RE: Request for Noise Variance; Commercial Construction Project

Mingo and Company requests a noise variance for late night work at the GFS Improvement Project located at 2508 North Roosevelt Boulevard Key West, FL. The work will commence on May 4, 2016 and end on June 5, 2016. Due to the nature of the project, late night work is required during the hours of 8:00pm-4:00am on various nights throughout the course of the project. The work will involve concrete demolitions, saw cutting, and jackhammering, removal of walk-in cooler on the interior of the building all occurring on the inside of the building, with the exception of the disposal of the cooler. We don't foresee the noise generated from the work becoming an issue because all work is going to be done on interior of building and the building is located 225 feet from any residences however, we want to ensure the continuation of work. Please put this matter on the agenda for the Commission Meeting scheduled May 3, 2016.

Thank You,

Mingo Castellanos, President
