difficult to maintain it. It creates a excessive shade and does not let all beautiful flowers and plants we planted there to grow. The main problem is the tree has done a lot of damage for a very short period of time. The tree creates some kind of dust, which covers everything around: other plants, flowers, house, roof and doors. In five month period we pressure washed the house twice already. It cost us hundreds of dollars. The biggest damage is: the dust got in to some of our doors and it made them black. It is not washable, we even try pressure wash them, but it does not come off. I can only imagine what damage will happen in one or more year period. At this point we need to change our doors, which cost thousands of dollars. We just can't afford that much thousands of dollars of damage every year to that historical property, because of the tree.

1901 Flagler it is a historic property, we renovated recently. We put a lot of effotds and money in to this restoration, so it gives a Key West City some privileges as well. We hope you understand, we can't allow the tree to damage this beautiful Historic House everyone love.
