Ordinance Cited on Review:

- Section 102-217 (4), demolition for contributing and historic structures of the Land Development Regulations.
- Section 102-218 - Criteria for Demolition of the Land Development Regulations.

Staff Analysis:

The Certificate of Appropriateness proposes the demolition of a one-story historic wood-frame and CMU structure, along with site features such as walkways and steps. This will clear the property for new construction. While the property is classified as non-contributing, it is considered historic. The exact construction date is unknown; however, the building appears on the 1962 Sanborn Map but is absent from the 1948 edition.

Existing Site Plan/Demo Plan.

It is staff's opinion that the request for this demolition shall be based on the demolition criteria of Chapter 102 Section 218 (a) of the LDR's. The criteria for demolition of historic structures state the following:

(a) The historic architectural review commission shall issue a certificate of appropriateness for an application for demolition:

- (1) If the subject of the application is a contributing or historic building or structure, then it should not be demolished unless its condition is irrevocably compromised by extreme deterioration, or it does not meet any of the criteria of section 102-125(1) through (9).*

Elements proposed for demolition are not contributing but they are historic and it does not portray significant deterioration.

The following is the criteria of section 102-125:

Staff opines that the historic structure has no distinctive characteristics of a type, period or method of construction.

- 2 Is not specifically associated with events that have made a significant contribution to local, state, or national history.*

It is staff understanding that no significant events have ever happened on the site relevant to local, state, or national history.

- 3 Has no significant character, interest, or value as part of the development, heritage, or cultural characteristics of the city, state, or nation, and is not associated with the life of a person significant in the past.*

- 4 Is not the site of a historic event with a significant effect upon society.*

It is staff's understanding that the site is not associated with any significant event.

- 5 Does not exemplify the cultural, political, economic, social, or historic heritage of the city.*

It is staff's understanding that the elements under review do not exemplify the cultural, political, economic, social or historic heritage of the city.

- 6 *Does not portray the environment in an era of history characterized by a distinctive architectural style.*

Staff believes that the existing building does not portray an era of history characterized by a distinctive architectural style.

- 7 *If a part of or related to a square, park, or other distinctive area, nevertheless should not be developed, or preserved according to a plan based on the area's historic, cultural, natural, or architectural motif.*

This is not the case.

- 8 *Does not have a unique location or singular physical characteristic which represents an established and familiar visual feature of its neighborhood or of the city, and does not exemplify the best remaining architectural type in a neighborhood; and*

The elements under review do not have a unique location or physical characteristics which represent an established and familiar visual feature of its neighborhood or of the city.

- 9 *Has not yielded, and is not likely to yield, information important in history.*

Staff believes that the elements under review do not yield important information in history.

It is staff's opinion that the request for demolition may be considered, as the structures under review meet the criteria for demolition. The building is historic but it is not contributing and it does not show significant deterioration. If approved, this will be the only required reading. Staff will review submitted construction plans for demolition and design to ensure consistency with submitted drawings.
