

**Historic Architectural Review Commission
Staff Report for Item 7**

To: Chairman Bryan Green and Historic Architectural Review Commission Members

From: Enid Torregrosa, MSHP
Historic Preservation Planner

Meeting Date: April 26, 2016

Applicant: Wayne Garcia

Application Number: H16-01-0002

Address: #1109 Virginia Street

Description of Work:
Demolition of rear structure.

Site Facts:

The main house on the site is a contributing resource to the historic district. The one-story frame structure was built in 1928. At the rear of the house, there is a small pool and wood decking. The structure in question for demolition is a wood frame structure covered with a tarp for planting orchids.

Ordinance Cited on Review:

- Section 102-217 (2), demolition for non-contributing or non-historic structures of the Land Development Regulations.

Staff Analysis

The plan under review proposes the demolition of a frame structure used for hanging orchids. The frame structure was built with no permits or HARC approval. The structure is covered with a brown tarp.

Consistency with Cited Ordinance

Section 102-218 (b) requires the following criteria when reviewing demolitions: The historic architectural review commission shall not issue permits that would result in:

- (1) Removing buildings or structures that are important in defining the overall historic character of a district or neighborhood so that the character is diminished;

It is staff's opinion that the removal of the non-permitted rear structure will not jeopardize the historic character of the neighborhood.

- (2) Removing historic buildings or structures and thus destroying the historic relationship between buildings or structures and open space;

The proposed structure to be demolished is not historic.

- (3) Removing an historic building or structure in a complex; or removing a building facade; or removing a significant later addition that is important in defining the historic character of a site or the surrounding district or neighborhood.

The proposed structure to be demolished is not historic.

- (4) Removing buildings or structures that would otherwise qualify as contributing, as set forth in section 102-62(3).

It is staff's opinion that the existing structure cannot qualify to be a contributing resource to the historic district in a near future.

It is staff's opinion that the proposed demolition shall be granted. The structure in question was never approved by the Commission, and it is not in keeping with the surrounding historic structures. If the request is approved this review will be the only public meeting required for this action.

PROJECT PHOTOS

Pictures with descriptions for Enid

Perhaps the most important things insofar as HARC is concerned, is:

- That it will be nearly impossible for anyone to see the structure from the street, due to how far it sits back, the existing vegetation on both sides of the property, and the existing fences between the properties.
- The structure will look exactly like the house, i.e. siding, trim, roofing, etc.

Street view. Note: Only place structure will be seen is possibly through this screen doorway (now no longer rusty) Gumbo limbo, while needing to be trimmed, also obstructs view somewhat. Not visible at all from Simon's house (Right side) due to existing fencing.

From this angle, you can see the fence between Simon's house (Varela Street) and 1109 Virginia which precludes seeing the structure from the right side of 1109.

This is just another street view and the fence between the houses can be seen better as well.

This is the same picture as above. The existing rear vegetation (trees) as well as the Gumbo Limbo also make it such that a view of the new structure is obstructed.

This is pretty much the only way the new structure could be seen from the road., i.e. down this entrance way. I've put an arrow here to indicate where the corner of the structure could be seen.

It would be behind the table umbrella in the picture. The yard is DEEP!

Enid, this is the best “overall” view of the existing lattice I have. That brown tarp-like stuff a tenant put up to not have to view what’s behind it. The top of the lattice isn’t that attractive to look at. It was used, I understand, a long time ago to raise/grow orchids. There is no roof on the lattice. It is only held together on top by the right and rear 2x4s and 3 other 2x4’s running front to back. It’s not a very strong structure, but while Annalise shows it being removed. I am leaning towards keeping it, because if the 3 top 2x4s were replaced, it could be a nice structure on which to encourage attractive plant growth.

This is almost the same picture as above. Due to the angle of the picture, the red I have put in doesn't show (as it would from a top view) the footprint of the cabana/pool house, but I put the red there to show where it will be. It will lie just forward of the lattice structure, and just at the end of the pool deck. Actually, it will encroach a little onto the pool deck. Best I can tell at this point from the drawings, is that the pool deck at that point will be shortened by about 1 foot. The rear of the new structure and the sides (from end of roof overhang (not actual sides) will be within the required setbacks, so no variances are needed. Just FYI, while this picture was taken this November, so really recent, this shows old deck boards that were on the deck, many of which were ruined and had to be replaced when the avocado was taken down, fell upon and broke them. Good thing however, as the tree was SO full of termites, it was about to fall on the house or a neighbors house!

This picture was taken about 2 years ago, but it has not changed since. It gives a really good sense of the lattice structure. You can see on the bottom it is also held together by 2x6's attached to each post. The new structure will be just forward of this and go a few feet forward of the Alexander palm you see on the extreme left side of this picture. While I have a permit to take down those palms. They are really nice and I'm going to transplant them to the left and right side of the property, both because that would look very nice, but also it provides further blind of the new structure.

Also, Annalise in the drawings shows deck all the way to the rear. I may not do that if I keep the lattice, rather, making it a yard and a step down. At the moment I'm staying with Annalise's plans, but may ask building department later what it would take (application or other) to not build the rear deck portion. Anyway, this shows you the best view of what the lattice structure looks like.

This is a picture that shows what you would see if you were sitting in the new structure looking toward the back of the house and Virginia street. It is taken right from where the new structure would start. You can see how the vegetation on the left side between Simon's house and mine, and the fence, totally preclude anyone from seeing the new structure from the street. And also you can easily imagine how for the same reasons and the visibility from the street on the right side of this picture is also really restricted.

Also, it is a VERY deep back yard, and that helps too. The yard/lot runs 3 houses down Varela street. It's wonderfully, that deep.

PROPOSED DESIGN

MAP OF BOUNDARY SURVEY

REPORT OF BOUNDARY SURVEY

LEGAL DESCRIPTION -

On the island of Key West and known as William A. Whitehead's map delineated in February A.D. 1829 as part of Tract Thirteen (13), but now better known as part of Lot Twenty-one (21) in Square One (1) in said Tract Thirteen (13), according to a division of One-third (1/3) of said Tract Thirteen (13) drawn by W.A. Gwynn, County Surveyor, and duly recorded in Book "D" of Deeds, on Page 195, of Monroe County Florida, Records, Commencing at a point Fifty-five (55) feet, Four (4) inches from the corner of Virginia and Varela Streets, and running thence along said Virginia Street in a Southwesterly direction Twenty Seven (27) feet and Eight (8) inches; thence at right angles in a Northwesterly direction One Hundred and Three (103) feet and Four (4) inches; thence at right angles in a Northeasterly direction Twenty Seven (27) feet and Eight (8) inches; thence at right angles in a Southeasterly direction One Hundred and Three (103) feet and Four (4) inches out to the place of beginning.

Parcel Sales History

NOTE: Sales do not generally show up in our computer system until about two to three months after the date of sale. If a recent sale does not show up in this list, please allow more time for the sale record to be processed. Thank you for your patience and understanding.

Sale Date	Official Records Book/Page	Price	Instrument	Qualification
5/1/2013	2627 / 835	394,800	WD	Q2
3/1/1997	1449 / 1985	215,000	WD	Q
11/1/1995	1378 / 1216	110,000	WD	Q
9/1/1978	779 / 1048	20,000	00	Q
