made this 27 day of October A.D., 1995 BETWEEN

J. SEWARD JOHNSON, JR. and JOYCE H. JOHNSON, his wife

of the County of Monroe and State of Florida, party of the first part and

THE HONORARY CONCH, INC., a Florida corporation,
66 BATTLE ROAD PINE HAVEN, FL 33450

of the County of Monroe in the State of Florida, party of the second part,

WITNESSETH that the said party of the first part, for and in consideration of the sum of TEN DOLLARS AND OTHER GOOD AND VALUABLE CONSIDERATION to him in hand paid by the said party of the second part, the receipt whereof is hereby acknowledged, has remise, released and quitclaimed and by these presents does remise, release and quitclaim unto the said party of the second part all the right, title, interest claim and demand which the said party of the first part has in and to the following described lot, piece or parcel of land, situate lying and being in the County of Monroe, State of Florida, to-wit:

SEE SCHEDULE "A" ATTACHED HERETO AND MADE A PART HEREOF

TO HAVE AND TO HOLD, the same, together with all and singular the appurtenances thereunto belonging or in anywise appertaining, and all the estate, right, title interest and claim whatsoever of the said party of the first part, either in law or equity, to the only proper use, benefit and behoof of the said party of the second part.

IN WITNESS WHEREOF, the said party of the first part has hereunto set his hand and seal the day and year first above written.
