PLANNING BOARD  
Staff Report**

**To:** Chairman and Planning Board Members

**From:** Patrick Wright, Planner II

**Meeting Date:** July 16, 2015

**Agenda Item:** **Variance - 111 Whitehead Street (RE # 00000660-000000; AK # 1000671) - A request for a variance approval to the minimum side yard setback requirement in order to reconstruct and raise a roof on an existing commercial building on property located within Historic Residential Commercial Core – Duval Street Gulfside (HRCC-1) Zoning District pursuant to Sections 90-395 and 122-690 of the Land Development Regulations of the Code of Ordinances of the City of Key West, Florida..**

---

**Request:** To reconstruct and raise a roof on an existing commercial building. The proposed side yard setback is 0 feet from the 2.5 feet minimum required.

**Applicant:** Moshe Gvili

**Property Owner:** William R. Rupp Trust

**Location:** 111 Whitehead Street (RE # 00000660-000000; AK # 1000671)

**Zoning:** Historic Residential Commercial Core- Duval Street Gulfside (HRCC-1)

**Background:**

The property at 111 Whitehead Street is located at the northeast corner of Whitehead Street and Greene Street and is one lot of record. There are three existing commercial structures on the property that is bound by Whitehead Street, Greene Street and Fitzpatrick Street. A single-story portion of the building fronting Whitehead Street in the westernmost corner has a lower slanted roof that houses a commercial tour rental sales booth.

The applicant is now requesting a variance to the side yard setback requirement in order to reconstruct and raise the roof expanding the three-dimensional envelope of the current non-conforming side setback. No other changes to the property are proposed.

**DEO Review Period:**

**Analysis – Evaluation for Compliance with the Land Development Regulations:**

The criteria for evaluating a variance are listed in Section 90-395 of the City Code. The Planning Board before granting a variance must find all of the following:

- Existence of special conditions or circumstances. That special conditions and circumstances exist which are peculiar to the land, structure or building involved and which are not applicable to other land, structures or buildings in the same zoning district.***

The expansion of the three-dimensional envelope of the building inside an existing non-conforming setback is not the result of a circumstance that is peculiar to the land, structure or building involved. The roof could be replaced without expanding the existing non-conformity. Therefore, special conditions or circumstances do not exist.

NOT IN COMPLIANCE.

2. ***Conditions not created by applicant. That the special conditions and circumstances do not result from the action or negligence of the applicant.***

The request to expand the three-dimensional building envelope within the existing side setback is generated from specific actions initiated by the applicant and is not a special condition or circumstance.

NOT IN COMPLIANCE.

3. ***Special privileges not conferred. That granting the variance requested will not confer upon the applicant any special privileges denied by the land development regulations to other lands, buildings or structures in the same zoning district.***

Section 122-27 of the Land Development Regulations discourages the expansion of site nonconformities. The roof could be replaced or reconstructed within the existing 3d building envelope. Therefore, allowing the expansion of the building envelope would confer special privileges upon the applicant.

NOT IN COMPLIANCE.

4. ***Hardship conditions exist. That literal interpretation of the provisions of the land development regulations would deprive the applicant of rights commonly enjoyed by other properties in this same zoning district under the terms of this ordinance and would work unnecessary and undue hardship on the applicant.***

Maintaining the existing 3d building envelope or complying with the side setback would not deprive the applicant of rights commonly enjoyed by other properties in HRCC-1 zoning district. The applicant is proposing expanding an existing non-conformity. Therefore, hardship conditions do not exist.

NOT IN COMPLIANCE.

5. ***Only minimum variance granted. That the variance granted is the minimum variance that will make possible the reasonable use of the land, building, or structure.***

The variance requested is not the minimum required that will make possible the reasonable use of the land, building, or structure. The roof can be repaired and replaced in the existing three-dimensional building envelope.

NOT IN COMPLIANCE.

6. ***Not injurious to the public welfare. That the granting of the variance will be in harmony with the general intent and purpose of the land development regulations and that such variance will not be injurious to the area involved or otherwise detrimental to the public interest or welfare.***

Due to not being in compliance with all of the standards for considering variances, the granting of the requested variance would be injurious to the area involved and otherwise detrimental to the public interest.

NOT IN COMPLIANCE.

- 7. Existing nonconforming uses of other property not the basis for approval. No nonconforming use of neighboring lands, structures, or buildings in the same district, and no permitted use of lands, structures or buildings in other districts shall be considered grounds for the issuance of a variance.*

Existing non-conforming uses of other properties, use of neighboring lands, structures, or buildings in the same district, or other zoning districts, are not the basis for this request.

IN COMPLIANCE.

**Concurrency Facilities and Other Utilities or Service (Section 108-233):**

It does not appear that the requested variance would trigger any public facility capacity issues.

**The Planning Board shall make factual findings regarding the following:**

*That the standards established by Section 90-395 of the City Code have been met by the applicant for a variance.*

The standards established by Section 90-395 of the City Code have not been fully met by the applicant for the variances requested.

*That the applicant has demonstrated a "good neighbor policy" by contacting or attempting to contact all noticed property owners who have objected to the variance application, and by addressing the objections expressed by these neighbors.*

The Planning Department has received no comments regarding this variance request. Pursuant to Code Section 90-392, in granting such application the Planning Board must make specific affirmative findings respecting each of the matters specified in Code Section 90-394.

*The planning board shall not grant a variance to permit a use not permitted by right or as a conditional use in the zoning district involved or any use expressly or by implication prohibited by the terms of the ordinance in the zoning district.*

No use not permitted by right or as a conditional use in the zoning district involved or any use expressly or by implication prohibited by the terms of the ordinance in the zoning district would be permitted.

*No nonconforming use of neighboring lands, structures, or buildings in the same zoning district and no permitted use of lands, structures, or buildings in other zoning districts shall be considered grounds for the authorization of a variance.*

No such grounds were considered.

*No variance shall be granted that increases or has the effect of increasing density or intensity of a use beyond that permitted by the comprehensive plan or these LDRs.*

No density or intensity of a use would be increased beyond that permitted by the comprehensive plan or these LDRs.

**RECOMMENDATION:**

Based on the criteria established by the Comprehensive Plan and the Land Development Regulations, the Planning Department recommends the request for variance be **denied**.

**Section 3.** It is a condition of this variance that full, complete and final application for all conditions of this approval for any use and occupancy for which this variance is wholly or partly necessary, shall be submitted in their entirety within two years after the date hereof; and further, that no application shall be made after expiration of the two-year period without the applicant obtaining an extension from the Planning Board and demonstrating that no change of circumstances to the property or its underlying zoning has occurred.

**Section 4.** The failure to fully and completely apply the conditions of approval for permits for use and occupancy pursuant to this variance in accordance with the terms of the approval as described in Section 3 hereof, shall immediately operate to terminate this variance, which variance shall be of no force or effect.

\*Please note, variances are reviewed as quasi-judicial hearings, and it is improper for the owner or applicant to speak to a Planning Board member or City Commissioner about the hearing.

Standards for Considering Variances

Before any variance may be granted, the Planning Board and/or Board of Adjustment must find all of the following requirements are met:

1. Existence of special conditions or circumstances. That special conditions and circumstances exist which are peculiar to the land, structure or building involved and which are not applicable to other land, structures or buildings in the same zoning district.

The condition of the roof structure is a life safety issue due to the deterioration of structural members and poor construction.

---

2. Conditions not created by applicant. That the special conditions and circumstances do not result from the action or negligence of the applicant.

The applicant is making the deteriorated structure safe and improving the value of the structure, in turn improving the value of the surrounding properties.

---

3. Special privileges not conferred. That granting the variance(s) requested will not confer upon the applicant any special privileges denied by the land development regulations to other lands, buildings or structures in the same zoning district.

Denial of reconstruction would be a life safety concern, as the adjacent property owners have the privilege of occupying a safe structure and working environment.

---

4. Hardship conditions exist. That literal interpretation of the provisions of the land development regulations would deprive the applicant of rights commonly enjoyed by other properties in this same zoning district under the terms of this ordinance and would work unnecessary and undue hardship on the applicant.

As a life safety concern, the denial of reconstruction of the roof structure will be a hardship, as the structure will not be habitable due to continued deterioration from roof leaks caused by poor construction.

---

5. Only minimum variance(s) granted. That the variance(s) granted is/are the minimum variance(s) that will make possible the reasonable use of the land, building or structure.

The building footprint will not be increased by the alteration of the roof structure

---

---

City of Key West • Application for Variance

6. Not injurious to the public welfare. That granting of the variance(s) will be in harmony with the general intent and purpose of the land development regulations and that such variances will not be injurious to the area involved or otherwise detrimental to the public interest or welfare.

The vertical expansion of the roof structure will not harm public welfare. The reconstruction will make the deteriorated structure safer for occupants and neighbors.

---

7. Existing nonconforming uses of other property shall not be considered as the basis for approval. That no other nonconforming use of neighboring lands, structures, or buildings in the same district, and that no other permitted use of lands, structures or buildings in other districts shall be considered grounds for the issuance of a variance.

The reconstruction of the roof is expanding the nonconforming structure minimally in a vertical direction to match the existing attached retail space.

---

**The Planning Board and/or Board of Adjustment shall make factual findings regarding the following:**

- That the standards established in Section 90-395 have been met by the applicant for a variance.
- That the applicant has demonstrated a "good neighbor policy" by contacting or attempting to contact all noticed property owners who have objected to the variance application, and by addressing the objections expressed by these neighbors. Please describe how you have addressed the "good neighbor policy."
