

Dear Mayor and Commissioners,

June 6, 2023

It appears the removal of Planning Board Member Gregory Lloyd is in retaliation for his objective and impartial letter to the editor dated April 8th. In this letter he asked the questions many in the community were also seeking answers to. We have a right to know how the recent failures with our water supply will impact our lives in the future, and what is being done to assure this essential resource is properly managed. Is it not the role of our local government to be asking these questions? Dismissing a board member for raising these concerns smacks of favoritism and does not demonstrate a positive characteristic of those serving the public on the City Commission. Mr. Lloyd has been a loyal and dedicated member of the Board and should remain in his position.

Respectfully,

Daryl Smith

Key West
